Abstracts

The global Veterinary Pain Management market size is poised to register 6.2% growth from 2024 to 2032, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Veterinary Pain Management market across By Drug (NSAIDS, Opioids, Local anaesthetics, Alpha-2 agonists, Disease-modifying osteoarthritis agents, Others), By Route of Administration (Oral, Parenteral, Topical), By Device (Laser Therapy Device, Electromagnetic Device), By Application (Joint Pain, Cancer Pain, Postoperative Pain, Others), By Animal (Companion Animal, Livestock Animal), By End-User (Veterinary Hospitals, Veterinary Clinics, Pharmacies and Drug Store)

With the increasing recognition of pain in animals and the growing demand for compassionate and effective pain relief, there is a rising need for veterinary pain management products and services to alleviate pain and improve quality of life in

animals. Market growth is driven by factors such as expanding pet ownership, the rising awareness about animal welfare and pain assessment, and technological advancements in pain management drugs and therapies. Additionally, the expanding applications of multimodal analgesia, acupuncture, and physical rehabilitation in veterinary practice, as well as the rising demand for personalized pain management plans and client education, contribute to market expansion. Further, the development of novel analgesic drugs and delivery systems, the adoption of evidence-based pain assessment tools and treatment protocols, and the emphasis on interdisciplinary collaboration and pain prevention are expected to further accelerate market growth in the coming years.
