### **2020 Liver Failure PIPELINE HIGHLIGHTS**

Liver Failure is one of the widely researched conditions during 2020 with 23 companies actively focusing on realizing pipeline's potential. Development of Liver Failure medicines is identified as integral to the strategy of the majority of companies operating in the industry.

Global Liver Failure market presents promising new product pipeline with NME Projects, pivotal trials, and rapidly phase-advancing therapeutic candidates. Increasing number of companies are assessing the feasibility of developing treatment options for Liver Failure

Good progress is anticipated during 2020 and 2021 with Liver Failure pipeline molecules advancing from pre-clinical investigation to completion of advanced Phase clinical trials. Liver Failure pipeline continues to expand and progress with novel mechanisms and diverse routes of administration being tested by companies.

### **Liver Failure DRUG DEVELOPMENT PIPELINE OVERVIEW**

The "Liver Failure pipeline Research Monitor, 2020" report is an analytical research study on the progress achieved by pipeline companies during the year along with its historical development, current status, and outlook.

This Liver Failure pipeline review explores high-potential early to late-stage pipeline projects with a continued focus on new insights, accelerated processes, and pipeline progression.

The competitive intelligence report on Liver Failure presents detailed insights into therapeutic drug pipeline development, industry news, deals, and analysis across the length and breadth of the Liver Failure pipeline. Information on R&D pipeline updates,

results of key clinical trials are also included in the report.

## Liver Failure DRUG PROFILES

Liver Failure development pipeline including projects in early- and late-stage development are detailed in the report. Details of clinical trial data and submissions to regulatory authorities are also provided. For the drug candidates included in the report, the following information is provided-

Current Status of Development including phase advancements, regulatory approvals of phases, acquisitions, licensing and technology transfers, product launches in various markets, and others.

Phase of development

Mechanism of Action

Route of Administration

Companies involved including originator, licensing companies, developer, investors, and others

New molecular entity details

Orphan drug designation and other special status provided by regulators

## Liver Failure COMPANY PROFILES

Both small size and large size pharmaceutical companies are investing their resources in Liver Failure drug development operations. Further, financial institutions are extending support to small pharmaceutical companies, universities, and other researchers for the development of treatment of Liver Failure . Partnerships and acquisitions are also increasingly observed in the pipeline.

This research report presents an analysis of 23 Liver Failure companies including company overview, key snapshot, contact information, and their strategies on accelerating Liver Failure pipeline development. Mid-stage and early portfolios of these companies are analyzed in detail in the report.

Companies analyzed in the report include- Akaza Bioscience, AVM Biotechnology LLC,

Celgene Corp, Daewoong Pharmaceutical Co Ltd, EA Pharma Co Ltd, Genentech Inc, Grifols SA, HepaRegeniX GmbH, Hepatx Corp, Immune Pharmaceuticals Inc, Mallinckrodt Plc, Martin Pharmaceuticals, Mina Therapeutics , Mylan NV, PledPharma AB, Promethera Biosciences, Proterris Inc, RHEACELL GmbH & Co KG, Steminent Biotherapeutics Inc, Takeda Pharmaceutical Co Ltd, Therapure Biopharma, Unicyte AG, Xenexus Pharmaceuticals

## **REASONS TO BUY**

The current market conditions are forcing companies and investors worldwide to prioritize their investments and accelerate pipeline candidates only through careful quantitative assessment.

This research work assists decision makers in pharmaceutical companies towards successful pipeline development through critically evaluated pipeline data

Buyers can identify most promising drug candidates for treatment of Liver Failure

It allows users to strengthen their pipeline through acquisitions, licensing and collaborations

Users can estimate possible delays in the delivery of pipeline or launch of new products

Stay ahead of competition through understanding their pipeline progression, strategies and outlook

The report details all the pipeline candidates under investigation in various stages of development from Phase I through to Phase III to enable business development managers to understand the impact of new launches.

Optimize your licensing and technology transfer strategies through identification of prospect partners
