## **Abstracts**

The global NICU Catheter market size is poised to register 5.2% growth from 2024 to 2032, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global NICU Catheter market across By Product (Peripherally Inserted Central Catheters (PICCs), Central Venous Catheters (CVCs), Umbilical Venous Catheters (UVCs), Others), By End-User (Hospitals, Specialty Clinics, Ambulatory Surgical Centers, Others)

The neonatal intensive care unit (NICU) catheter market is poised for substantial growth owing to its essential role in neonatal care, intravenous therapy, and critical care interventions, as well as the increasing demand for specialized catheters, vascular access devices, and neonatal infusion sets that provide safe, reliable, and atraumatic vascular access for premature infants, low birth weight babies, and critically ill newborns in NICU settings. With advancements in catheter materials, tip designs, and insertion techniques, there is a rising opportunity for NICU catheter manufacturers to offer innovative solutions that minimize catheter-related complications, bloodstream infections, and tissue damage while ensuring optimal catheter patency, medication delivery, and nutritional support for neonates with complex medical needs and fragile vascular systems. Further, the expanding collaborations between neonatologists, pediatric surgeons, and NICU nursing teams, as well as the growing emphasis on

evidence-based practice guidelines, quality improvement initiatives, and family-centered care approaches, are driving market expansion further.
