Abstracts

This report provides assessments of such technologies as molecular diagnostics, monoclonal and polyclonal antibodies, immunoassays, microtitration plates, IT, lasers, synthetic red cell substitutes, genetically engineered blood components, blood preservation, autologous blood transfusion/freezing and their potential applications for blood banking. The report also presents strategic assessments of current and emerging suppliers of blood banking products, including their sales, product portfolios, marketing tactics, technological know-how, new products in R&D, collaborative arrangements, and business strategies.
