Abstracts

The global Neglected Tropical Diseases Drugs and Vaccines market size is poised to register 4.9% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Neglected Tropical Diseases Drugs and Vaccines market across By Disease (Malaria, Ebola, Dengue, Chagas, Leishmaniasis, Zika Virus), By Product (Drugs, Vaccines).

The Neglected Tropical Diseases (NTDs) Drugs and Vaccines market are experiencing robust growth driven by the increasing focus on global health equity, advancements in drug and vaccine development, and expanding access to essential medicines and preventive interventions for neglected tropical diseases. Neglected tropical diseases represent a group of communicable diseases prevalent in tropical and subtropical regions, primarily affecting vulnerable populations living in poverty with limited access to healthcare services. Key drivers of market growth include the growing recognition of neglected tropical diseases as a public health priority, initiatives by governments, non-profit organizations, and pharmaceutical companies to accelerate research and development efforts, and the establishment of collaborative partnerships to address the burden of NTDs. Additionally, the development of novel therapeutics, vaccines, and diagnostics targeting neglected tropical diseases, along with regulatory incentives and funding mechanisms to support their development, is driving innovation in the market. Moreover, the implementation of integrated disease control programs, community-

based interventions, and mass drug administration campaigns is expanding access to NTD treatments and preventive measures, thereby driving market expansion. Furthermore, advocacy efforts, fundraising initiatives, and multi-stakeholder collaborations are driving investment in neglected tropical disease control and elimination programs, fostering market growth in the foreseeable future.
