Abstracts

2020 Keloids PIPELINE HIGHLIGHTS

Keloids is one of the widely researched conditions during 2020 with 8 companies actively focusing on realizing pipeline's potential. Development of Keloids medicines is identified as integral to the strategy of the majority of companies operating in the industry.

Global Keloids market presents promising new product pipeline with NME Projects, pivotal trials, and rapidly phase-advancing therapeutic candidates. Increasing number of companies are assessing the feasibility of developing treatment options for Keloids.

Good progress is anticipated during 2020 and 2021 with Keloids pipeline molecules advancing from pre-clinical investigation to completion of advanced Phase clinical trials. Keloids pipeline continues to expand and progress with novel mechanisms and diverse routes of administration being tested by companies.

Keloids DRUG DEVELOPMENT PIPELINE OVERVIEW

The "Keloids pipeline Research Monitor, 2020" report is an analytical research study on the progress achieved by pipeline companies during the year along with its historical development, current status, and outlook.

This Keloids pipeline review explores high-potential early to late-stage pipeline projects with a continued focus on new insights, accelerated processes, and pipeline progression.

The competitive intelligence report on Keloids presents detailed insights into therapeutic drug pipeline development, industry news, deals, and analysis across the length and breadth of the Keloids pipeline. Information on R&D pipeline updates, results of key clinical trials are also included in the report.

Keloids DRUG PROFILES

Keloids development pipeline including projects in early- and late-stage development are detailed in the report. Details of clinical trial data and submissions to regulatory authorities are also provided. For the drug candidates included in the report, the following information is provided-

Current Status of Development including phase advancements, regulatory approvals of phases, acquisitions, licensing and technology transfers, product launches in various markets, and others.

Phase of development

Mechanism of Action

Route of Administration

Companies involved including originator, licensing companies, developer, investors, and others

New molecular entity details

Orphan drug designation and other special status provided by regulators

Keloids COMPANY PROFILES

Both small size and large size pharmaceutical companies are investing their resources in Keloids drug development operations. Further, financial institutions are extending support to small pharmaceutical companies, universities, and other researchers for the development of treatment of Keloids. Partnerships and acquisitions are also increasingly observed in the pipeline.

This research report presents an analysis of 8 Keloids companies including company overview, key snapshot, contact information, and their strategies on accelerating Keloids pipeline development. Mid-stage and early portfolios of these companies are analyzed in detail in the report.

Companies analyzed in the report include- Allianz Pharmascience Ltd, FBM Therapeutics LLC, FirstString Research Inc, Miragen Therapeutics Inc, Next Science

Ltd, Phio Pharmaceuticals Corp, Topadur Pharma AG, Yuhan Corp

REASONS TO BUY

The current market conditions are forcing companies and investors worldwide to prioritize their investments and accelerate pipeline candidates only through careful quantitative assessment.

This research work assists decision makers in pharmaceutical companies towards successful pipeline development through critically evaluated pipeline data

Buyers can identify most promising drug candidates for treatment of Keloids

It allows users to strengthen their pipeline through acquisitions, licensing and collaborations

Users can estimate possible delays in the delivery of pipeline or launch of new products

Stay ahead of competition through understanding their pipeline progression, strategies and outlook

The report details all the pipeline candidates under investigation in various stages of development from Phase I through to Phase III to enable business development managers to understand the impact of new launches.

Optimize your licensing and technology transfer strategies through identification of prospect partners

Contents

1. INTRODUCTION TO KELOIDS

- 1.1 Keloids- Disease overview
- 1.2 Keloids- Market Size
- 1.3 Keloids- Companies Involved

2. KELOIDS PIPELINE SNAPSHOT- 2020

- 2.1 Keloids Pipeline by Phase
- 2.2 Keloids Pipeline by Mechanism of Action
- 2.3 Keloids Pipeline by Route of Administration
- 2.4 Keloids Pipeline- New Molecular Entities
- 2.5 Keloids Pipeline- Orphan Drug Designation/ Special Designation

3. KELOIDS DRUG PROFILES

- 3.1 Current Status
- 3.2 Keloids Drug Snapshot
- 3.3 Keloids Therapeutic Candidates- Originator/Licensors
- 3.4 Route of Administration
- 3.5 Mechanism of Action
- 3.6 NME
- 4.1 Allianz Pharmascience Ltd Keloids Pipeline Insights and Clinical Trials
- 4.2 FBM Therapeutics LLC Keloids Pipeline Insights and Clinical Trials
- 4.3 FirstString Research Inc Keloids Pipeline Insights and Clinical Trials
- 4.4 Miragen Therapeutics Inc Keloids Pipeline Insights and Clinical Trials
- 4.5 Next Science Ltd Keloids Pipeline Insights and Clinical Trials
- 4.6 Phio Pharmaceuticals Corp Keloids Pipeline Insights and Clinical Trials
- 4.7 Topadur Pharma AG Keloids Pipeline Insights and Clinical Trials
- 4.8 Yuhan Corp Keloids Pipeline Insights and Clinical Trials

5. KELOIDS MARKET NEWS AND UPDATES

6. APPENDIX

- 6.1 Sources and Methodology
- 6.2 Contact Information
