Abstracts

The global Nutrition market size is poised to register 7.51% growth (CAGR) from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Nutrition market By Type (Vitamins, Probiotics, Proteins and amino acids, Carbohydrates, Others), By Application (Immunity, Sports nutrition, Weight management, Clinical nutrition, Others).

The future of nutrition is influenced by evolving dietary guidelines, consumer preferences, and scientific research aimed at promoting health, longevity, and sustainability through optimal food choices and dietary patterns. Key trends include the focus on whole foods, plant-based diets, and functional ingredients rich in essential nutrients, antioxidants, and bioactive compounds that support immune function, gut health, and metabolic resilience. Additionally, there is a growing emphasis on personalized nutrition approaches, nutrigenomics, and microbiome analysis that tailor dietary recommendations to individual genetic predispositions, lifestyle factors, and health goals. Moreover, advancements in food technology, food fortification, and food labeling enable transparency, traceability, and informed decision-making for consumers seeking nutritious and ethically sourced food products. Furthermore, innovations in food delivery services, meal replacement options, and dietary supplements offer convenient and accessible solutions to address nutrient deficiencies and support overall well-being, driving continuous innovation and adoption of nutrition interventions in public health,

clinical nutrition, and consumer wellness markets globally..
