Abstracts

LEXINGTON, Massachusetts (June 17, 2016) – WinterGreen Research announces that it has published a new study Drone Transponders: Market Shares, Strategy, and Forecasts, Worldwide, 2016 to 2022. The 2016 study has 268 pages, 92 tables and figures. Worldwide drone transponder markets are poised to achieve significant growth with the need to achieve protected airways.

The simplest way to protect against mid-air collisions is to require the use of ADS-B transponders on all aircraft. Transponders can turn an uncooperative environment into a cooperative environment. Transponders provide location and positioning information about smart commercial UAS. These UAS have a computer inside, they are easy to fly, remotely maneuverable, have a camera, and contain sensor logic. Smart UAS are evolving computer driven collision avoidance technology making the flying more reliable.

Remote operation occurs in the context of a workflow and sensors. Cameras are improving dramatically to permit management of video and picture taking that is realistic and detailed. Drone actuators, drone transponders, are needed to support drone package delivery. This is a huge new market that speeds economic development, makes it easier for the middle class to both work, and purchase lifestyle items and food efficiently.

UAS based on aerial robotic platform technology can be used to make deliveries to each person's home, landing on the back doorstep, leaving packages in a locked box. The drone package delivery technology has reached a level of maturity that bodes well for market development. Drone systems are mature enough to be at the forefront of aerospace manufacturing. Dronecode is an independently funded software project that

harnesses the power of collaborative development. The aim is to fuel innovation across drone industries and ecosystems. Dronecode Foundation is a nonprofit organization working on a common, shared open source platform for Unmanned Aerial Vehicles (UAVs). Dronecode brings together existing and future open source UAV software projects.

APM UAV software platform was developed by 3DRobotics. 1,200 developers are working on Dronecode's six projects focused on maximizing adoption of the project's cost-effective, reliable and technologically advanced UAV software.

UAvionix has an ultra-lightweight low cost ADS-B transponder for UAS. UAvionix has developed an ADS-B suitable for UAVs of all sizes to improve flying safety for all. The ping is a family of ultralight weight, low cost, ADS-B transponders.

Weights range from 1.5 to 30 grams, delivering a variety of types of performance. The ping2020, for instance, is capable of IN on both 1090ES and 978UAT, and OUT on 978UAT. The products are fully compliant with the minimum performance standards of DO-282B Class A1S. UAvionix has developed an ADS-B suitable for UAVs of all sizes to The ping is among the world's first families of ultralight weight, low cost, ADS-B transponders.

Transponder and sense and avoid technology sponsorship by Sagetech, L-3 Aviation Products, FreeFlight, UAvionix, Google, Trig, DJI, and Intel has been effective. Development by Dronecode application ecosystem provides huge advances in drone real-time sense and avoid behavior. An open source collaboration is expected to accelerate deployable solutions for agile and reliable operation in the national airspace. The open source platform has been adopted by many organizations on the forefront of drone technology: 3DRobotics, Parrot, Qualcomm, Intel, DroneDeploy, Yuneec, Airphrame, and others.

With 750,000 users and 500 active developers the open source code initiative represents a compelling community of professionals and enthusiasts is able to support active improvements in control of airspace and improvement in flying safety for all. The alliance has worked on development standardization and software module interoperability.

According to Susan Eustis, lead author of the study, "Use of drone transponders represents a key milestone in provision of value to the airborne package delivery industry. Customized cameras are used to supplement GPS navigation, acting as eyes

of the drone, permitting package delivery everywhere. Digital controls will further automate flying, making ease of use and flight stability a reality.”

New materials and new designs are bringing that transformation forward. By furthering transponder innovation, continued growth is assured.

The worldwide market for drone transponders is anticipated to start from nothing and reach \$2.5 billion worldwide by 2022 growing in response to the need to prevent drone collisions, keep the highways in the sky safe, and manage routing of commercial UAS. Multiple applications drive market growth, most of all package delivery occurs out of line of sight. Other applications for drone transponders are in consumer photography, lightweight commercial UAS for real estate, the military, law enforcement, border control, homeland security, utility infrastructure surveillance, agriculture, aerial mapping, and package delivery.

WinterGreen Research is an independent research organization funded by the sale of market research studies all over the world and by the implementation of ROI models that are used to calculate the total cost of ownership of equipment, services, and software. The company has 35 distributors worldwide, including Global Information Info Shop, Market Research.com, Research and Markets, electronics.ca, and Thompson Financial. It conducts its business with integrity.

The increasingly global nature of science, technology and engineering is a reflection of the implementation of the globally integrated enterprise. Customers trust wintergreen research to work alongside them to ensure the success of the participation in a particular market segment. WinterGreen Research supports various market segment programs; provides trusted technical services to the marketing departments. It carries out accurate market share and forecast analysis services for a range of commercial and government customers globally. These are all vital market research support solutions requiring trust and integrity.

DRONE TRANSPONDER HIGHWAYS IN THE SKY EXECUTIVE SUMMARY

Drone Transponder Market Driving Forces
Self-Regulation of Drones Using Transponders
Remote-Controlled Aircraft
Drone Transponder Market Driving Forces
Drone Transponder Market Shares
Drone Transponder Market Forecasts

1. DRONE HIGHWAYS IN THE SKY: MARKET DESCRIPTION AND MARKET DYNAMICS

1.1 UAS Regulatory Frameworks
1.1.1 ADS-B for Small Drones
1.2 Need for Drone Controlled Airspace
1.2.1 Transponder Control by Privately Owned Agency
1.2.2 Self-Regulation of Drones Using Transponders
1.2.3 Project Wing from Google Wants A Transponder Mandatory For All Aircraft
1.3 Automatic Dependent Surveillance Broadcast ADS-B Transponder
1.3.1 QUICK LINKS
1.3.2 PRODUCTS
1.4 Google wants transponder in uncontrolled airspace
1.4.1 US FAA Commercial Drone Permits
1.5 Smart Commercial Drones
1.5.1 Smart Drones: Commercial Unmanned Aerial Systems (UAS) Description
1.6 Drone Enhanced Capability and Payloads
1.6.1 Unmanned Aerial Systems (UAS) Enhanced Resilience
1.6.2 Small and Micro-UAS Drones

2. DRONE HIGHWAYS IN THE SKY MARKET SHARES AND FORECASTS

2.1 Drone Transponder Market Driving Forces
2.1.1 Self-Regulation of Drones Using Transponders
2.1.2 Dronecode Platform
2.1.3 Remote-Controlled Aircraft
2.1.4 Drone Transponder Market Driving Forces
2.2 Drone Transponder Leading Market Participants

- 2.2.1 Sagetech
- 2.2.2 L-3 Aviation Products
- 2.2.3 FreeFlight
- 2.2.4 UAvionix
- 2.2.5 Google Low-Cost ADSB Transponders
- 2.2.6 Trig Design And Engineering
- 2.2.7 Intel Ascending Technologies' Asctec Trinity
- 2.2.8 DEDrone
- 2.2.9 ISMAR/Fortem
- 2.2.10 DJI
- 2.2.11 microadsb.com
- 2.3 Drone Transponder Market Forecasts
 - 2.3.1 Drone Aerial Systems Market Forecasts
 - 2.3.2 Drone Market Segment Applications
 - 2.3.3 Drone Aerial Systems by Sector, Military, Agriculture, Oil and Gas, Border Patrol, Law Enforcement, Homeland Security, Disaster Response, Package Delivery, Photography, Videography, Drones
- 2.4 Commercial Drone Transponder Prices and Drone Issues
 - 2.4.1 RELATED PRODUCTS
- 2.5 ADS-B In Receivers
 - 2.5.1 \$300 Transponder Units For CAA UK Approval
 - 2.5.2 Drone Issues Beyond Line Of Sight
- 2.6 Drone Transponder Regional Market Segment Analysis

3. DRONE TRANSPONDER HIGHWAYS IN THE SKY PRODUCT DESCRIPTION

- 3.1 Google Low-Cost ADSB Transponders
 - 3.1.1 Google's Vision
 - 3.1.2 Autonomous Drones Airspace: Private Agency Control
 - 3.1.3 Google Has Started Development of A Transponder
 - 3.1.4 Google Mesh Networks
- 3.2 Sagetech
 - 3.2.1 Sagetech ADS-B for Small Drones
 - 3.2.2 Sagetech Transponders Shrinking To Meet FAA Drone Demands
- 3.3 Microadsb.com
 - 3.3.1 UGCS Compatible with ADS-B Receivers
- 3.4 L-3 Aviation Products
 - 3.4.1 L-3 NXT-600/NXT-800
 - 3.4.2 L-3 Upgrade to ADS-B Out

- 3.4.3 L-3 SafeRoute
- 3.5 FreeFlight
 - 3.5.1 FreeFlight Systems and CMD Flight Solutions
 - 3.5.2 CMD Flight Solutions
- 3.6 Airogisitic
- 3.7 General Atomics Drone Friend or Foe Identification (IFF) Transponders
- 3.8 Trig
 - 3.8.1 Trig TT31 Mode S ADS-B Capable Transponder
- 3.9 Lynx
 - 3.9.1 Pilot Nightmare: Entering a Temporary Flight Restriction (TFR) Airspace
- 3.10 Stratus
 - 3.10.1 Stratus Esg Transponder
- 3.11 Rockwell Collins
- 3.12 Bendix
- 3.13 Garmin
- 3.14 MarcusUAV Medium Range 2.4Ghz Tracking Antenna
 - 3.14.1 Marcus UAV
- 3.15 I-Laps Transponder for FPV Multi-rotors
- 3.16 Intel
 - 3.16.1 Intel Realsense Cameras And Ascending Technologies' Asctec Trinity
 - 3.16.2 Ascending Technologies AscTec Firefly
 - 3.16.3 Drone: Asctec Firefly with Intel Realsense
 - 3.16.4 Ascending Technologies and Intel Collaboration to Develop Drone Collision Avoidance Technology
 - 3.16.5 Ascending Technologies Asctec Firefly/Intel RealSense Camera
 - 3.16.6 Intel Realsense Cameras and Ascending Technologies' Asctec Trinity
 - 3.16.7 AscTec Falcon 8
- 3.17 UAvionix
- 3.18 Follow Me Drones
- 3.19 Textron Systems Homeland Security
 - 3.19.1 Nano Air Vehicle
- 3.20 Denel Dynamics Seeker 400 UAS
 - 3.20.1 Denel Dynamics Seeker 400 Multi-mission, Multi-role ISR System
 - 3.20.2 Denel Dynamics Seeker 400 System
 - 3.20.3 Denel Dynamics Seeker 400 Multi-mission, Multi-role ISR System Features
 - 3.20.4 Denel Dynamics Hungwe UAS
- 3.21 IMSAR LLC Collision-Avoidance Radar Systems
- 3.22 Civilian UAV's - Rover Systems
- 3.23 CPI-406 Deployable Emergency Locator Transmitter (ELT)

- 3.23.1 Deployable Flight Incident Recorder Set (DFIRS)
- 3.23.2 Airborne Separation Video System (ASVS)
- 3.23.3 Airborne Separation Video System – Remote Sensor (ASVS – RS)
- 3.24 DJI
 - 3.24.1 DJI Guidance Approach
- 3.25 DEDrone

4. DRONE HIGHWAYS IN THE SKY TRANSPONDER RESEARCH AND TECHNOLOGY

- 4.1 Lloyd's Register Chief Technology Officer Guidance Notes
 - 4.1.1 Lloyd's Register Foundation Unlocking Further Potential
 - 4.1.2 Lloyd's Register First Phase Of Its Guidance Notes For Drones
- 4.2 Drone Software Technology/UgCS
 - 4.2.1 DJI
 - 4.2.2 3DRobotics
 - 4.2.3 Lockheed Martin
 - 4.2.4 Mikrokopter
 - 4.2.5 Micropilot
 - 4.2.6 Microdrones
 - 4.2.7 Parrot
- 4.3 Transponder Technology
- 4.4 Drone Regulation
 - 4.4.1 Separating The Hobbyist Industry From The Commercial Drone industry A Challenge
 - 4.4.2 Drone Test Sites Selected by the FAA
 - 4.4.3 Drone Exemptions
 - 4.4.4 FAA Plans Final Regulation on Commercial Drone Use by Mid-2016
 - 4.4.5 US FAA Commercial Drone Permits
- 4.5 Unmanned Aerial Systems Payloads
 - 4.5.1 Composites Key to Utility
 - 4.5.2 Military Drone Technology
 - 4.5.3 Military Systems Interoperability
 - 4.5.4 Drone Operational Benefits of Autonomy
 - 4.5.5 Drone Operational Benefits of Autonomy

5. DRONE HIGHWAYS IN THE SKY COMPANY PROFILES

- 5.1 Airogistic

5.2 Amazon

5.3 Denel Dynamics

5.4 DJI

5.4.1 DJI Revenue Demonstrates Leadership Position

5.5 Dronecode

5.6 FreeFlight

5.6.1 FreeFlight Systems and CMD Flight Solutions Complete ADS-B Out AML STC for Part 25

5.7 Fortem

5.8 Garmin

5.8.1 Garmin Global Positioning System

5.8.2 Garmin Aviation

5.8.3 Garmin Transponder Solutions

5.8.4 Garmin UAT-Based ADS-B Solutions

5.9 Google

5.9.1 Google Robotic Division

5.9.2 Google Self-Driving Car

5.9.3 Google Cars Address Vast Majority Of Vehicle Accidents Due To Human Error

5.9.4 Google Business

5.9.5 Google Corporate Highlights

5.9.6 Google Search

5.10 IMSAR LLC

5.10.1 IMSAR Announces Sale of Detect and Avoid Radar Technology to Fortem Technologies - Product Available from Fortem in July 2016

5.11 Intel

5.11.1 Intel Company Strategy

5.11.2 Intel Realsense Cameras And Ascending Technologies' Asctec Trinity

5.11.3 Intel Capital

5.12 I-Lap Timing Systems

5.13 Knorr-Bremse Group/Bendix

5.13.1 Bendix

5.14 L-3 Communication

5.14.1 L3 Communications

5.14.2 L-3 Aerospace Systems

5.14.3 L-3 Electronic Systems

5.14.4 L-3 Communication Systems

5.14.5 L-3 National Security Solutions

5.14.6 L-3 Revenue by Segment

5.14.7 L-3 Communication/Lynx

5.15 MarcusUAV

5.16 UAvionix

5.16.1 Access to the Dronecode Application Ecosystem Open Source Platform

5.17 MMist

5.17.1 MMIST Sherpatm Guided Parachute System

5.17.2 MMIST SnowGoosetm CQ-10A Unmanned Aerial System (UAS)

5.18 Northrop Grumman

5.18.1 Northrop Grumman Revenue

5.18.2 Northrop Grumman Remotec

5.18.3 Northrop Grumman Leading Global Security Company

5.18.4 Northrop Grumman Supplies Marine Navigation Equipment

5.18.5 Northrop Grumman Recognized by UK Ministry of Defense for Role in Supporting Sentry AWACS Aircraft During Military Operations in Libya

5.18.6 Northrop Grumman Corporation Subsidiary Remotec Inc. upgrade the U.S. Air Force fleet of Andros HD-1

5.18.7 Northrop Grumman NAV CANADA Supplier

5.19 Rockwell Collins

5.20 Sagetech Corporation

5.21 Textron

5.22 Trig Avionics

5.22.1 Trig Design And Engineering
