Abstracts

The global Obesity Treatment market size is poised to register 13.49% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Obesity Treatment market across By Drugs (Combination Drugs, Appetite Suppressants, Malabsorption & Satiety Drugs), By Surgery & Devices (Adjustable Gastric Banding, Roux-en-Y Gastric Bypass, Sleeve Gastrectomy, Biliopancreatic Diversion With Duodenal Switch, Endoscopic Procedures).

The Obesity Treatment Market is witnessing growth driven by the rising prevalence of obesity and metabolic disorders worldwide, and the demand for effective medical interventions and lifestyle modifications to address obesity-related health complications. Obesity is a complex multifactorial condition characterized by excess body fat accumulation, which increases the risk of chronic diseases such as type 2 diabetes, cardiovascular disease, and certain cancers. Key trends shaping its future include the development of novel pharmacotherapies and biologic agents targeting appetite regulation, energy metabolism, and fat absorption pathways for weight management and obesity-related comorbidity prevention, the integration of digital health platforms and mobile apps for behavior modification, nutritional counseling, and exercise

coaching, and the customization of obesity treatment programs with bariatric surgery and minimally invasive procedures for individuals with severe obesity or metabolic syndrome. Additionally, factors such as the increasing awareness of obesity as a public health crisis, the expansion of reimbursement coverage for obesity treatments and preventive services, and the regulatory approvals of anti-obesity drugs and medical devices are expected to drive market growth in 2024 and beyond.
