Abstracts

The global Plant-Based Frozen Dessert Market size is forecast to grow at a CAGR of 9.12% between 2026 and 2032. This Plant-Based Frozen Dessert report provides a comprehensive analysis across By Product Type (Plant-Based Ice Cream, Plant-Based Frozen Yogurt, Plant-Based Gelato, Plant-Based Sorbets and Sherbets), By Ingredient Base (Almond-Based, Oat-Based, Coconut-Based, Soy-Based, Cashew), By Packaging Format (Tubs and Pints, Bars and Sticks, Cones and Cups), By Distribution Channel (Offline Retail, Online Retail, Foodservice), across 5 geographic regions, and 22 countries.

Dairy-Free Indulgence and Improved Creaminess Expand Frozen Dessert Consumption

The plant-based frozen dessert industry includes pints, bars, sandwiches, cones, soft-serve products, and novelty formats made with oat, coconut, almond, cashew, soy, pea, or other non-dairy bases. Demand is driven by vegan lifestyles, lactose avoidance, dairy allergies, sustainability concerns, and consumers seeking indulgent products without animal-derived ingredients. Purchasing decisions increasingly depend on creaminess, melt behavior, flavor intensity, inclusions, sugar content, certification, and the absence of icy or thin textures historically associated with plant-based desserts. Premium products featuring cookie pieces, caramel swirls, chocolate coatings, and globally inspired flavors are broadening appeal beyond committed vegan consumers. Manufacturers must balance fat structure, protein functionality, aeration, freeze-thaw

stability, and clean-label expectations while maintaining sensory performance comparable with conventional ice cream.

Oat-Based Reformulation, AI Product Development, and Dedicated Production Platforms

Manufacturers are improving plant-based frozen desserts through new bases, digital formulation, and specialized manufacturing. Ben & Jerry's has transitioned its non-dairy portfolio to a creamier oat-milk recipe, creating a standardized base for flavors containing chocolate, caramel, mint, cookies, and other inclusions. The Magnum Ice Cream Company announced a partnership with NotCo AI in 2025 to support new product development, including plant-based formulations, calorie optimization, and responses to commodity-cost volatility. GTE Foods operates a facility dedicated exclusively to plant-based ice cream, offering clean-label product development, customized flavors, and co-manufacturing under international food-safety certification. Bebo also expanded international visibility for its plant-based cup desserts and received recognition through a Mondelez-linked dessert award in 2025. These activities demonstrate increasing specialization in texture, formulation speed, and scalable production.

AI-Assisted Formulation, Oat-Milk Bases, and Premium Vegan Dessert Architecture

Manufacturer activity indicates that plant-based frozen dessert development is moving toward standardized creamy bases supported by sophisticated fat, protein, stabilizer, and aeration systems. Oat milk is gaining prominence because it provides a neutral flavor platform and supports consistent adaptation across established indulgent recipes. AI-assisted formulation is emerging as a tool for predicting texture, calorie content, ingredient substitutions, and melting behavior while reducing laboratory iterations. Dedicated plant-based factories and contract-manufacturing platforms are also lowering entry barriers for private-label and emerging brands. Premiumization continues through layered inclusions, chocolate coatings, novelty sticks, and limited-edition flavors rather than simple dairy-free positioning. Manufacturers are simultaneously pursuing recyclable packaging, responsibly sourced cocoa, cleaner stabilizer systems, and production processes designed to improve shelf life without sacrificing creamy texture or controlled melt.

Shifting Consumer Expectations and Industry Transformation

Young and adult consumers across markets are increasingly scrutinizing products beyond price and brand, seeking greater visibility into ingredients or materials, their origin, manufacturing location, quality, sourcing practices, and environmental attributes. This is increasing the importance of ingredient lists, nutrition labeling, allergen declarations, certifications, sourcing information and other product claims, while also raising the bar for transparency and substantiation.

In addition, the industry is being reshaped by advances in AI, ingredient and formulation technologies, automation, digital commerce, packaging technology and data analytics, creating new opportunities to accelerate product development, improve product quality and optimize operations. However, these capabilities require higher capital commitments, particularly as companies invest in store expansion and refurbishment, automation, AI-enabled systems, digital infrastructure and other productivity-enhancing technologies.

Competitive dynamics are also shifting as private-label and disruptor brands raise value expectations across selected price points, pushing established players to sharpen their entry, core and premium propositions. Private-label expansion, adjacent-category opportunities, M&A and AI are consequently creating new avenues for growth for manufacturers, suppliers and other industry participants across both developed and developing markets.

Impact of Tariffs and Inflation Rates on Plant-Based Frozen Dessert Markets and Companies

Tariffs and elevated inflation are directly reshaping the cost structure and pricing strategies of Food & Beverages and Consumer Goods companies. The impact is particularly visible in imported ingredients and raw materials, packaging materials, energy, transportation, and other internationally sourced inputs, while higher consumer prices are increasing pressure on household purchasing decisions. The IMF WEO Data 2026 projects global headline inflation at 4.7% in 2026, while the continued use of tariffs and other trade measures is increasing uncertainty around sourcing and cross-border costs.

The report quantifies the impact of tariff changes and inflation on the market by analyzing country-level inflation trends, tariff exposure, import dependence, input-cost movements and pricing conditions, and assesses their implications for market volumes, revenues and margins.

Key Value-Creating Activities and Participants Across the Plant-Based Frozen Dessert Industry Value Chain

Plant-Based Frozen Dessert value chains are becoming more cost-sensitive and closely integrated, with changes in input prices, sourcing concentration, production efficiency, packaging costs, logistics and channel economics directly influencing margins and competitive positioning at each stage.

The report maps the value chain from upstream suppliers to end-use channels, identifies the principal participants and value-adding activities at each stage, and assesses the relative importance of procurement, manufacturing, packaging, logistics, distribution and retail in the forecast period.

Plant-Based Frozen Dessert Pricing analysis- How Input Costs, Competition and Positioning Influence Plant-Based Frozen Dessert Market Pricing

Pricing analysis in the report establishes how prices differ across products, segments, countries and channels and what is driving those differences. The report provides historical and current price benchmarks, country-level and regional comparisons, product-level pricing, and an assessment of the principal factors influencing price movements.

Five forces analysis- How Competitive Forces Are Shaping the Plant-Based Frozen Dessert Industry

The chapter in the Plant-Based Frozen Dessert report evaluates competitive rivalry, threat of new entrants, bargaining power of suppliers, bargaining power of buyers, and threat of substitutes, with each force assessed against the market's actual operating conditions. It analyzes market factors including fragmentation, product differentiation, manufacturing and distribution requirements, switching costs, supplier concentration, raw-material availability, retailer purchasing power, and the ability of consumers to substitute between brands. The report also examines how e-commerce and marketplaces are lowering certain barriers to market access while intensifying price transparency, and how established distribution networks, brand recognition, scale and customer relationships continue to protect incumbents across categories.

Critical Success Factors- Key Factors Determining Competitive Success in the Plant-Based Frozen Dessert Industry

The report identifies the critical success factors that fuel growth in the Plant-Based Frozen Dessert market, in addition to market trends and company capabilities. The Plant-Based Frozen Dessert report evaluates critical success factors against the market's competitive environment and assesses how leading participants are strengthening them. Further, the chapter identifies the factors with strongest influence on market-share retention, customer loyalty, pricing power, operating performance, and long-term competitive differentiation.

Segmentation analysis- How Demand Is Distributed Across Key Segments of the Plant-Based Frozen Dessert Market

The report analyzes the global and regional markets across key types, applications, and other segments from 2021 to 2025. Further, forecasts are provided from 2026 to 2032. Key segments included in the study are By Product Type (Plant-Based Ice Cream, Plant-Based Frozen Yogurt, Plant-Based Gelato, Plant-Based Sorbets and Sherbets), By Ingredient Base (Almond-Based, Oat-Based, Coconut-Based, Soy-Based, Cashew), By Packaging Format (Tubs and Pints, Bars and Sticks, Cones and Cups), By Distribution Channel (Offline Retail, Online Retail, Foodservice).

US Plant-Based Frozen Dessert Market - Strong Consumer Spending, Private-Label Expansion and Premium Product Demand

The US Plant-Based Frozen Dessert companies are focusing on value positioning, distribution strength, product differentiation, and operating efficiency as private-label products gain ground against national brands. The US store-brand sales reached \$282.8 billion in 2025, growing 3.3% versus 1.2% for national brands, while store brands reached a record 21.3% dollar share and 23.5% unit share according to the Private Label Manufacturers Association. The report provides the US Plant-Based Frozen Dessert market size outlook from 2021 to 2032 and the key factors shaping the market along with key strategies adopted by leading companies.

Canada Plant-Based Frozen Dessert Market - Affordability, Retail Concentration and Supply-Chain Resilience Shape Market Growth

Over the past two years, Canadian companies have been focusing on value, supply-chain resilience and manufacturing efficiency to overcome trade and cost pressures. Retail demand also remained firm, with food and beverage retail sales increasing 4.4% year-on-year in December 2025, led by packaged dry foods, fresh meat and poultry, and snacks, according to Statistics Canada. The report identifies competitive pricing

and product value, retailer access, diversified sourcing, productivity, brand positioning, and portfolio innovation as key success factors across the Canadian Plant-Based Frozen Dessert value chain.

Mexico Plant-Based Frozen Dessert Market- Rising Consumption, Manufacturing Expansion and Export Integration Drive Market Development

Mexico's Plant-Based Frozen Dessert market is supported by a large domestic consumer base, established manufacturing capabilities, and strong export integration, while pricing remains an important consideration for consumers and manufacturers. The INEGI reported that the consumer prices for food, beverages and tobacco increased 5.13% year-on-year in May 2026, compared with 3.94% for overall consumer prices, keeping affordability and price management central to category performance. Leading companies are focusing on domestic manufacturing scale, ingredient availability, export competitiveness, product differentiation, efficient sourcing and supply-chain execution to gain profit margins.

Germany Plant-Based Frozen Dessert Market- Private-Label Strength, Price Sensitivity and Manufacturing Efficiency Shape Competition

Value-for-money, private-label competitiveness, efficient sourcing, and cost control are central to market performance and continue to shape the market outlook. German food prices remained structurally above their pre-inflation baseline: the food and non-alcoholic beverages CPI reached 136.2 in 2025 (2020=100), compared with 121.9 for the overall CPI, although annual food inflation moderated to 2.0% in 2025. The market is also being influenced by Germany's policy push toward healthier eating and greater development of alternative protein products, creating additional opportunities for reformulation and product innovation.

France Plant-Based Frozen Dessert Market- Premium Food Culture, Retail Transformation and Selective Consumer Spending Drive Demand

France's Plant-Based Frozen Dessert market is being shaped by moderating food inflation, cautious household consumption and a shift in retail demand toward value and specialized formats. Household final consumption expenditure increased only 0.4% in volume in 2025, while household purchasing power declined 0.4%, keeping affordability and price-value positioning important despite the easing of inflation. Plant-Based Frozen Dessert companies operating in France are balancing value-oriented pricing with quality and differentiation, strengthening supermarket and alternative-format distribution,

managing procurement and supply-chain costs, and responding to increasingly selective household spending.

UK Plant-Based Frozen Dessert Market- Import Dependence, Retail Concentration and Product Portfolio Expansion Influence Market Growth

The UK Plant-Based Frozen Dessert market is strongly influenced by import dependence, household affordability, and retail concentration. Consumer expenditure on food and alcoholic drinks reached ?303.3 billion in real terms in 2025, up 1.1%, with spending on food and drink eaten outside the home increasing 2.3% to ?137.7 billion, while household food expenditure was broadly flat. The structure of the industry also favors companies able to operate efficiently at scale: approximately 98.8% of UK food and drink manufacturing businesses are SMEs, creating a large and fragmented supplier base alongside major manufacturers and retailers. Over the forecast period, competitive pricing, procurement efficiency, product differentiation, retailer and foodservice relationships, import management and the ability to respond remain key success factors.

Spain Plant-Based Frozen Dessert Market- Household Consumption, Tourism and Export-Oriented Manufacturing Support Demand

Spain's Plant-Based Frozen Dessert market is supported by strong household food expenditure, a large tourism-driven consumption base and a highly export-oriented food industry, although consumers remain sensitive to price increases. Tourism provides an additional demand channel: international tourists spent €11.7 billion in Spain in April 2026 alone, up 7.4% year-on-year, including €1.99 billion on food and drinks, up 6.8%. Spain's food industry also reached a record level of exports in 2025, reinforcing its importance as an export manufacturing base and exposing producers to international trade conditions and supply-chain developments.

Italy Plant-Based Frozen Dessert Market- Product Quality, Heritage and Export Competitiveness Remain Key Market Drivers

Italy's consumption structure favors companies capable of maintaining value across differentiated price points: household consumption expenditure averaged €2,738 per month in 2023, up 4.3% from 2022, although the increase reflected both higher spending and price effects. Italy's large manufacturing and export base supports demand for products with strong quality, provenance, and differentiation, particularly where Italian origin provides a competitive advantage. Companies that can combine

Italy's established food-manufacturing capabilities with tighter cost control and differentiated products are better positioned to navigate slower domestic consumption and renewed price pressure.

China Plant-Based Frozen Dessert Market- Digital Commerce, Brand Trust and Selective Consumer Spending Reshape Demand

China's Plant-Based Frozen Dessert markets are being shaped by large-scale domestic consumption, rapid online retail expansion, increasingly selective spending and a widening performance gap between categories. Total retail sales of consumer goods reached RMB 50.1 trillion in 2025, up 3.7%, significantly outperforming beverages at 1.0%. Online retail is particularly important: physical-goods online sales reached RMB 13.1 trillion, representing 26.1% of total consumer-goods retail sales, while online sales of food increased 14.5% according to the National Bureau of Statistics of China. Established brands retain an advantage where consumers prioritize familiarity and brand authority, while the rapid expansion of online food sales creates opportunities for digitally native brands and manufacturers capable of using data, AI, and platform ecosystems.

India Plant-Based Frozen Dessert Market- Rising Consumption, Increasing Investment and Expanding Distribution Create Growth Opportunities

India's Plant-Based Frozen Dessert market is being supported by rising household consumption, a large and increasingly diversified consumer base, expansion of food processing and continued investment in formal food manufacturing. India's rural monthly per-capita consumption expenditure reached ₹4,122 in 2023–24, up from ₹3,773 in 2022–23, while urban MPCE increased to ₹6,996, highlighting the continued expansion of household purchasing capacity across both rural and urban markets. The supply side is also becoming more organized and processing-intensive. Digital commerce and AI-enabled consumer engagement are also becoming increasingly relevant, particularly as Indian consumers adopt digital tools across product discovery and purchasing.

Japan Plant-Based Frozen Dessert Market- Aging Consumers, Household Price Sensitivity and Digital Purchasing Reshape the Market

Japan's Plant-Based Frozen Dessert markets are being shaped by high food expenditure, renewed price pressure and increasingly cautious real household consumption, alongside a structurally mature consumer base. Price pressure has also remained visible in 2026, with Japan's headline CPI increasing 1.5% year-on-year in

May 2026, while core inflation excluding fresh food increased 1.4%. Meanwhile, online purchasing remains an important route to consumers: 55.3% of two-or-more-person households used online shopping in May 2026, with food contributing materially to the increase in online-shopping expenditure. Companies also need to manage smaller household sizes and differing consumption patterns by age, while maintaining strong product differentiation in a mature market where incremental volume growth is more difficult to achieve.

Brazil Plant-Based Frozen Dessert Market- Strong Domestic Consumption and Export-Oriented Manufacturing Drive Growth

Brazil's Plant-Based Frozen Dessert market is supported by a large domestic consumption base, a highly integrated agricultural and food-processing sector, and exceptional export competitiveness, while renewed food-price pressure is keeping affordability important. The country's food and beverage industry generated R\$1.388 trillion in revenue in 2025, equivalent to 10.9% of national GDP, with domestic sales reaching R\$1.02 trillion; retail accounted for R\$732 billion and foodservice R\$287.9 billion. Real industry sales increased 2.2%, while companies invested R\$41.3 billion, up 6.8%, including R\$26.7 billion in innovation, plant modernization and new technologies.

Middle East Africa Plant-Based Frozen Dessert Market- Import Dependence and Value-Added Products Gaining Steady Demand Growth

The Middle East Plant-Based Frozen Dessert markets are being shaped by high dependence on food imports, food-security investment, urbanization, tourism, premium retail and increasingly selective consumer spending, with conditions differing substantially between Gulf markets and the wider region. The GCC recorded overall inflation of only 1.8% in 2025, while food and beverage prices increased 1.2%, indicating relatively contained consumer-price pressure compared with many global markets. Across the region, this combination of import exposure and localization is increasing the importance of supplier diversification, local production, inventory management, and efficient logistics, while strong tourism, hospitality, and modern retail ecosystems are supporting demand for differentiated, convenience-oriented, and premium products.

Plant-Based Frozen Dessert Competitive Landscape

The Plant-Based Frozen Dessert competitive landscape is becoming more fragmented as established multinational brands compete simultaneously with private-label products,

regional manufacturers, digitally native brands and category-focused disruptors. Competitive advantage is increasingly determined by the ability to balance price, product quality, innovation, distribution reach and speed of response rather than by brand scale alone. The report provides detailed analysis of leading companies including business profile, SWOT analysis, products and services, and financial profiles of Unilever PLC, Nestl  S.A., General Mills, Inc., Danone S.A., Tofutti Brands, Inc., Oatly AB, Van Leeuwen Ice Cream, NadaMoo!, Arctic Zero, Inc.

Plant-Based Frozen Dessert Market Segmentation

By Product Type

Plant-Based Ice Cream

Plant-Based Frozen Yogurt

Plant-Based Gelato

Frequently Asked Questions

1. What is the current size of the Plant-Based Frozen Dessert market?

The Plant-Based Frozen Dessert market is estimated at US\$ in 2026, based on the report's market sizing methodology. Demand is supported by new product launches, while competition from local labels is influencing near-term market performance. The market is expected to reach US\$ by 2032, reflecting the investment expansion of leading companies.

2. How fast is the Plant-Based Frozen Dessert market expected to grow through the forecast period?

The Plant-Based Frozen Dessert market is projected to expand at a 9.12% CAGR between 2026 and 2032, with growth concentrated in Asia Pacific.

3. Which segment currently accounts for the largest share of the Plant-Based Frozen Dessert market?

The report analyzes the report across By Product Type (Plant-Based Ice Cream, Plant-Based Frozen Yogurt, Plant-Based Gelato, Plant-Based Sorbets and Sherbets), By Ingredient Base (Almond-Based, Oat-Based, Coconut-Based, Soy-Based, Cashew), By Packaging Format (Tubs and Pints, Bars and Sticks, Cones and Cups), By Distribution Channel (Offline Retail, Online Retail, Foodservice).

4. Which regions are generating the largest demand for Plant-Based Frozen Dessert products?

Differences in consumer preferences, pricing, regulation and distribution infrastructure continue to create significant variations in market performance across regions. Asia Pacific is the fastest growing market driven by China, India, Southeast Asia, and other emerging markets.

5. Which companies are leading the Plant-Based Frozen Dessert market?

The Plant-Based Frozen Dessert market includes major participants such as Unilever PLC, Nestlé S.A., General Mills, Inc., Danone S.A., Tofutti Brands, Inc., Oatly AB, Van Leeuwen Ice Cream, NadaMoo!, Arctic Zero, Inc. . Leading companies compete through product portfolio, distribution, technology, while recent competitive activity includes M&A, product launches, capacity expansion, and geographic expansion. Market leadership varies significantly by product category and geography.

Contents

CHAPTER 1- EXECUTIVE SUMMARY

- 1.1. Market Snapshot: Market Size, CAGR, and Growth Outlook to 2032
- 1.2. Key Industry Highlights, 2026
- 1.3. Premium Market Insights
 - 1.3.1. Potential Plant-Based Frozen Dessert Market Types and Applications
 - 1.3.2. Fastest Growing Countries Over the forecast period
- 1.4. Market Scope and Segmentation
 - 1.4.1. Key Market Segments
 - 1.4.2. Key Countries and Regions
 - 1.4.3. Top Companies in the Plant-Based Frozen Dessert Industry
- 1.5. Macroeconomic and Demographic Outlook
 - 1.5.1. GDP Outlook by Top 20 Countries, 2010-2030
 - 1.5.2. Population Forecast by Country, 2010-2030
 - 1.5.3. Inflation Trends in Leading Countries
- 1.6. Impact of Trade Policies, Regulations, and Sustainability
 - 1.6.1. Trade tariffs and localization requirements
 - 1.6.2. ESG and sustainability pressures
 - 1.6.3. Compliance-driven structural changes in the value chain

CHAPTER 2- RESEARCH METHODOLOGY

- 2.1. Report Coverage
- 2.2. Secondary Research
- 2.3. Primary Research
- 2.4. Data Triangulation
- 2.5. Market Modeling and Forecasting

CHAPTER 3- GLOBAL PLANT-BASED FROZEN DESSERT MARKET TRENDS, GROWTH DRIVERS, CHALLENGES, AND OPPORTUNITIES THROUGH 2032

- 3.1. An Introduction to Global Plant-Based Frozen Dessert Markets in 2026
- 3.2. Global Historic and Forecast Plant-Based Frozen Dessert Market Size Outlook, USD Million, 2021-2032
- 3.3. Annual Market Size Growth Rate (Y-o-Y), %, 2021-2032
- 3.4. Market Dynamics
 - 3.4.1. Key Plant-Based Frozen Dessert Market Driving Forces and Their Impact on

Market Outlook

3.4.2. Short and Long-Term Trends and Insights Shaping the Future

3.4.3. Potential Plant-Based Frozen Dessert Market Opportunities for Industry Stakeholders

3.4.4. Potential Challenges across Plant-Based Frozen Dessert Value Chain

CHAPTER 4- PLANT-BASED FROZEN DESSERT MARKET COMPETITIVE LANDSCAPE, STRATEGIC ANALYSIS, AND VALUE CHAIN ASSESSMENT

4.1. Porter's Five Forces Analysis

4.1.1. Bargaining Power of Buyers

4.1.2. Bargaining Power of Suppliers

4.1.3. Threat of Substitutes

4.1.4. Threat of New Entrants

4.1.5. Intensity of Competitive Rivalry

4.1.6. Market Attractiveness Analysis by Segment

4.1.7. Market Attractiveness Analysis by Country

4.2. Competitive Landscape

4.2.1 Product Analysis of Leading Plant-Based Frozen Dessert Companies

4.2.2 Recent Strategic Developments

4.2.3 Mergers, Acquisitions, and Partnerships

4.2.4 Key Success Factors

4.3. Value Chain Analysis

4.3.1. Key Value Chain Segments

4.3.2. Dominant players by value-chain stage

4.4. SWOT Analysis

4.4.1. Key Strengths and Opportunities

4.4.2. Major Weaknesses and Threats

4.5 Technology Roadmap

CHAPTER 5- PLANT-BASED FROZEN DESSERT MARKET OUTLOOK BY SEGMENTS

5.1. Market Size Outlook by Type, USD Million, 2021- 2025 and 2026-2032

5.2. Market Size Outlook by Application, USD Million, 2021- 2025 and 2026-2032

5.3. Market Size Outlook by Country, USD Million, 2021- 2025 and 2026-2032

By Product Type

Plant-Based Ice Cream

Plant-Based Frozen Yogurt

Plant-Based Gelato
Plant-Based Sorbets and Sherbets

10.9. Argentina

10.9.1. Key Statistics

10.9.2. Argentina Plant-Based Frozen Dessert Market Size Outlook, 2021- 2032

10.9.3. Key Market Drivers and Industry Developments in Argentina Plant-Based Frozen Dessert Companies

10.10. Rest of Latin America

10.10.1. Key Statistics

10.10.2. Rest of Latin America Plant-Based Frozen Dessert Market Size Outlook, 2021- 2032

10.10.3. Key Market Drivers and Industry Developments in Rest of Latin America Plant-Based Frozen Dessert Companies

CHAPTER 11- MIDDLE EAST AND AFRICA PLANT-BASED FROZEN DESSERT MARKET SIZE ANALYSIS AND OUTLOOK

11.1. Middle East and Africa Plant-Based Frozen Dessert Market Overview

11.2. Leading Companies Operating in Middle East and Africa

11.3. Key Industry Statistics, 2026

11.4. Middle East and Africa Plant-Based Frozen Dessert Market Trends and Growth Opportunities to

11.5. Middle East and Africa Plant-Based Frozen Dessert Market Size Outlook by Type

11.6. Middle East and Africa Plant-Based Frozen Dessert Market Size Outlook by Application

11.7. Middle East and Africa Plant-Based Frozen Dessert Market Size Outlook by Country

11.8. Saudi Arabia

11.8.1. Key Statistics

11.8.2. Saudi Arabia Plant-Based Frozen Dessert Market Size Outlook, 2021- 2032

11.8.3. Key Market Drivers and Industry Developments in Saudi Arabia Plant-Based Frozen Dessert Companies

11.9. United Arab Emirates

11.9.1. Key Statistics

11.9.2. The UAE Plant-Based Frozen Dessert Market Size Outlook, 2021- 2032

11.9.3. Key Market Drivers and Industry Developments in the UAE Plant-Based Frozen Dessert Companies

11.10. Africa

11.10.1. Key Statistics

- 11.10.2. Africa Plant-Based Frozen Dessert Market Size Outlook, 2021- 2032
- 11.10.3. Key Market Drivers and Industry Developments in Africa Plant-Based Frozen Dessert Companies

CHAPTER 12- COMPANY PROFILES

12.1. Top Companies in Plant-Based Frozen Dessert Industry

Unilever PLC

Nestl? S.A.

General Mills, Inc.

Danone S.A.

Tofutti Brands, Inc.

Oatly AB

Van Leeuwen Ice Cream

NadaMoo!

Arctic Zero, Inc. ????

12.2. Business Description

12.3. SWOT Profiles

12.4. Products and Services

CHAPTER 13- APPENDIX

Glossary of Terms

Research Methodology & Data Sources

Conclusion & Strategic Recommendations

I would like to order

Product name: Plant-Based Frozen Dessert Market Size, Share & Growth Report, H2-2026: Industry Outlook By Product Type, By Ingredient Base, By Packaging Format, By Distribution Channel, Companies and Countries to 2032

Product link: <https://marketpublishers.com/r/P85DEFB64D62EN.html>

Price: US\$ 3,285.00 (Single User License / Electronic Delivery)
