Abstracts

This unique report from LeadingMarketResearch.com provides information and analysis not available from any other published source.This comprehensive seven-country report is designed to help current suppliers and potential market entrants identify and evaluate business opportunities emerging in the global hematology and flow cytometry markets during the next five years.The report is available by section, and can be customized to specific information needs and budget.The report explores business and technological trends in the US, Europe (France, Germany, Italy, Spain, UK) and Japan provides market share estimates, test volume forecasts, and instrument placements; compares features of major analyzers; profiles leading competitors and emerging market entrants; and suggests specific product and marketing opportunities facing suppliers.RationaleDuring the next five years, continued advances in molecular diagnostics, monoclonal antibodies, lasers and IT, as well as growing understanding of immunologic forces regulating systemic diseases, will have a profound impact on the hematology and flow cytometry markets worldwide. New molecular diagnostic and monoclonal antibody tests will facilitate existing procedures and provide basis for sensitive, specific and simple assays. The introduction of smaller and easy-to-operate

laser systems will further expand applications of flow cytometry to routine clinical laboratories. Further advances in IT will reduce the cost of instrument manufacture, service warranty, and permit development of self-troubleshooting, autocalibration and other advanced features. Presently tedious analyses of chromosomal abnormalities, DNA content, and lymphocyte subsets will become more automated and routine.Hematology TestsCBC + 5-Part Differential, Manual Differential/Review, Hematocrit (Automated, Manual), Hemoglobin (Automated, Manual), Sedimentation Rate, Reticulocytes, WBC (Automated, Manual), Platelets (Automated, Manual), Bone Marrow Analysis, RBC, Eosinophils.Flow Cytometry TestsCell Surface Markers (CD4/CD8/T&B Lymphocytes, CD34, Others), Chemotherapy Monitoring (Leukemia/Lymphoma, Others), HLA Typing, Sperm Analysis, Cell Cycle Kinetics, Cell Function Testing, Chromosomal Abnormalities, Fetal Cell Analysis, Granulocyte Function, Receptor DNA/RNA Analysis, Cell Culturing.Sales and Market Share AnalysisSales and market shares of major instrument and reagent suppliers.Geographic Coverage France, Germany, Italy, Japan, Spain, UK, USACompetitive AssessmentsExtensive strategic profiles of major suppliers and emerging market entrants.Market Segmentation AnalysisSales and market share estimates for leading suppliers of hematology and flow cytometry products by country.Test and sales forecasts for over 40 procedures by country, individual test and market segment:HospitalsCommercial/Private Laboratories Ambulatory Care CentersPhysician Offices/Group PracticesCurrent and Emerging ProductsAnalysis of current and emerging hematology and flow cytometry testsReagent and instrument sales forecasts by market segmentInstrument placements and installed base by manufacturer and modelSales and market shares of reagent and instrument suppliersTechnology ReviewAssessment of current and emerging technologies, and their potential market applications.Comprehensive lists of companies developing or marketing new technologies and products by test.Worldwide Market OverviewFacilities performing hematology and flow cytometry testing by country.Test volume and sales projections by country.Strategic RecommendationsNew product development opportunities with significant market appeal.Alternative market penetration strategies.Potential market entry barriers and risks.
