Abstracts

The global Surgical Procedures market size is poised to register 6.3% growth from 2024 to 2032, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Surgical Procedures market across By Type (Gastrointestinal, Cardiovascular, Dental, Cosmetic Surgical Procedures, Urologic, Ophthalmic, Others), By Channel (Physician Offices, Hospitals, Ambulatory Surgery Centre, Others)

In the Surgical Procedures market, the increasing prevalence of chronic diseases, aging population, and technological advancements in surgical techniques and medical devices are driving the growth of the surgical procedures market globally. Surgical procedures encompass a wide range of interventions, including open surgery, minimally invasive surgery, robotic-assisted surgery, and image-guided surgery, aimed at diagnosing, treating, or palliating various medical conditions and improving patient outcomes. With the growing demand for personalized medicine, less invasive treatment options, and value-based care models, there is a rising need for surgical procedures that offer safety, efficacy, and cost-effectiveness while addressing the unique needs and preferences of patients. Further, advancements in surgical technology, anesthesia techniques, and perioperative care are driving market growth by enabling more complex and specialized surgical procedures across different medical specialties. By 2030, the market is poised

for significant expansion as healthcare providers, payers, and patients increasingly rely on surgical interventions as a critical component of disease management and healthcare delivery.
