## **Abstracts**

The global Nebulizer market size is poised to register 7.65% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Nebulizer market across By Type (Jet, Mesh, -Active, -Passive, Ultrasonic), By Application (COPD, Cystic Fibrosis, Asthma, Others), By End-user (Hospital and clinics, Emergency Centers, Home Healthcare).

The Nebulizer Market is experiencing growth driven by the increasing prevalence of respiratory diseases such as asthma, chronic obstructive pulmonary disease (COPD), and cystic fibrosis, leading to the demand for effective aerosol drug delivery solutions. Nebulizers are medical devices used to convert liquid medications into fine aerosol droplets for inhalation therapy, delivering medication directly to the lungs for rapid relief of respiratory symptoms. Key trends shaping its future include the development of portable and battery-operated nebulizers for convenient and on-the-go use by patients with chronic respiratory conditions, the integration of smart nebulizer technologies with mobile apps and connectivity features for dose tracking, adherence monitoring, and remote patient management, and the customization of nebulizer devices and accessories for different medication formulations, delivery rates, and patient preferences. Additionally, factors such as the increasing prevalence of respiratory allergies and infections, the aging population, and the advancements in drug formulations and nebulizer design are expected to drive market growth in 2024 and

beyond.
