Abstracts

During the next decade, the immunoprotein testing market will undergo significant transformation. The changes will be caused by convergence of new and more stringent regulations; advances in diagnostic technologies, system engineering, automation, and IT; and intensifying competition. Some segments will start resembling commodity markets, where product positioning and cost per test are more critical than underlying technology. This evolving marketplace will create exciting opportunities for a variety of new instruments, reagent systems, and auxiliary products, such as specimen preparation devices, controls, calibrators and others.

"Immunoprotein Diagnostics Market: US, Europe, Japan" is a unique worldwide market and technology assessment designed to help current suppliers and potential market entrants identify and evaluate emerging opportunities and developed effective strategic responses. The study explores future trends in the U.S., Europe, Japan; provides test volume and sales forecasts by country, market segment and individual test; compares features of leading analyzers; and profiles key competitors.

Contains 297 pages and 62 tables.
