Abstracts

This unique 1,115-page report contains 450 tables, and provides sales and market shares of leading reagent and instrument suppliers, as well as test volume and sales forecasts for 100 chemistry, TDM, endocrine, cancer, immunoprotein and abused drug assays, calibrators and controls. Available by country and section. This unique worldwide market intelligence and technology assessment report will help current suppliers and potential market entrants identify and evaluate emerging opportunities and develop effective strategic responses. The report explores future trends in the U.S., five major European countries (France, Germany, Italy, Spain, UK) and Japan; provides estimates of the specimen, test and sales volumes, as well as major suppliers' sales and market shares; compares features of leading analyzers; profiles key competitors; and identifies specific product and marketing opportunities emerging during the next ten years. The clinical chemistry and immunodiagnostics markets are undergoing significant transformation, caused by convergence of new and more stringent regulations; advances in diagnostic technologies, system engineering, automation, and IT; and intensifying competition. Some segments, like routine chemistry, begin to resemble commodity markets, where product positioning and cost per test are more critical than underlying technology. This evolving marketplace creates exciting opportunities for a variety of new instruments, reagent systems, and auxiliary products, such as specimen preparation devices, controls, and calibrators.
