## **Abstracts**

The global Video Laryngoscope market size is poised to register 12.16% growth from 2024 to 2030, presenting significant growth prospects for companies operating in the industry. The industry study analyzes the global Video Laryngoscope market across By Product (Rigid, Flexible), By Usage (Reusable, Disposable), By Device Type (Cart based, Handheld), By End-user (Pre-Hospital, In-Hospital, Others).

The Video Laryngoscope Market is witnessing growth driven by increasing demand for advanced airway management devices, improvements in intubation success rates, and expanding applications of video-assisted laryngoscopy in emergency and critical care settings. Video laryngoscopes are medical devices used to visualize the larynx and guide endotracheal tube placement during intubation procedures, incorporating a camera and display system for enhanced visualization of the airway anatomy. Key trends include the development of portable and handheld video laryngoscopes for rapid and reliable intubation in diverse clinical environments, the integration of high-definition imaging and wireless connectivity features for real-time video transmission and documentation, and the customization of laryngoscope blade designs for different patient anatomies and intubation scenarios. Additionally, increasing adoption of video laryngoscopy in difficult airway management, expansion of airway management training programs, and regulatory approvals for video laryngoscope systems contribute to market expansion.
