Abstracts

The global Veterinary Orthopedics market size is poised to register 7.55% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Veterinary Orthopedics market across By Application (TPLO, TTA, Joint Replacement, Trauma, Others), By Product (Implants, Instruments), By Animal Type (Canine, Feline, Others), By End-user (Veterinary Hospitals & Clinics, Others).

The Veterinary Orthopedics Market is experiencing growth propelled by increasing pet ownership, rising demand for veterinary specialty services, and advancements in orthopedic surgical techniques and implants. Veterinary orthopedics involves the diagnosis and treatment of musculoskeletal disorders and injuries in companion animals and livestock, including fractures, ligament tears, and joint diseases. Key trends include the development of minimally invasive orthopedic procedures such as arthroscopy and minimally invasive fracture repair, the introduction of novel orthopedic implants and biomaterials for improved biocompatibility and long-term outcomes, and the utilization of advanced imaging modalities such as CT and MRI for precise diagnosis and treatment planning. Additionally, expanding pet insurance coverage, growing investments in pet healthcare infrastructure, and increasing pet humanization trends contribute to market growth.
