Abstracts

The global Periodontal Scalers and Curettes market size is poised to register 12.33% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Periodontal Scalers and Curettes market across By Product (Mechanical (Sickle Scalers, Curettes, Others), Oscillatory (Sonic, Ultrasonic)), By Blade Type (Curved, Straight).

The Periodontal Scalers and Curettes Market is witnessing growth driven by the increasing prevalence of periodontal diseases such as gingivitis and periodontitis, and the demand for advanced dental instruments and periodontal tools for professional dental cleanings, periodontal therapy, and gum disease treatment in dental clinics and periodontal practices. Periodontal scalers and curettes are handheld dental instruments used by dental hygienists and periodontists to remove plaque, tartar, and bacterial biofilm from tooth surfaces and below the gum line, and to perform root planing and scaling procedures to treat periodontal pockets and promote periodontal health. Key trends shaping its future include the development of ergonomic and lightweight periodontal instruments with advanced designs, blade configurations, and tip geometries for improved tactile sensitivity, access to hard-to-reach areas, and efficient calculus removal in periodontal therapy and non-surgical periodontal treatment, the customization of periodontal scalers and curettes with antimicrobial coatings, ultrasonic vibration technology, and laser-assisted therapy for enhanced biofilm disruption and periodontal pocket disinfection, and the integration of periodontal instrument sterilization and infection control protocols with dental practice management software and electronic

health records (EHR) systems for compliance with dental regulatory standards and infection prevention guidelines. Additionally, factors such as the increasing awareness of periodontal health and preventive dentistry, the expansion of periodontal specialty services and dental hygiene programs, and the regulatory initiatives to improve periodontal disease screening and oral health education are expected to drive market growth in 2024 and beyond.
