## **Abstracts**

The global Stretch Marks Treatment market size is poised to register 8.8% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Stretch Marks Treatment market across By Treatment (Topical Products, Laser, Others), By End-User (Hospitals and Clinics, Home Use).

The Stretch Marks Treatment Market is witnessing growth driven by increasing demand for aesthetic procedures and skincare products, rising prevalence of stretch marks among women and adolescents, and advancements in dermatological treatments and technologies. Stretch marks, also known as striae distensae, are common skin lesions characterized by dermal scarring and skin laxity, driving the need for effective treatment options. Key trends shaping its future include the development of topical creams and gels containing retinoids, peptides, and botanical extracts for stretch mark prevention and reduction, integration of laser therapy and energy-based devices for skin remodeling and Stretch Marks Treatment regeneration, and customization of treatment protocols for different skin types and stretch mark severity. Additionally, increasing consumer awareness of cosmetic dermatology options, expansion of medical aesthetics clinics and medspas offering stretch mark treatments, and regulatory approvals for new skincare formulations contribute to market expansion.
