Abstracts

2020 Tinnitus PIPELINE HIGHLIGHTS

Tinnitus is one of the widely researched conditions during 2020 with 8 companies actively focusing on realizing pipeline's potential. Development of Tinnitus medicines is identified as integral to the strategy of the majority of companies operating in the industry.

Global Tinnitus market presents promising new product pipeline with NME Projects, pivotal trials, and rapidly phase-advancing therapeutic candidates. Increasing number of companies are assessing the feasibility of developing treatment options for Tinnitus.

Good progress is anticipated during 2020 and 2021 with Tinnitus pipeline molecules advancing from pre-clinical investigation to completion of advanced Phase clinical trials. Tinnitus pipeline continues to expand and progress with novel mechanisms and diverse routes of administration being tested by companies.

Tinnitus DRUG DEVELOPMENT PIPELINE OVERVIEW

The "Tinnitus pipeline Research Monitor, 2020" report is an analytical research study on the progress achieved by pipeline companies during the year along with its historical development, current status, and outlook.

This Tinnitus pipeline review explores high-potential early to late-stage pipeline projects with a continued focus on new insights, accelerated processes, and pipeline progression.

The competitive intelligence report on Tinnitus presents detailed insights into therapeutic drug pipeline development, industry news, deals, and analysis across the length and breadth of the Tinnitus pipeline. Information on R&D pipeline updates, results of key clinical trials are also included in the report.

Tinnitus DRUG PROFILES

Tinnitus development pipeline including projects in early- and late-stage development are detailed in the report. Details of clinical trial data and submissions to regulatory authorities are also provided. For the drug candidates included in the report, the following information is provided-

Current Status of Development including phase advancements, regulatory approvals of phases, acquisitions, licensing and technology transfers, product launches in various markets, and others.

Phase of development

Mechanism of Action

Route of Administration

Companies involved including originator, licensing companies, developer, investors, and others

New molecular entity details

Orphan drug designation and other special status provided by regulators

Tinnitus COMPANY PROFILES

Both small size and large size pharmaceutical companies are investing their resources in Tinnitus drug development operations. Further, financial institutions are extending support to small pharmaceutical companies, universities, and other researchers for the development of treatment of Tinnitus. Partnerships and acquisitions are also increasingly observed in the pipeline.

This research report presents an analysis of 8 Tinnitus companies including company overview, key snapshot, contact information, and their strategies on accelerating Tinnitus pipeline development. Mid-stage and early portfolios of these companies are analyzed in detail in the report.

Companies analyzed in the report include- AudioCure Pharma GmbH, Auris Medical Holding AG, Autifony Therapeutics Ltd, Cognosetta Inc, Gateway Biotechnology Inc,

Knopp Biosciences LLC, Otonomy Inc, Sensorion SA

REASONS TO BUY

The current market conditions are forcing companies and investors worldwide to prioritize their investments and accelerate pipeline candidates only through careful quantitative assessment.

This research work assists decision makers in pharmaceutical companies towards successful pipeline development through critically evaluated pipeline data

Buyers can identify most promising drug candidates for treatment of Tinnitus

It allows users to strengthen their pipeline through acquisitions, licensing and collaborations

Users can estimate possible delays in the delivery of pipeline or launch of new products

Stay ahead of competition through understanding their pipeline progression, strategies and outlook

The report details all the pipeline candidates under investigation in various stages of development from Phase I through to Phase III to enable business development managers to understand the impact of new launches.

Optimize your licensing and technology transfer strategies through identification of prospect partners

Contents

1. INTRODUCTION TO TINNITUS

- 1.1 Tinnitus- Disease overview
- 1.2 Tinnitus- Market Size
- 1.3 Tinnitus- Companies Involved

2. TINNITUS PIPELINE SNAPSHOT- 2020

- 2.1 Tinnitus Pipeline by Phase
- 2.2 Tinnitus Pipeline by Mechanism of Action
- 2.3 Tinnitus Pipeline by Route of Administration
- 2.4 Tinnitus Pipeline- New Molecular Entities
- 2.5 Tinnitus Pipeline- Orphan Drug Designation/ Special Designation

3. TINNITUS DRUG PROFILES

- 3.1 Current Status
- 3.2 Tinnitus Drug Snapshot
- 3.3 Tinnitus Therapeutic Candidates- Originator/Licensors
- 3.4 Route of Administration
- 3.5 Mechanism of Action
- 3.6 NME
- 4.1 AudioCure Pharma GmbH Tinnitus Pipeline Insights and Clinical Trials
- 4.2 Auris Medical Holding AG Tinnitus Pipeline Insights and Clinical Trials
- 4.3 Autifony Therapeutics Ltd Tinnitus Pipeline Insights and Clinical Trials
- 4.4 Cognosetta Inc Tinnitus Pipeline Insights and Clinical Trials
- 4.5 Gateway Biotechnology Inc Tinnitus Pipeline Insights and Clinical Trials
- 4.6 Knopp Biosciences LLC Tinnitus Pipeline Insights and Clinical Trials
- 4.7 Otonomy Inc Tinnitus Pipeline Insights and Clinical Trials
- 4.8 Sensorion SA Tinnitus Pipeline Insights and Clinical Trials

5. TINNITUS MARKET NEWS AND UPDATES

6. APPENDIX

- 6.1 Sources and Methodology
- 6.2 Contact Information
