Abstracts

The global Veterinary Healthcare market size is poised to register 7.2% growth from 2024 to 2032, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Veterinary Healthcare market across By Product (Therapeutics, Diagnostics), By Animal (Dogs and Cats, Horses, Ruminants, Swine, Poultry, Others)

With the increasing focus on animal welfare and the growing demand for pet healthcare services, there is a rising need for veterinary products and services to prevent, diagnose, and treat animal diseases and injuries. Market growth is driven by factors such as expanding pet ownership and human-animal bonds, the rising awareness about zoonotic diseases and food safety, and technological advancements in veterinary diagnostics and therapeutics. Additionally, the expanding applications of veterinary healthcare in companion animal medicine, livestock production, and wildlife conservation, as well as the growing adoption of preventive care and wellness programs, contribute to market expansion. Further, the development of novel vaccines and pharmaceuticals for emerging infectious diseases, the integration of digital health and telemedicine solutions for remote consultations and monitoring, and the emphasis on One Health approaches to address health challenges at the human-animal-environment interface are expected to further propel market growth in the coming years.
