WinterGreen Research announces that it has a new study on Cloud Middleware Market Strategies, Market Shares, and Market Forecasts, 2011-2017. IBM middleware has set the standard for cloud architecture. IBM SOA services oriented architecture is the base for enterprise cloud initiatives leveraging middleware to implement the cloud.

The 2011 study has 928 pages and 274 tables and figures. Worldwide markets are poised to achieve significant growth as globally integrated enterprises worldwide move to implement more cost efficient IT systems. Transaction process and Internet workload computer processing delivery modalities depend on the efficiencies of scale achievable using cloud computing.

Vendors are building out localized distribution networks that support a cloud computing systems in a local environment, leveraging cloud middleware, providing remote control of systems and implementation of self-provisioned architecture. SOA, services oriented architecture becomes a core capability of cloud middleware, permitting rapid response to changing market conditions.

The market for cloud computing middleware software is dominated by IBM which has managed to develop a dominant presence in cloud computing middleware. The IBM Websphere SOA, services oriented architecture is a defacto industry standard for cloud computing.

While cloud computing markets overall are intensely competitive, middleware markets have been captured by IBM. Cloud computing is characterized by rapidly changing technology, evolving industry standards and frequent new product and service installations. Competition for cloud services is increasing.

Existing competitors and new market entrants dominate the market for cloud computing. Cloud computing middleware software companies compete primarily on the basis of performance and robust feature sets.

Hybrid computing challenges relate to achieving breakthroughs that reduce costs of IT infrastructure. Next generation application server solutions implement new technologies. These challenge traditional architectural approaches, and depend on virtualization of the large enterprise servers.

IBM zEnterprise solution implementation of zOS, zVM, and zBX represent breakthrough technologies for Cloud middleware line of business (LoB) application server development and test markets. The IBM zEnterprise solution represents a quantum improvement in data center computing. Companies that have adopted virtualized systems have achieved significant competitive advantage. The server that automates services in the cloud is a technological breakthrough, depending on cloud middleware to achieve integration.

The systems leverage virtualized technology that has been around for 50 years, is fully vetted. Cloud middleware adds a new dimension to the virtualized hardware, creating low cost systems implementations ready for prime time. Now that the virtual systems cost structures are more approachable, due to economies of scale, there are many more uses for cloud middleware than has been true in the past.

The use of an enterprise server in the line of business provides the ability to host application servers in a virtualized environment with 1500 images on one large enterprise server board. This is the only route to systems capability.

SOA provides an alphabet for cloud based IT systems. SOA provides components that can be glued together in infinite numbers of ways to achieve new functions and new possibilities for software applications implementation.

According to Susan Eustis, primary author of the study, 'cloud computing implements a pay as you go model, the ability to launch applications from the line of business, self-provisioning capabilities, and support for growth through innovation. Growth is spurred by increasingly flexible tools, better control of development teams, and the ability to control software development better.'

Cloud middleware systems markets at \$1.5 billion in 2010 are forecast to reach \$4.3

billion dollars, worldwide by 2017. Cloud computing middleware represents the base for development of all cloud computing infrastructure as it supports systems integration and systems self-provisioning.

Business Process Management Market Shares
Business Process Management (BPM) Market Forecasts
BPM Targeted Solution Frameworks, Embedding
Agile Project Management Features
Collaboration Key To BPM Program Success

1. BUSINESS PROCESS MANAGEMENT (BPM) MARKET DEFINITION AND MARKET DYNAMICS

- 1.1 Business Process Management Defines How An Enterprise Operates
 - 1.1.1 BPM Process Modeling
 - 1.1.2 BPM Targeted Solution Frameworks, Embedding Agile Project Management Features
 - 1.1.3 Collaboration Key To BPM Program Success
 - 1.1.4 BPM Acquisitions
- 1.2 Business Process Management Platforms
 - 1.2.1 Comprehensive Risk Analysis
- 1.3 Business Process Management Functions
 - 1.3.1 Execution of Business Processes
 - 1.3.2 Integration Aspects of BPM
 - 1.3.3 BPM Supports Overlapping Systems
 - 1.3.4 SOA/B2Bi Systems
 - 1.3.5 A Comprehensive BPM Platform
- 1.4 BPM Web Services
 - 1.4.1 A Business Process Monitoring, Analysis and Control Platform
- 1.5 Web 2.0 Internet Scale Mainstream Applications
 - 1.5.1 Web 2.0 Design Patterns
 - 1.5.2 Data is t Next for Web 2.0
 - 1.5.3 Network Effects
 - 1.5.4 Collaboration
 - 1.5.5 Social Networking Heuristics
 - 1.5.6 Wiki-Style Collaborative Editing
- 1.6 Core Competencies of Web 2.0
- 1.7 Web 2.0 Next Generation Applications

- 1.8 Web 2.0 Impact On Business Environment
 - 1.8.1 Web 2.0 Corporate and Marketing Communications
- 1.9 Blogging
 - 1.9.1 Architecture of Participation
 - 1.9.2 Permalink Functionality
- 1.10 Organization Central To BPM Strategy
 - 1.10.1 Organizational Changes

2. BUSINESS PROCESS MANAGEMENT (BPM) MARKET SHARES AND MARKET FORECASTS

- 2.1 Business Process Management Market Driving Forces
- 2.2 Business Process Management Market Shares
 - 2.2.1 IBM Business Process Management (BPM)
 - 2.2.2 Oracle
 - 2.2.3 Microsoft Biz Talk Server
 - 2.2.4 Adobe
 - 2.2.5 Tibco Dynamic BPM
 - 2.2.6 Tibco BPM
 - 2.2.7 Progress Software Savvion BusinessManager
 - 2.2.8 PNMsoft
 - 2.2.9 Fujitsu
 - 2.2.10 PegaSystems
 - 2.2.11 PegaSystems Recognized Industry Leader
 - 2.2.12 HandySoft
 - 2.2.13 Newgen Software Automates Key Processes
 - 2.2.14 Polymita
 - 2.2.15 Global
 - 2.2.16 Fabasoft
 - 2.2.17 Singularity
 - 2.2.18 EMC
 - 2.2.19 OpenText Metastorm Business Process Management (BPM)
- 2.3 Business Process Management (BPM) Market Forecasts
 - 2.3.1 Business Process Management (BPM) Market Industry Segments, i. BPM Systems Provide A Complete View Of ii. End-To-End Business Processes
 - 2.3.3 Automation of Business Process
 - 2.3.4 Linked BPM and SOA
 - 2.4 Quantities of Information to be Managed
- 2.5 Business Process Management (BPM) Regional Market Segments

3. BUSINESS PROCESS MANAGEMENT (BPM) PRODUCT DESCRIPTION

3.1 IBM Business Process Management (BPM)

3.1.1 IBM Business Process Manager

3.1.2 IBM Business Monitor

3.1.3 IBM WebSphere Business Events

3.1.4 IBM Integration Designer

3.1.5 IBM WebSphere Decision Server

3.1.6 IBM Case Manager
