## **Abstracts**

The global Microservices in Healthcare market size is poised to register 17.6% growth from 2024 to 2032, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Microservices in Healthcare market across By Delivery Model (Cloud-Based Mode, On-Premises Mode), By Component (Services, Platforms), By End-User (Healthcare Payers, Research Organizations, Healthcare Providers, Others)

The future of the microservices in healthcare market is driven by the increasing focus on interoperability, data exchange, and patient-centric care delivery models. With the digital transformation of the healthcare industry, there is a growing need for scalable, agile, and interoperable IT solutions to support complex healthcare ecosystems.

Microservices architecture offers a promising approach by breaking down monolithic systems into smaller, independently deployable services, enabling greater flexibility, scalability, and resilience. Further, the adoption of microservices is driven by the need to integrate disparate healthcare IT systems, streamline workflows, and improve patient outcomes. Over the forecast period to 2030, the proliferation of healthcare APIs, cloud-native technologies, and the Internet of Medical Things (IoMT) is expected to further accelerate the adoption of microservices in healthcare, facilitating innovation, collaboration, and personalized care delivery.
