Abstracts

The global IOL Scanners market size is poised to register 10.3% growth from 2024 to 2032, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global IOL Scanners market across By Modality (Wired Scanner, Wireless Scanner), By Application (Prosthodontics, Orthodontics, Endodontics, Others), By End-User (Dental hospitals & Clinics, Dental Academic and Research Institutes, Others)

The IOL scanners market is driven by the increasing demand for precise biometry and intraocular lens calculations, advancements in optical coherence tomography (OCT) and biometry technologies, and the growing importance of accurate measurements in cataract surgery and refractive outcomes. By 2030, the market is anticipated to witness significant growth, fueled by innovations in optical biometry devices, swept-source OCT scanners, and artificial intelligence algorithms. Further, expanding applications in IOL power calculation, astigmatism correction, and presbyopia correction are expected to drive market expansion, enabling ophthalmologists, optometrists, and cataract surgeons to improve refractive accuracy, reduce refractive surprises, and optimize visual outcomes through IOL scanners that offer precision, reliability, and integration for preoperative planning and IOL selection in the IOL scanner market and ophthalmic surgery field.
