Abstracts

The global Narcolepsy Therapeutics market size is poised to register 8.51% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Narcolepsy Therapeutics market across By Treatment (Narcolepsy with cataplexy, Narcolepsy without cataplexy, Secondary narcolepsy), By Product (Central nervous system stimulants, Sodium Oxybate, Selective serotonin reuptake inhibitor, Tricyclic antidepressants, Others).

The Narcolepsy Therapeutics market is experiencing significant growth attributed to the increasing awareness about narcolepsy, advancements in diagnosis and treatment, and expanding research efforts focused on understanding the underlying mechanisms of the disorder. Narcolepsy is a chronic neurological disorder characterized by excessive daytime sleepiness, cataplexy, sleep paralysis, and hallucinations, resulting from the dysregulation of sleep-wake cycles and neurotransmitter imbalances in the brain. Key drivers of market growth include the growing prevalence of narcolepsy, rising demand for symptom management therapies, and the development of novel pharmacological agents targeting orexin receptors, histamine receptors, and gamma-aminobutyric acid (GABA) receptors. Additionally, the availability of diagnostic tools, such as

polysomnography and multiple sleep latency tests, is facilitating early diagnosis and intervention, improving clinical outcomes for narcolepsy patients. Moreover, the increasing adoption of stimulant medications, wakefulness-promoting agents, and antidepressants in narcolepsy management is driving market expansion. Furthermore, research into the genetic, environmental, and immunological factors contributing to narcolepsy susceptibility is driving drug discovery efforts and personalized treatment approaches tailored to individual patient profiles.
