## **Abstracts**

As the global chemicals industry is at the onset of the recovery phase, companies are focusing on identifying and monetizing new opportunities in the industry. The majority of the chemical industries are likely to record volume growth of 4% to 8% in the short term, depending on the chemical sub-segment and product portfolio. A large volume of Xylene companies felt the impact of the COVID-19 pandemic in multiple dimensions and are now emphasizing sustained growth over the long-term future. As the global Xylene and other chemicals industries play a vital role in the economic recovery of countries, Xylene companies are likely to witness potential opportunities in the short term period.

The report is designed for Xylene companies to succeed amid ongoing challenges in the Xylene industry and re-orient their strategies to the new economic, social, environmental, and political expectations. The comprehensive research presents analysis across Xylene market size to identify the right segments to focus on, identify key drivers, challenges, and market trends set to shape the future of global and regional Xylene markets.

From a lower growth trajectory, the current and tenth edition of the global Xylene market size outlook to 2028 estimates the market to register a moderate-to-high growth rate during the forecast period. Xylene Companies are emphasizing launching new products and solutions, modestly reducing R&D budgets, constant monitoring on Xylene market trends, systematic approaches to investment/divestment, carefully launching marketing strategies, strengthening long-term contracts, increased M&A, and others.
