Abstracts

Managed Services Companies are revising their long-term strategies to emerge stronger in the post-COVID pandemic scenario. After facing series of challenges such as supply chain disruption, demand fluctuations, other pressing concerns during 2020, companies are revising their strategies through modifying the composition of product portfolios, investing in capital expenditures, R&D strategies, mergers and acquisitions, and other growth strategies.

The report analyzes multiple recovery scenarios considering evolving Managed Services market demand, economic recovery conditions, and other global and regional changes. The impact of the COVID-19 crisis on long-term Managed Services markets, growth outlook across types and application segments, strategies for emerging from the crisis are detailed in the report. The global semiconductors and electronics industry witnessed diverse trends over the past two years with manufacturing and other heavy industries facing operational challenges due to restricted cash flow during the pandemic. On the other hand, data center services, cloud computing, and other online supporting sectors gained significantly from the market trends. End-user spending of Managed Services market is expected to rebound significantly over the near term future.

Key Strategies set to impact the global Managed Services companies beyond 2021

To emerge strongly from the COVID-19 crisis, Managed Services companies are likely to develop effective crisis-management strategies including emphasis on next-generation products, and solutions, Modestly reducing Managed Services R&D budgets, Constant monitoring on Managed Services market trends, Systematic

approaches to investment/divestment, Carefully launching marketing strategies, Strengthening long term contracts, Others

The global semiconductors, electronics, information, communication, and technology industry witnessed diverse trends over the past two years with manufacturing and other heavy industries facing operational challenges. On the other hand, data center services, cloud computing, and other online supporting sectors gained significantly from the market trends.

Report Description

Introduction to Managed Services market research, 2021

The global Managed Services market report presents comprehensive coverage of Managed Services market trends, drivers, opportunities, and presents unique market opportunities for companies operating and expanding in the Managed Services industry. It is a focused research study on Managed Services markets and presents the outlook for global and regional markets over the eight years to 2028.

The strategic analytical multi-client study presents unbiased and actionable insights into the global Managed Services markets. Compiled with transparent methodology, the Managed Services market report enables clients to gain a clear understanding of the Managed Services market trends and insights.

Post COVID-19 Recovery Scenarios

Both recovery scenarios suggest year-on-year revenue growth in the Managed Services market during 2021. Most end-user markets continue to recover, mostly due to the demand in 2020 was lower than in previous years. Beyond 2021, Managed Services companies will have to formulate long-term plans, evaluate potential scenarios, and re-orient both strategies and operations to emerging market trends through constant monitoring of industry shifts and geopolitical responses.

The report presents analysis and outlook across two post COVID-19 recovery scenarios along with pre-COVID cases.

To enable companies to quickly analyze the Managed Services industry landscape and to re-align their strategies to stay ahead of the competition, the report presents the below scenarios:

Reference Case: Contained health impact, rapid recovery and quick growth rebound

Severe Case: High levels of health impact, prolonged recovery and slow economic rebound

Pre COVID Case: Comparative study of different outlook cases with pre-COVID cases
