Abstracts

The global Surgical Clips market size is poised to register 21.86% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Surgical Clips market across By Type (Ligating, Aneurysm), By Material (Titanium, Polymer, Others), By Surgery (Automated/ Robotic Assisted Surgery, General Surgery), By End-user (Hospitals, Ambulatory Surgical Centers, Clinics).

The Surgical Clips Market is experiencing growth propelled by increasing demand for minimally invasive surgical procedures, rising prevalence of chronic diseases requiring surgical intervention, and advancements in surgical clip technology and materials. Surgical clips are used for hemostasis and tissue approximation during open and laparoscopic surgeries to control bleeding and secure tissue margins. Key trends include the development of titanium and absorbable polymer clips for enhanced biocompatibility and tissue healing, integration of clip applicators with advanced ergonomic designs and reloadable cartridges for ease of use and precision control, and customization of clip sizes and designs for specific surgical applications and anatomical structures. Moreover, increasing adoption of clip ligation techniques in gastrointestinal and bariatric surgeries, expansion of ambulatory surgery centers and outpatient clinics offering minimally invasive procedures, and regulatory approvals for new surgical clip

innovations contribute to market growth.
