WinterGreen Research announces that it has a new study on Crystalline Solar Panel Market Shares and Forecasts, Worldwide, 2011-2017. The 2011 study has 651 pages, 220 tables and figures. Crystalline is the largest of three solar energy technology markets. Crystalline is evolving a significant market presence and is expected to continue to be used in very northern or very southern climates where there is less sun. Sophisticated technology that works has achieved grid parity in many places.

Crystalline solar market have been able to grow rapidly because of the ability to capitalize on demand for high efficiency products at low cost per watt. Strong research and development capabilities have enabled development of advanced process technologies and manufacturing economies. The company seeks to operate cost-effectively and on a large scale.

PV cells and modules with high conversion efficiencies are manufactured. Conversion efficiency rates measure the ability of PV products to convert sunlight into electricity. As of December 31, 2010, the average conversion efficiency rates of monocrystalline and multicrystalline silicon PV cells were 17.9% and 15.9%.

An international R&D team of leading solar PV scientists combined with China-based design, development and manufacturing facilities provide several competitive advantages, including access to low-cost engineering expertise, skilled labor and facilities. leverages cost advantages by optimizing the balance between automation and manual operations in manufacturing processes, which lowers operating costs and capital expenditures and enables expanding manufacturing capacity in a cost-effective manner.

Manufacturers continuously evaluate and adjust a combination of automated and manual operations. Innovation in manufacturing processes is used to optimize the cost structure of crystalline solar panels while improving manufacturing yields and quality. In 2010, significantly increased aggregate manufacturing capacity was achieved by a number of vendors to meet strong global demand.

Companies in some cases were able to achieve adding 500 MW of silicon ingot and wafer capacity. Annualized aggregate PV cell manufacturing capacity reached 1,800 MW per annum for vendors.

The worldwide demand for energy is steadily increasing. Demand for energy is doubling every 15 years. The major effort is to sustain growth in the electricity supply without causing irreversible harm to the environment. Solar energy has rapidly grown as a clean, renewable alternative to limited fossil fuels. Recognition of the need to reduce reliance on coal and fossil fuels is driving interest in solar energy.

Growth of solar markets will depend on continued investment in energy infrastructure by governments. When you think about it, there is no better investment government can make than in achieving development of low cost, reliable solar energy. This availability of low cost energy is what makes an economy hum. Some governments are sure to recognize these issues and make the investment, others will not.

According to Susan Eustis, lead author of the study, 'Crystalline solar markets are expected to have continued significant growth. The approach of grid parity worldwide is in sight, many areas have achieved grid parity now over the 25 useful life of the crystalline solar panels. Dynamic growth is anticipated to continue.'

Crystalline solar panel markets at \$28.3 billion in 2010 are set to grow to \$118.4 billion by 2017.

WinterGreen Research is an independent research organization funded by the sale of market research studies all over the world and by the implementation of ROI models that are used to calculate the total cost of ownership of equipment, services, and software. The company has 35 distributors worldwide, including Global Information Info Shop, Market Research.com, Research and Markets, Bloomberg, and Thompson Financial.

MISSION CRITICAL MESSAGING MIDDLEWARE EXECUTIVE SUMMARY

Mission Critical Decoupled Messaging is the Base for Cloud Computing and Collaboration

Mission Critical Messaging Market Shares

Mission Critical Messaging Market Forecasts

1. MISSION CRITICAL MESSAGING MIDDLEWARE MARKET DEFINITION

1.1 Private Cloud Computing Model

1.1.1 IBM WebSphere SOA Open Systems Cloud Foundation

1.1.2 IBM SOA Foundation

1.2 Mission Critical Messaging Products

1.2.1 Mission Critical Middleware Messaging

1.3 Mission Critical Messaging As A Base For Services Oriented Architecture (SOA)

1.4 Mission Critical Messaging As A Base For Secure Application Integration

1.4.1 IBM WebSphere MQ

1.5 OASIS Secure, Reliable Transaction Web Services Messaging Architecture

1.5.1 Reliable Message-Based Web Services Communication

1.6 Mission Critical Middleware Messaging Open Connectivity

1.6.1 Messaging Solutions

1.7 Message Trends

1.8 Mission Critical Messaging Market Dynamics

1.9 SOA Governance Lifecycle

1.9.1 Cloud Model For Consuming And Delivering Business And IT Services

1.9.2 IBM Cloud Computing

1.9.3 IBM Cloud Business Model

1.9.4 Microsoft Cloud Business Model: Private Cloud – Unlimited Virtualization Rights

1.9.5 Comcast Expands Commercial Play With Cloud-Based VoIP, UC offering

2. MISSION CRITICAL MESSAGING MIDDLEWARE MARKET SHARES AND MARKET FORECASTS

2.1 Mission Critical Decoupled Messaging is the Base for Cloud Computing and Collaboration

2.2 Mission Critical Messaging Market Shares

2.2.1 IBM WebSphere MQ

2.2.2 .NET MSMQ from Microsoft

2.2.3 Tibco Transport Layer

2.3 Mission Critical Messaging Market Forecasts

2.3.1 Worldwide Mission Critical Messaging Dollar Shipments Analysis

2.3.2 Worldwide Mission Critical Messaging Unit Shipments

2.3.1 Worldwide Mission Critical Messaging Installed Units

2.3.2 SOA Integration Of E-Business

2.3.3 Market Driving Forces For Real Time Exchange of Information

2.3.4 Mission Critical Messaging Growth Factors

2.3.5 Backbone Connectivity Across All Platforms with Open Systems

2.3.6 Worldwide Mission Critical Messaging Unit Shipments

2.3.7 Worldwide Backbone Connectivity

2.3.8 Distributed Messaging Markets

2.3.9 Database Messaging Market Forecasts

2.3.10 IBM DB2R Integrates With IBM MQ Messaging For Database Applications

2.3.11 Software AG Database Products Integrated With Tibco

2.3.12 NET Microsoft Web Services

2.3.13 Publish Subscribe Messaging Forecasts

2.3.14 JMS Messaging

2.3.15 SCADA Messaging

2.3.16 Open Systems Backbone Connectivity Across Platforms/Messaging Integrated Across Microsoft

2.4 Mission Critical Messaging Regional Analysis

3. MIDDLEWARE MESSAGING PRODUCT DESCRIPTION

3.1 IBM Middleware Messaging Foundation Technology for Cloud and Collaboration

3.1.1 IBM WebSphere MQ Messaging Backbone Foundation For SOA Connectivity

3.1.2 IBM WebSphere MQ

3.1.3 IBM WebSphere MQ

3.1.4 IBM WebSphere MQ Assured Delivery Functions

3.1.5 IBM WebSphere MQ

3.1.6 IBM WebSphere MQ Telemetry Capabilities

3.1.7 IBM WebSphere MQ Support For Growth

3.1.8 IBM WebSphere MQ Reliable File Transfer

3.1.9 IBM WebSphere MQ Integration File Transfer Business Value

3.1.10 IBM WebSphere MQ Clustering

3.1.11 IBM WebSphere MQ Hardware Cluster May Be Set Up In An Active-Passive Mode Or An Active-Active Mode

3.1.12 IBM WebSphere MQ Supports Clustering Through Split Cluster Transmit Queues

3.1.13 IBM WebSphere MQ End-To-End Security

3.1.14 IBM WebSphere MQ Supports Enhanced Security

3.1.15 IBM WebSphere Application Server

3.1.16 IBM SOA WebSphere Extended Deployment

3.1.17 IBM WebSphere MQ

3.1.18 IBM WebSphere MQ Time-Independent Processing

3.1.19 IBM WebSphere MQ Performance and Scalability

3.1.20 IBM WebSphere Open Systems Foundation for Cloud Computing

3.1.21 IBM SOA Foundation

3.1.22 IBM SOA Components Provide Self-Contained Modules Of Basic Functionality

3.1.23 IBM SOA As Mechanism For Defining Business Services

3.1.24 IBM SOA Governance Lifecycle

3.1.25 IBM Patterns For E-Business

3.1.26 IBM WebSphere SOA and Enterprise Service Bus V6.0.2 Foundation Platform For Cloud Computing

3.1.27 IBM WebSphere Enterprise Service Bus

3.2 Tibco Middleware Messaging

3.2.1 Tibco Messaging

3.2.2 Tibco Mission Critical Messaging Solutions

3.2.3 Tibco Messaging Backbone

3.2.4 Tibco Rendezvous Messaging Software

3.2.5 Tibco Enterprise Message Service

3.2.6 Tibco Messaging Appliance P-7500

3.2.7 Tibco FTL

3.2.8 Tibco ActiveMatrix

3.2.9 TIBCO ActiveMatrix Service Performance Manager

3.2.10 Tibco ActiveMatrix Policy Manager

3.2.11 Tibco Active Matrix Service Grid

3.2.12 TIBCO ActiveMatrix SOA BusinessWorks

3.2.13 TIBCO ActiveMatrix Service Bus
