Abstracts

Rabies Drug Development Pipeline Study, H2 2018 is the latest infectious disease publication with comprehensive information of Rabies pipeline products.

DISEASE OVERVIEW

Human rabies is rare but fatal disease causing 50,000 deaths annually. Lyssavirus virus belonging to the family of Rhabdoviridae spreads the disease, from animals to humans, primarily dogs. Rabies prevention cost in the US is estimated to be around \$300 million, with most of the cost diverted to vaccinating dogs. Further, bats are also an important cause for spread of the rabies disease. In Europe, less than 10 cases are reported in Europe since 2011. However, in emerging markets, the prevalence is larger and worldwide, the market is estimated to be around \$2.5 billion.

To gain from such large market scope and addressing the unmet demand for rabies infections, 16 companies are currently developing therapeutic compounds. Majority of the pipeline products are vaccines for prevention of rabies. Companies involved in the Rabies infection disease pipeline include%li% Cadila Pharmaceuticals Ltd, Celltrion Inc, Changchun Institute of Biological Products, Curevac AG, Exxell BIO Inc, Humabs BioMed, Indian Immunologicals Ltd, Molecular Targeting Technologies Inc, NanoViricides Inc, Prosetta Biosciences Inc, Sanofi Pasteur SA, Synermore Biologics Co Ltd, VBI Vaccines Inc, Vir Biotechnology Inc, Yisheng Biopharma Co Ltd and Zydus Cadila.
