## **Abstracts**

The global Nonmydriatic Handheld Fundus Camera market size is poised to register 9.68% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Nonmydriatic Handheld Fundus Camera market across By Type (Optical System, Image Acquisition System), By Application (Fundus Imaging, Fluorescein Angiography).

The Non-Magnetic Wheelchair market is experiencing notable growth driven by the rising demand for medical devices suitable for use in magnetic resonance imaging (MRI) environments, increasing adoption of non-magnetic wheelchairs in hospitals and diagnostic centers, and advancements in wheelchair design and technology. Non-magnetic wheelchairs are specifically designed to ensure patient safety during MRI procedures by eliminating the risk of interference with magnetic fields. Key drivers of market growth include the growing prevalence of conditions requiring MRI scans, such as neurological disorders and musculoskeletal injuries, and the expanding installation of MRI systems in healthcare facilities worldwide. Additionally, the development of lightweight, durable, and easily maneuverable non-magnetic wheelchair models, coupled with the integration of advanced features for patient comfort and caregiver convenience, is driving innovation in the market. Moreover, the rising investments in healthcare infrastructure, the increasing adoption of non-magnetic wheelchairs in outpatient settings and ambulatory care centers, and the growing awareness among healthcare professionals about the benefits of non-magnetic medical equipment are fueling market expansion. Furthermore, strategic collaborations between wheelchair

manufacturers and healthcare institutions, coupled with regulatory approvals for new product launches, are expected to drive market growth in the foreseeable future.
