Abstracts

LEXINGTON, Massachusetts (August 6, 2014) – WinterGreen Research announces that it has published a new study Business Document Work Process Management (BPO): Market Shares, Strategy, and Forecasts, Worldwide, 2014 to 2020. The 2014 study has 416 pages, 187 tables and figures. Worldwide markets are poised to achieve significant growth as the cloud computing utility infrastructure and the smart phone communications systems for apps are put in place, continuing to drive the use of electronic document replacement of all paper documents.

Xerox dominates business document work process management (BPO).

Work document processing represents digitization of paper documents. The techniques for document management, content management of unstructured data can be applied to the paper documents once they are digitized. Analytics can then be applied to the information contained in the documents. From time to time the documents can be input into a database and handled as structured data in tables.

Outsourcing services provide solutions for business document work process management (BPO). As more electronic forms are created, documents are becoming increasingly electronic. They still need to be used in a variety of ways. Medical records provide some significant challenges to protect patient identity.

Scanners have been used to convert paper documents to electronic formats. Production level scanners are rated at 8,000 pages per day. Optical Character Recognition (OCR) is the term applied to re-purposing functions. Hardware that is necessary to make document work process automation possible has become commoditized. Software and

services are used to implement a solutions based competitive environment.

Document work process market driving forces relate to the shift to IT integrated systems management of electronic information. Paper and electronic document processing is set to move to web site and electronic document management.

As paper documents become less used and converted to electronic forms from the outset, document work process markets are set to grow. Hardware scanners of paper documents have become commodity units as at the same time paper is being replaced by electronic forms. Software is dominating the document work process industry. As tablets and smart phones proliferate, electronic forms available as apps are not far behind. With the advent of apps and sophisticated software, document work process shifts to an all-electronic business.

Not that the paper has gone away, but it is not the problem that it was ten years ago. Electronic forms are easier, more accurate and 100% available as every person who is not an infant gets a smart phone in the next five years.

This makes the document solutions more a question of moving data from devices to the back end and managing unstructured content to achieve extraction of potentially structured data from the document than of handling paper.

Paper document imaging is one driving force in the market. Managed print services and electronic process management are aspects of electronic document processing. Forms recognition, data extraction, and data release into upstream systems represent the future of the document work process industry.

Scanning is referred to as digital imaging, is a process whereby a paper document is turned into an electronic image or electronic characters. Digital imaging performs optical character recognition (OCR) processes upon digital images following scanning. ... Document arrangement: Prior to scanning, determine the units of store the copies in separate locations-even during the production phase of a scanning.

WORK DOCUMENT PROCESSING EXECUTIVE SUMMARY

Document Work Process Market Driving Forces

Document Work Process Market Driving Forces

Electronic Document Workflow

Paper Document Workflow

Document Workflow Process Market Driving Forces

Document Work Process Market Shares

Electronic Forms App Document Management Market

1. DOCUMENT WORK PROCESSING MARKET DESCRIPTION AND MARKET DYNAMICS

1.1 Document Work Processing

1.1.1 Key Benefits Of Work Document Processing:

1.2 Work Document Processing Market Shares

1.2.1 Globalization And Rapid Technological Innovation

1.3 Role of BPO

1.4 Increased Competition And Regulation

1.5 Outsourcing Industry Maturing

1.5.1 Team Building as Outsourcing Industry Matures

1.5.2 BPO Vendor Governance: Mitigating Risks, Improving Outcomes

2. DOCUMENT WORK PROCESSING MARKET SHARES AND MARKET FORECASTS

2.1 Document Work Process Market Driving Forces

2.1.1 Document Work Process Market Driving Forces

2.1.2 Electronic Document Workflow

2.1.3 Paper Document Workflow

2.1.4 Document Workflow Process Market Driving Forces

2.2 Document Work Process Market Shares

2.2.1 Xerox Information Technology Outsourcing

2.2.2 Xerox Document Outsourcing

2.2.3 Xerox Entry

2.2.4 Hewlett Packard

2.2.5 Banktec

- 2.2.6 Document Workflow Process In House Solution Market Segments, Dollars, 2013
- 2.2.7 Document Workflow Process Business Process Outsourcing BPO Solutions
- 2.3 Document Work Process Market Forecasts
 - 2.3.1 Inhouse Paper Document Management
 - 2.3.2 Document Process Outsourcing Market Forecasts
 - 2.3.3 Electronic Forms App Document Management Market
 - 2.3.4 Document Sorting and Indexing Software Market Participants
- 2.4 Document Work Process Market Prices
- 2.5 Document Work Process Regional Market Analysis

3. WORK DOCUMENT PROCESSING PRODUCT DESCRIPTION

- 3.1 Xerox Document Work Process Automation
 - 3.1.1 Xerox Document Outsourcing
 - 3.1.2 Xerox Managed Print Services (MPS):
 - 3.1.3 Xerox Centralized Print Services (CPS):
 - 3.1.4 Xerox Document Technology Segment
 - 3.1.5 Xerox Entry
 - 3.1.6 Xerox Mid-Range
 - 3.1.7 Xerox FreeFlow Core to Automate Workflows at the High-End
 - 3.1.8 Xerox Industry-Leading Product Lineup
- 3.2 Eastman Kodak Records Modernization Using Work Process Roadmap for Technology
 - 3.2.1 Eastman Kodak Government Records Modernization
- 3.3 Banctec
 - 3.3.1 Banctec Customers
 - 3.3.2 Banctec Client Relationships Provide Domain And Process Expertise¹²³
 - 3.3.3 Banctec Document Workflow Process Markets Have Strong Barriers to Entry.
 - 3.3.4 Banktec Lowered Operational Costs For Clients By Providing A Full Inbound Mail Solution
- 3.4 Synnex / Concentrix
 - 3.4.1 Concentrix Aligning A Customer
 - 3.4.2 Concentrix Customer Engagement
 - 3.4.3 Concentrix Engages Customer Support
 - 3.4.4 Concentrix Engages During Renewal
 - 3.4.5 Concentrix Innovative Solutions
- 3.5 IBM Document Processing
 - 3.5.1 IBM Global Process Services
 - 3.5.2 IBM Predictive Analytics To Understand What Could Happen

- 3.5.3 IBM Document Workflow Process State
- 3.5.4 IBM Document Routing Analytics Functions
- 3.5.5 IBM DB2 Content Manager Maps for Document Routing
- 3.5.6 IBM DB2 Content Manager Work List
- 3.5.7 IBM Document Routing Process
- 3.5.8 IBM Business Process Manager Advanced for z/OS
- 3.6 Fujitsu
 - 3.6.1 Fujitsu Interstage
 - 3.6.2 Fujitsu Automated Process Discovery
 - 3.6.3 Fujitsu Interstage Application Server

About

According to the principal author Susan Eustis, “Business document work process management (BPO) supports providing a platform for use by IT. Systems are implemented in a market marked by converged paper and electronic information that needs to be converted to electronic data. Business document work process (BPO) sits on widely dispersed resources that are heterogeneous. IT resources are heterogeneous because each business seeks to utilize technology that is best of breed for solving the particular set of competitive situations they address. This creates a variety of solutions in each business.”

Business Document Work Process Management (BPO) market size at \$6.5 billion in 2013 is anticipated to reach \$13.6 billion by 2020. Significant growth is driven by the transition to electronic documents and the continuing need to merge the information contained in paper documents with server information, smart phone information, and social media information. Cloud computing market penetration is providing a thrust for creating electronic formatting of information contained on paper.

With smart phones beginning to get significant uptake all over the world. With smart phone and tablet ubiquity, electronic documents are rapidly replacing paper documents. Electronic documents are expected to be replacements for all paper.

Growth of business document work process management (BPO) is a result of IT department efforts to reduce spending on run time, gaining the effect of more hires by decreasing operating costs. Work process efficiency delivers more efficient automated process. BPO enables IT to spend a higher proportion of the budgets on growing the business.

Stacks of decoupled services are purpose built for the enterprise environment that is continuously shifting because of mergers and acquisitions. With decoupled software solutions, the web services and the SOA components can be portable, enhancing the move away from paper documents.

WinterGreen Research is an independent research organization funded by the sale of market research studies all over the world and by the implementation of ROI models that are used to calculate the total cost of ownership of equipment, services, and software. The company has 35 distributors worldwide, including Global Information Info Shop, Market Research.com, Research and Markets, Electronics.CA, Bloomberg, and

Thompson Financial.

WinterGreen Research is positioned to help customers face challenges that define the modern enterprises. The increasingly global nature of science, technology and engineering is a reflection of the implementation of the globally integrated enterprise. Customers trust WinterGreen Research to work alongside them to ensure the success of the participation in a particular market segment.

WinterGreen Research supports various market segment programs; provides trusted technical services to the marketing departments. It carries out accurate market share and forecast analysis services for a range of commercial and government customers globally. These are all vital market research support solutions requiring trust and integrity.
