## Abstracts

### 2020 Raynauds Disease PIPELINE HIGHLIGHTS

Raynauds Disease is one of the widely researched conditions during 2020 with 4 companies actively focusing on realizing pipeline's potential. Development of Raynauds Disease medicines is identified as integral to the strategy of the majority of companies operating in the industry.

Global Raynauds Disease market presents promising new product pipeline with NME Projects, pivotal trials, and rapidly phase-advancing therapeutic candidates. Increasing number of companies are assessing the feasibility of developing treatment options for Raynauds Disease.

Good progress is anticipated during 2020 and 2021 with Raynauds Disease pipeline molecules advancing from pre-clinical investigation to completion of advanced Phase clinical trials. Raynauds Disease pipeline continues to expand and progress with novel mechanisms and diverse routes of administration being tested by companies.

### Raynauds Disease DRUG DEVELOPMENT PIPELINE OVERVIEW

The "Raynauds Disease pipeline Research Monitor, 2020" report is an analytical research study on the progress achieved by pipeline companies during the year along with its historical development, current status, and outlook.

This Raynauds Disease pipeline review explores high-potential early to late-stage pipeline projects with a continued focus on new insights, accelerated processes, and pipeline progression.

The competitive intelligence report on Raynauds Disease presents detailed insights into therapeutic drug pipeline development, industry news, deals, and analysis across the length and breadth of the Raynauds Disease pipeline. Information on R&D pipeline

updates, results of key clinical trials are also included in the report.

### Raynauds Disease DRUG PROFILES

Raynauds Disease development pipeline including projects in early- and late-stage development are detailed in the report. Details of clinical trial data and submissions to regulatory authorities are also provided. For the drug candidates included in the report, the following information is provided-

Current Status of Development including phase advancements, regulatory approvals of phases, acquisitions, licensing and technology transfers, product launches in various markets, and others.

Phase of development

Mechanism of Action

Route of Administration

Companies involved including originator, licensing companies, developer, investors, and others

New molecular entity details

Orphan drug designation and other special status provided by regulators

### Raynauds Disease COMPANY PROFILES

Both small size and large size pharmaceutical companies are investing their resources in Raynauds Disease drug development operations. Further, financial institutions are extending support to small pharmaceutical companies, universities, and other researchers for the development of treatment of Raynauds Disease. Partnerships and acquisitions are also increasingly observed in the pipeline.

This research report presents an analysis of 4 Raynauds Disease companies including company overview, key snapshot, contact information, and their strategies on accelerating Raynauds Disease pipeline development. Mid-stage and early portfolios of these companies are analyzed in detail in the report.

Companies analyzed in the report include- Allergan Plc , Apricus Biosciences Inc,

Exodos Life Sciences Limited Partnership, Pfizer Inc

## REASONS TO BUY

The current market conditions are forcing companies and investors worldwide to prioritize their investments and accelerate pipeline candidates only through careful quantitative assessment.

This research work assists decision makers in pharmaceutical companies towards successful pipeline development through critically evaluated pipeline data

Buyers can identify most promising drug candidates for treatment of Raynauds Disease

It allows users to strengthen their pipeline through acquisitions, licensing and collaborations

Users can estimate possible delays in the delivery of pipeline or launch of new products

Stay ahead of competition through understanding their pipeline progression, strategies and outlook

The report details all the pipeline candidates under investigation in various stages of development from Phase I through to Phase III to enable business development managers to understand the impact of new launches.

Optimize your licensing and technology transfer strategies through identification of prospect partners

## Contents

### **1. INTRODUCTION TO RAYNAUDS DISEASE**

- 1.1 Raynauds Disease- Disease overview
- 1.2 Raynauds Disease- Market Size
- 1.3 Raynauds Disease- Companies Involved

### **2. RAYNAUDS DISEASE PIPELINE SNAPSHOT- 2020**

- 2.1 Raynauds Disease Pipeline by Phase
- 2.2 Raynauds Disease Pipeline by Mechanism of Action
- 2.3 Raynauds Disease Pipeline by Route of Administration
- 2.4 Raynauds Disease Pipeline- New Molecular Entities
- 2.5 Raynauds Disease Pipeline- Orphan Drug Designation/ Special Designation

### **3. RAYNAUDS DISEASE DRUG PROFILES**

- 3.1 Current Status
- 3.2 Raynauds Disease Drug Snapshot
- 3.3 Raynauds Disease Therapeutic Candidates- Originator/Licensors
- 3.4 Route of Administration
- 3.5 Mechanism of Action
- 3.6 NME
- 4.1 Allergan Plc Raynauds Disease Pipeline Insights and Clinical Trials
- 4.2 Apricus Biosciences Inc Raynauds Disease Pipeline Insights and Clinical Trials
- 4.3 Exodos Life Sciences Limited Partnership Raynauds Disease Pipeline Insights and Clinical Trials
- 4.4 Pfizer Inc Raynauds Disease Pipeline Insights and Clinical Trials

### **5. RAYNAUDS DISEASE MARKET NEWS AND UPDATES**

### **6. APPENDIX**

- 6.1 Sources and Methodology
- 6.2 Contact Information

## I would like to order

Product name: Raynauds Disease pipeline Research Monitor, 2020- Drugs, Companies, Clinical Trials, R&D pipeline updates, status and outlook

Product link: <https://marketpublishers.com/r/RF95BD7D0274EN.html>

Price: US\$ 1,599.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
