Abstracts

The global Ureteral Stents market size is poised to register 5.59% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Ureteral Stents market across By Material (Metallic Ureteral Stents, Polymer Ureteral Stents), By Application (Kidney Stones, Kidney Transplantation, Tumors, Urinary Incontinence, Others).

The Ureteral Stents Market is experiencing growth propelled by increasing prevalence of urological disorders, advancements in stent design and materials, and rising demand for minimally invasive urological procedures. Ureteral stents are medical devices used to maintain patency and drainage of the ureter, typically inserted to treat ureteral obstruction, kidney stones, or after urological surgery. Key trends include the development of biocompatible and drug-eluting stents to reduce discomfort and prevent biofilm formation, the introduction of advanced imaging modalities for precise stent placement, and the customization of stent designs for specific anatomical requirements and patient preferences. Moreover, increasing adoption of ureteral stents in ambulatory and outpatient settings, expansion of urology clinics and surgical centers, and technological innovations in stent deployment techniques contribute to market growth.
