## **Abstracts**

The global E-Scooters market size is poised to register 15.16% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The study analyzes the global E-Scooters market by Type (Motorcycle, Scooter), Application (Civil, Commercial, Military), Drive (Hybrid, Electric).

The future trajectory of the e-scooter market until 2030 is poised to be profoundly influenced by increasing urbanization and the need for sustainable and efficient last-mile transportation solutions is expected to drive significant growth in the market for electric scooters. Secondly, advancements in battery technology, motor efficiency, and lightweight materials will contribute to the development of more affordable, reliable, and eco-friendly e-scooter models, further accelerating market expansion. Further, changing consumer preferences toward shared mobility and micro-mobility options, coupled with supportive government regulations and investments in urban infrastructure, will fuel demand for electric scooters as a convenient and environmentally friendly mode of urban transportation. In addition, the integration of smart features such as GPS tracking, mobile app connectivity, and remote diagnostics into e-scooters will enhance user experience, safety, and fleet management capabilities, driving adoption among tech-savvy urban commuters. Furthermore, the rise of e-scooter sharing services and partnerships with ride-hailing and public transit operators will create new opportunities for market growth and innovation, fostering the development of integrated mobility solutions for urban transportation networks. .
