Abstracts

The global Knock Out Mouse Model market size is poised to register 5.8% growth from 2024 to 2032, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Knock Out Mouse Model market across By Type (Constitutive, Conditional, Protein Function), By Application (Oncology, Neurology, Cardiovascular, Others), By End-User (Clinical Research Organizations, Pharma & Biotechnology Companies, Others)

The knock out mouse model market is poised for substantial growth owing to its expanding applications in biomedical research, drug discovery, and preclinical drug development, particularly in the study of gene function and disease mechanisms. With advancements in genome editing technologies, such as CRISPR/Cas9, there is a rising opportunity for knock out mouse model providers to offer genetically engineered mouse strains that accurately mimic human diseases and enable researchers to investigate disease pathways, identify therapeutic targets, and evaluate drug efficacy and safety. Further, the increasing demand for customized mouse models and the growing availability of comprehensive phenotyping services are driving market expansion further.
