## **Abstracts**

This new 98-country report from LeadingMarketResearch.com is available by region, country, market segment, section, or individual test. The report is available by section, and can be customized to specific information needs and budget.

The report provides a granular strategic analysis of over 100 clinical chemistry, TDM, endocrine, cancer, immunoprotein and abused drug assays performed in both centralized (hospitals, commercial laboratories), and POC/decentralized locations. The report explores future market trends; forecasts specimen, test and sales volume; estimates sales and market shares of key suppliers in major countries; compares features of leading analyzers; profiles key competitors; and identifies specific product and marketing opportunities for reagent and instrument suppliers.

### Rationale

Clinical chemistry and immunoassay markets are undergoing significant transformation, caused by convergence of new and more stringent regulations; advances in diagnostic

technologies, system engineering, automation, and IT; and intensifying competition. Some segments, like routine chemistry, are already resembling commodity markets, where product positioning and cost per test are more critical than underlying technology. This evolving marketplace creates exciting opportunities for a variety of new instruments, reagent systems, and auxiliary products, such as specimen preparation devices, controls, and calibrators.
