## Abstracts

This new 233-page report from VPGMarketResearch.com provides analysis of the Italian immunoprotein diagnostic market, including emerging tests, technologies, instrumentation, sales forecasts, market shares, and strategic profiles of leading suppliers.

The report provides test volume and sales forecasts by market segment for the following assays: C3C4Free Light ChainsHaptoglobinIgAIgE Specific IgE TotallgGlgMImmunofixationPrealbuminProtein Electrophoresis

During the next five years, the immunoprotein testing market will undergo significant transformation. The changes will be caused by convergence of new and more stringent regulations; advances in diagnostic technologies, system engineering, automation, and IT; and intensifying competition. Some segments will start resembling commodity markets, where product positioning and cost per test are more critical than underlying technology. This evolving marketplace will create exciting opportunities for a variety of new instruments, reagent systems, and auxiliary products, such as specimen preparation devices, controls, calibrators and others.

This report is a unique market and technology assessment designed to help current suppliers and potential market entrants identify and evaluate emerging opportunities and developed effective strategic responses. The study explores future trends; provides test volume and sales forecasts by market segment and individual test; compares features of leading analyzers; and profiles key competitors.
