## Abstracts

As the global chemicals industry is at the onset of the recovery phase, companies are focusing on identifying and monetizing new opportunities in the industry. The majority of the chemical industries are likely to record volume growth of 4% to 8% in the short term, depending on the chemical sub-segment and product portfolio. A large volume of PDMS companies felt the impact of the COVID-19 pandemic in multiple dimensions and are now emphasizing sustained growth over the long-term future. As the global PDMS and other chemicals industries play a vital role in the economic recovery of countries, PDMS companies are likely to witness potential opportunities in the short term period.

The report is designed for PDMS companies to succeed amid ongoing challenges in the PDMS industry and re-orient their strategies to the new economic, social, environmental, and political expectations. The comprehensive research presents analysis across PDMS market size to identify the right segments to focus on, identify key drivers, challenges, and market trends set to shape the future of global and regional PDMS markets.

From a lower growth trajectory, the current and tenth edition of the global PDMS market size outlook to 2028 estimates the market to register a moderate-to-high growth rate during the forecast period. PDMS Companies are emphasizing launching new products and solutions, modestly reducing R&D budgets, constant monitoring on PDMS market trends, systematic approaches to investment/divestment, carefully launching marketing strategies, strengthening long-term contracts, increased M&A, and others.
