Abstracts

The global Veterinary Care market size is poised to register 6.1% growth from 2024 to 2032, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Veterinary Care market across By Animal (Companion Animal, Production Animal), By Type of Care (Primary, Emergency, Critical, Specialty services)

With the increasing human-animal bond and the growing awareness about pet health and wellness, there is a rising demand for comprehensive veterinary care services to provide preventive care, diagnostics, treatment, and surgery for companion animals and livestock. Market growth is driven by factors such as expanding pet insurance coverage, the adoption of advanced medical technologies in veterinary practice, and the rising expenditure on pet healthcare. Additionally, the expanding role of veterinary professionals in public health, food safety, and zoonotic disease surveillance contributes to market expansion. Further, the development of specialized veterinary clinics and hospitals, the emergence of telemedicine and remote consultation services, and the emphasis on personalized and integrated veterinary care are expected to further accelerate market growth in the coming years.
