Abstracts

The global Toxicity Testing Outsourcing market size is poised to register 9.31% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Toxicity Testing Outsourcing market across By Method (In vitro, In vivo), By GLP (GLP, Non-GLP), By End-user (Pharmaceutical and Biopharmaceutical Companies, Academic and Research Institutes, Others).

The Toxicity Testing Outsourcing Market is experiencing rapid expansion driven by the increasing regulatory scrutiny and the growing need for cost-effective and specialized toxicology services in drug development. Key trends shaping its future include the outsourcing of toxicity testing services to contract research organizations (CROs) and academic institutions with expertise in in vitro and in vivo toxicology assays, the utilization of alternative testing methods such as organ-on-chip and computational modeling to enhance predictive toxicology, and the integration of toxicology testing into early-stage drug discovery workflows for more informed decision-making. Moreover, factors such as the rising complexity of drug candidates and the pressure to reduce time-to-market are expected to drive market growth in 2024 and beyond.
