Abstracts

The global Non-vascular Stents market size is poised to register 5.3% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Non-vascular Stents market across By Product (Gastrointestinal Stents, Pulmonary (Airway) Stents, Urological Stents, Others), By Material (Metallic Stents, Non-metallic Stents), By End-User (Hospitals, Ambulatory Surgical Centers).

The Non-vascular Stents Market is experiencing growth driven by the demand for stent-based solutions in non-vascular anatomical structures such as the gastrointestinal tract, respiratory system, and urinary tract, and the advancements in stent design, materials, and coatings for improved biocompatibility and performance. Non-vascular stents are medical devices used to maintain patency and provide structural support in hollow organs and ducts affected by strictures, obstructions, or fistulas, enabling the restoration of physiological functions and alleviation of symptoms. Key trends shaping its future include the development of biodegradable and drug-eluting stents for targeted drug delivery and tissue regeneration, the integration of shape memory alloys and self-expanding mechanisms for precise deployment and conformability to complex anatomies, and the customization of stent designs and surface modifications for specific clinical indications and patient needs. Additionally, factors such as the increasing prevalence of gastrointestinal and respiratory disorders, the aging population, and the

advancements in endoscopic and interventional procedures are expected to drive market growth in 2024 and beyond.
