Abstracts

The global Kyphoplasty market size is poised to register 6.47% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Kyphoplasty market across By Product (Balloon Catheters, Bone Access Devices, Cement Application Products, Bone Cement, Cement Mixing Systems, Instruments), By Application (Vertebral Alignment Restoration, Spinal Fractures, Kyphosis, Kyphoplasty Indication, Osteoporosis, Others), By End-User (Hospitals & Clinics, Ambulatory Surgical Centers).

The kyphoplasty market is experiencing substantial growth propelled by the rising incidence of vertebral compression fractures, increasing demand for minimally invasive spine procedures, and advancements in balloon kyphoplasty techniques. In 2024 and beyond, factors such as the growing adoption of vertebral augmentation for osteoporotic fractures, expansion of osteoporosis management programs, and rising prevalence of age-related spine deformities drive market expansion. Additionally, the development of next-generation bone cement formulations for improved stability, integration of navigational systems for precise vertebral augmentation, and partnerships between

medical device companies and spine centers contribute to market growth.
