## Abstracts

The new report from LeadingMarketResearch.com contains 1,954 pages, 824 tables and provides market segmentation analysis of over 100 diseases and viruses in seven countries, assessment of emerging technologies, review of current instrumentation, as well as strategic profiles of leading suppliers and recent market entrants with innovative technologies and products.

### Rationale

This comprehensive seven-country report is designed to assist diagnostics industry executives, as well as companies planning to diversify into the dynamic and rapidly expanding microbiology testing market, in evaluating emerging opportunities and developing effective business strategies.

The microbiology testing market is one of the most rapidly growing segments of the in vitro diagnostics industry, and the greatest challenge facing suppliers. Among the main driving forces is continuing spread of AIDS, which remains the world's major health threat and a key factor contributing to the rise of opportunistic infections; threat of bioterrorism; advances in molecular diagnostic technologies; and wider availability of immunosuppressive drugs.

Although for some infections the etiology is still a mystery, while for others the causative microorganisms are present in minute concentrations long before the occurrence of first clinical symptoms, recent advances in genetic engineering and detection technologies are creating exciting opportunities for highly sensitive, specific and cost-effective products.
