Abstracts

The global Teledentistry market size is poised to register 16.07% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Teledentistry market across By Component (Software & Services, Hardware), By Delivery Mode (Cloud-Based, Web-Based), By Application (Tele-Consultation, Remote Patient Monitoring, Education & Training), By End-user (Providers, Patients, Others).

The Teledentistry Market is witnessing growth driven by increasing adoption of digital dentistry solutions and remote dental consultation services, rising demand for oral healthcare access and preventive dental care, and advancements in telecommunication technology and intraoral imaging devices. Teledentistry platforms enable dentists and oral health professionals to remotely assess oral conditions, provide virtual consultations and treatment planning, and offer patient education and preventive care using teleconsultation and telediagnostic tools. Key trends include the development of intraoral cameras and digital scanners for high-resolution imaging and telepresence in remote dental examinations, integration of teledentistry platforms with electronic health records (EHRs) and dental practice management software for seamless workflow integration, and customization of teledentistry solutions for telediagnosis, teletreatment, and telemonitoring of dental conditions. Additionally, increasing adoption of telehealth

solutions in dental clinics and mobile dental units, expansion of teledental networks and teledentistry referral networks, and regulatory approvals for new teledentistry technologies contribute to market expansion.
