Abstracts

WinterGreen Research announces that it has a new study on Energy Harvesting Market Shares and Forecasts, Worldwide, Nanotechnology 2012-2018. Products power sensors that are the base for smarter computing. The 2011 study has 625 pages, 209 tables and figures. Energy harvesting devices are evolving in the context of the development of solid state technology that provides vast improvements. Improvements in energy density are one of the benefits of energy harvesting give to traditional rechargeable and solid state batteries.

Advanced technologies associated are emerging that make energy harvesting feasible. Advanced storage devices are emerging simultaneously. Storage devices can leverage the power captured by energy harvesting devices. Energy storage technologies of super-capacitors and thin-film batteries have become cost-effective. Energy harvesting devices have attained workable levels of efficiency. There are significant cost reductions. Many applications are related to smarter computing that depends on sensors capturing change in conditions and making adjustments to the environment based on measured change.

Existing energy harvesting and storage applications include vibration-based wireless train measuring systems, wireless sensors distributed city wide to implement smart cities, oil field monitoring systems, windup laptops for use in remote regions, and wireless light switches for use in smart buildings. Wireless sensors are self-powering. They can be used to alert and monitor a range of environments and incidents, pollution and forest fires, robberies in a city, temperature in a building, and movement around a border fence.

Energy harvesting technologies include electrodynamics, photovoltaics, piezoelectrics,

and thermovoltaics. Photovoltaic systems for solar energy is mostly outside the scope of this study. The energy harvesting and energy storage market factors light harvesting for small devices.

Technological developments in the fields of low-power electronics and energy storage systems have allowed energy harvesting to become an increasingly viable technology. It is alternatively referred to as energy scavenging and power harvesting. Energy harvesting technology has become sophisticated and efficient.

Energy harvesting is the use of ambient energy to provide electricity for small electronics, for sensor networks, and for mobile equipment. It is able to provide maintenance free, long life energy for equipment, reducing the need for batteries. Units are used to recharge solid state batteries that can handle as many as 40,000 recharges. Energy harvesting provides the ability to connect with existing devices. Energy harvesting is used when wires or batteries are too expensive to be practical.

Energy harvesting depends on the capture of ambient energy, its conversion to usable form, and storage. Common examples of energy harvesting include wristwatches powered by body movement and bicycle dynamo powered by the motion of the wheel.

Integrated circuits can perform algorithmic control and achieve wireless communications using tiny amounts of energy. These integrated circuits provide a technological tipping point that permits the evolution of energy-harvesting-based systems from niche products, to widespread use in wireless networks.

According to Susan Eustis, the senior analyst for the study, 'The wireless sensor node is the most important product type forecast for growth as an energy-harvesting solution. Wireless sensors are ubiquitous and very attractive products to implement smarter planet initiatives using harvested energy.'

Wireless sensors nodes are commonly placed in hard-to-reach locations. Changing batteries can be costly and inconvenient. Wireless sensors using harvested energy provide off-the-shelf availability of ultra-low-power, single-chip wireless microcontrollers (MCUs) capable of running control algorithms and transmitting data using sophisticated power management techniques.

Energy harvesting markets at \$511 million a year market worldwide in 2011 is anticipated to increase tenfold to \$5.1 billion by 2018. This strong growth is anticipated to come as units are less expensive and more effective in the same amount of space.

Wireless sensor networks are useful almost everywhere, creating the opportunity to implement controls and manage every aspect of human activity in ways that have not even been imagined hitherto.

WinterGreen Research is an independent research organization funded by the sale of market research studies all over the world and by the implementation of ROI models that are used to calculate the total cost of ownership of equipment, services, and software. The company has 35 distributors worldwide, including Global Information Info Shop, Market Research.com, Research and Markets, Bloomberg, and Thompson Financial.

Contents

MID IR SENSORS EXECUTIVE SUMMARY

Mid-Infrared (IR) Laser Sensor Systems

Mid-Infrared (IR) Laser Sensors Are Able To Measure Change In Device Condition, Chemistry, Or Temperature

Turnkey Mid-Infrared Laser Sensor Systems Are Based On Technology That Goes From 3-12 m

Mid IR Sensor Market Driving Forces

Mid IR Sensor Market Shares

Mid IR Sensor Market Forecasts

1. MID IR SENSOR MARKET DESCRIPTION AND MARKET DYNAMICS

1.1 Infrared Spectroscopy

1.1.1 FTIR Spectroscopy Used To Establish Purity Of Chemical Compounds

1.1.2 Applications of Infrared Sensing Thermopiles

1.1.3 Preventive and Predictive Maintenance

1.1.4 Residential Control Systems

1.1.5 White Goods (Home Appliances)

1.1.6 Medical and Health

1.1.7 Industrial Process Control

1.1.8 Security and Surveillance

1.1.9 Mid-Infrared Sensor Applications Discussion

1.1.10 IBM Integrated Product Change Management

1.2 Mid IR Sensors

1.2.1 Positioned To Provide Wavelength Tunability And High Optical Power

1.2.2 ECqCL Expressed As A QC Semiconductor Chip

1.2.3 Advances Of Mid-Infrared Based Trace Gas Sensor

1.3 Semiconductor Diode Lasers Operating At Midwave-Infrared (Mid-IR) Wavelengths

1.4 Infrared Semiconductor Lasers

1.4.1 Test Applications For Mid IR Sensors

1.5 Smart Sensors Replace Expensive Building Control Systems

1.5.1 Building Control Standardization

1.6 Biomedical And Chemical Mid-IR Spr Based Sensor

1.6.1 Development Of Mid-Infrared Surface Plasmon

1.6.2 Sensors Utilizing Surface Plasmon Resonance (SPR)

1.7 Miniaturized Mid-Infrared Sensor Technologies Trends

- 1.7.1 Mid IR Waveguides
- 1.7.2 Miniaturized IR Gas Sensors
- 1.8 Emerging New Fields of Mid IR Sensor Application And Outlook
- 1.9 Sol-Gel-Coated Mid-Infrared Fiber-Optic Sensors
- 1.10 Magnetic Nanoparticle Mid-Infrared Pathogen Sensor for Food Matrixes

2. MID IR SENSORS MARKET SHARES AND MARKET FORECASTS

- 2.1 Mid-Infrared (IR) Laser Sensor Systems
 - 2.1.1 Mid-Infrared (IR) Laser Sensors Are Able To Measure Change In Device Condition, Chemistry, Or Temperature
 - 2.1.2 Turnkey Mid-Infrared Laser Sensor Systems Are Based On Technology That Goes From 3-12 m
 - 2.1.3 Mid IR Sensor Market Driving Forces
- 2.2 Mid IR Sensor Market Shares
 - 2.2.1 FLIR Systems Multi-Sensor Mission Equipment
 - 2.2.2 FLIR Mid IR Sensors
 - 2.2.3 FLIR Building Inspection
 - 2.2.4 FLIR Infrared Detector Design Manufacturing
 - 2.2.5 FLIR Sensing Materials
 - 2.2.6 SenseAir
 - 2.2.7 SenseAir Carbon Dioxide Sensors
 - 2.2.8 Senseair Test & Measurement Carbon Dioxide Sensors
 - 2.2.9 SenseAir(Non-dispersive Infra-Red) Technology
 - 2.2.10 Structured Materials Industries
 - 2.2.11 Daylight Solutions FTIR Spectroscopy
 - 2.2.12 Daylight Solutions Broadly Tunable, Room-Temperature, Mid-IR Laser
 - 2.2.13 Sofradir
 - 2.2.14 Sofradir
 - 2.2.15 Sofradir
 - 2.2.16 JonDeTech
 - 2.2.17 Maxion Technologies
 - 2.2.18 Thermo Fischer Scientific/NovaWave Technologies
 - 2.2.19 Thermo Fischer Scientific/NovaWave
 - 2.2.20 Power Technology Quantum-Cascade Mid IR Lasers
 - 2.2.21 Agiltron
 - 2.2.22 Aerocrine
 - 2.2.23 Bosch
 - 2.2.24 Block Engineering

- 2.2.25 II-VI Incorporated (NASDAQ: IIVI)
- 2.2.26 MIRTHE Center
- 2.2.27 Infrared Fiber Systems Infrared Transmitting Fibers Medical Market
- 2.2.28 M Squared Next-Generation Bio-Medical Lasers Firefly-IR
- 2.2.29 Raytheon and Lockheed Market For Mid-Infrared Lasers
- 2.2.30 Market Consolidation of Mid IR Sensor Companies
- 2.3 Mid IR Sensor Market Forecasts
 - 2.3.1 Military/Airline/Space/Defense Mid Infrared (IR) Sensors Market Forecasts
 - 2.3.2 Smart Building Mid Infrared (IR) Sensor Markets
 - 2.3.3 FLIR Building Inspection
 - 2.3.4 Mid IR sensors Smart Grid and Smart Building Market Forecasts
 - 2.3.5 Sensors and Automation
 - 2.3.6 Applications and Benefits
 - 2.3.7 MID IR Sensor Analysis
 - 2.3.8 Military Mid IR Sensor Market Forecasts
 - 2.3.9 Homeland Security Mid IR Sensors
 - 2.3.10 Law Enforcement Mid IR Sensor Market Forecasts,
 - 2.3.11 Smart Electrical Grid Moves to Electronics and Sensors from Purely Mechanical Infrastructure
 - 2.3.12 Carbon Dioxide Gas Sensing
 - 2.3.13 Smart Grid Networking
 - 2.3.14 Healthcare Mid IR Sensor Breath Analysis Market Forecasts
 - 2.3.15 Mid Infrared IR Sensor Technologies Basis For IR Sensing
 - 2.3.16 Nanoparticles The Base For Mid IR Sensor Evolution
 - 2.3.17 Miniaturization Significant For The Development Of Mid IR Applications
- 2.4 Mid IR Sensor Market Opportunity Overview
 - 2.4.1 Molecular Responses Across the MIR Spectrum
 - 2.4.2 Technology Options Available in Mid IR
 - 2.4.3 Diagrams To Illustrate The Technologies
 - 2.4.4 Comparison of Technology Options
 - 2.4.5 Products, In Which MIR Sensors Are Actually Deployed
 - 2.4.6 Market Trends & Key Companies
 - 2.4.7 Key Applications/Products Used By The Military
 - 2.4.8 Potential Technologies and Applications of MIR Sensors
 - 2.4.9 Key Developments Are Required To Make The Potential Applications Into Real Markets
 - 2.4.10 Market Segment Analysis
 - 2.4.11 Characteristics Required
 - 2.4.12 Building a Robust Data Sensor Network Integration Layer

2.5 Smarter Planet Market Shares and Forecasts

2.5.1 IBM Imperatives For A Smarter Planet

2.5.2 IBM Positions To Support Sensor Networks

2.5.3 IBM Jazz.net

2.5.4 Smarter Planet Market Forecasts

2.5.5 Smarter Planet Software Market Industry Segment Forecasts

2.5.6 Smarter Planet Market Segment Forecasts

2.5.7 Link Between SOA and MIR sensors

2.5.8 SOA Used to Connect Mid IR Sensor Information to Analytical Software

2.5.9 Services Oriented Architecture (SOA) Market Driving Forces

2.5.1 Advantages Offered By SOA 2.5.2 Services Oriented Architecture SOA Market Shares

2.5.3 IBM SOA Dominates the Industry

2.5.4 Building a Robust Data Sensor Network Integration Layer

2.5.5 SOA Network Sensor Market Segment

2.5.6 Mid IR Sensor Enabled Device Market Driving Forces

2.5.7 SOA Market Shares

2.6 Mid IR Sensor Sample Prices

2.6.1 SenseAir NDIR (Non-dispersive Infra-Red) Technology

2.6.2 MIRTHE Prototype QC Laser Based Sensors

2.6.3 JonDeTech

2.6.4 Aerocrine

2.7 Mid IR Sensor Regional Shipments

3. MID IR SENSORS PRODUCT DESCRIPTION

3.1 FLIR

3.1.1 FLIR Building Inspection

3.1.2 FLIR Gas Detection

3.1.3 FLIR Emerging Markets

3.1.4 FLIR Technology

3.1.5 FLIR System Design and Integration

3.1.6 FLIR Sensing Materials

3.1.7 FLIR Lasers and Laser Components

3.1.8 FLIR Tactical Platforms

3.1.9 FLIR Tau Outputs NTSC Video

3.1.10 FLIR Mid IR Sensors

3.1.11 FLIR Government Systems Airborne MEP

3.1.12 FLIR Government Systems Airborne - Talon

- 3.1.13 FLIR Government Systems Unmanned – Star SAFIRE QWIP
- 3.1.14 FLIR Government Systems Unmanned – Star SAFIRE III
- 3.1.15 FLIR Government Systems Unmanned TacFLIR II
- 3.1.16 FLIR Government Systems - Products – Maritime - Star SAFIRE III
- 3.1.17 FLIR Government Systems - Products – Maritime - SeaFLIR II
- 3.1.18 FLIR Government Systems - Products – Land - RWSS
- 3.1.19 FLIR Government Systems - Products – Land - WideEye II
- 3.1.20 FLIR Government Systems Force Protection
- 3.1.21 FLIR EO/IR
- 3.2 Daylight Solutions
 - 3.2.1 Daylight Solutions Lasers For Gas Sensing Instrumentation
 - 3.2.2 Daylight Solutions Mid-IR HgCdTe Detectors
 - 3.2.3 Daylight Solutions Thermal Laser Pointers
 - 3.2.4 Daylight Solutions Tunable Laser
 - 3.2.5 Daylight Solutions Broadly Tunable, Room-Temperature, Mid-IR Laser
 - 3.2.6 Daylight Solutions Mid-IR
 - 3.2.7 Daylight Solutions Fixed Wavelength Pulsed and CW Mid-Infrared Lasers
 - 3.2.8 Daylight Solutions Mid-IR HgCdTe Detectors
 - 3.2.9 Daylight Solutions Room-Temperature, Low-Noise Amplified MCT Detector Core Technology
 - 3.2.10 Daylight Solutions Digital Object Identifier
 - 3.2.11 Power Technology Applications
 - 3.2.12 Daylight Solutions Power Technology Sensors Integrated With Wireless Capability
 - 3.2.13 Daylight Solutions Power Technology ECqCL Used For Illumination Applications
- 3.3 SenseAir
 - 3.3.1 Senseair Carbon Dioxide
 - 3.3.2 Senseair Test & Measurement Carbon Dioxide Sensors
 - 3.3.3 Senseair Temperature Proportional To Carbon Dioxide Level
 - 3.3.4 SenseAir Collaborates With Ventilation Systems Suppliers
 - 3.3.5 SenseAir Measurement Platform Has Intelligence
 - 3.3.6 SenseAir Carbon Dioxide Sensors
 - 3.3.7 SenseAir has Collaborated With Autoliv Development and Hok Instrument in Developing The Next Generation Of Driver Alcohol Detection Systems
- 3.4 Sensor Switch Occupancy Sensor Products
 - 3.4.1 Sensor Switch Technology Engineering Driven Company
 - 3.4.2 Sensor Switch Passive Infrared
- 3.5 Structured Materials Industries
 - 3.5.1 Structured Materials Industries SpinCVDJ Metal Organic Chemical Vapor

Deposition

3.6 Block Engineering Quantum Cascade Laser Products

3.6.1 Block Engineering Quantum Cascade Laser (QCL) LaserScan

3.6.2 Block Engineering Quantum Cascade Laser (QCL) LaserScope

3.7 Sofradir

3.7.1 Sofradir EPSILON MW

3.7.2 Sofradir ROIC Modes:

3.8 Ekips Technologies

3.8.1 Ekips Technologies Breathmeter

3.8.2 Ekips Technologies Lasers

3.8.3 Ekips Technologies Laser Spectrometers

3.8.4 Ekips Technologies Mid-Infrared Lasers

3.8.5 Ekips Technologies Challenge In Quantifying Chemical Molecules

3.9 JonDeTech AB

3.9.1 JonDeTech AB Applications of Infrared Sensing Thermopiles

3.9.2 JonDeTech AB Preventive and Predictive Maintenance

3.9.3 JonDeTech Thermopile Products

3.9.4 JonDeTech Surface Mount Plastic Thermopiles

3.9.5 JonDeTech Thermopiles

3.9.6 JonDeTech Horizontal Thermocouple

3.9.7 JonDeTech Advantage Of Nanotechnology Vertical Thermocouple

3.10 Micropelt Energy Harvesting:

3.10.1 Micropelt Two Micro Thermogenerators In Series

3.10.2 Micropelt Thermoharvester

3.11 EnOcean

3.11.1 EnOcean ECT 310 - Thermo Energy Harvesting

3.11.2 EnOcean Energy Harvesting Wireless Sensor Solutions

3.12 Agiltron

3.12.1 Agiltron Infrared Detector Products

3.12.2 Agiltron Lead Sulfide Infrared Detector Array

3.12.3 Agiltron Lead Selenide Infrared Detectors

3.12.4 Agiltron Lead Selenide Infrared (Pbse) Detector Array

3.13 Mirthe Mid IR Sensor Breath Analyzers

3.13.1 Mirthe Engineered Systems for Mid-IR Laser Absorption Spectroscopy

3.13.2 Mirthe Strategic 3-Level Framework

3.14 Cascade Technologies

3.14.1 Cascade Technologies CT2100 – OnStack Multigas Analyser

3.14.2 Cascade Technologies CT3400 – Extractive Multigas Analyser

3.14.3 Cascade Technologies Revolutionary Technology

- 3.14.4 Cascade Technology Implementation
- 3.15 Physical Sciences/Maxion
 - 3.15.1 Maxion Technologies Infrared Semiconductor Lasers
 - 3.15.2 Maxion Technologies Turn-Key Mid-IR Laser Systems
 - 3.15.3 Maxion Technologies Turn-Key Mid-IR Laser Quantum Cascade (QC) and Interband Cascade (IC) Sensors
 - 3.15.4 Maxion Distributed Feedback (DFB) Single-Mode and Fabry-Perot (FP) Multi-Mode Lasers
 - 3.15.5 Maxion C-Mount and NS-Mount Lasers
- 3.16 VIASPACE Ionfinity
 - 3.16.1 VIASPACE Ionfinity Soft Ionization Membrane
- 3.17 Power Technology Quantum-Cascade Lasers
 - 3.17.1 Power Technology Quantum-Cascade Lasers Blue, Violet, & UV Diode Lasers
 - 3.17.2 Power Technology Infrared Viewing Devices
 - 3.17.3 Power Technology Laser Modules for OEM
- 3.18 M Squared Next-Generation Bio-Medical Lasers
 - 3.18.1 M Squared Lasers Firefly-IR
 - 3.18.2 M Squared Lasers Firefly-THz
 - 3.18.3 M Squared Firefly-THz: Compact, Widely Tunable, Pulsed Terahertz Laser Source
 - 3.18.4 M Squared Lasers Product Families
 - 3.18.5 M Squared ICE-BLOC Photonic Controllers
 - 3.18.6 M Squared Laser Systems
 - 3.18.7 M Squared Dependable Innovation
 - 3.18.8 M Squared SolsTiS: Ultracompact, Widely Tunable, Narrow Linewidth CW Ti:Sapphire Laser
- 3.19 Thermo Fischer Scientific/NovaWave Technologies
 - 3.19.1 NASA Applications For Compact UV Laser-Based Sensor Instrument
 - 3.19.2 Novawave Technology Mid-Infrared Laser Source Real-time, Multispecies Greenhouse Gas Sensor
 - 3.19.3 Novawave Technology Canary in a Beam Line
 - 3.19.4 Novawave Technology Quasi-Phase-Matched DFG Lasers for Sensing
- 3.20 GE Sensors
 - 3.20.1 GE Wireless Sensor Networks
 - 3.20.2 GE Applications for Wireless Sensor Networks
- 3.21 PNNL Electronics and Systems Integration
- 3.22 Hamamatsu
 - 3.22.1 Hamamatsu Infrared Detector
 - 3.22.2 Hamamatsu QCL for Continuous Wave Operation At Room Temperature

- 3.22.3 Hamamatsu Laser
- 3.23 AdTech Optics
- 3.24 Opto Solutions
 - 3.24.1 Opto Solutions - IR Photonics
- 3.25 Sentinel Photonics
- 3.26 ILX Lightwave
- 3.27 Aerocrine

4. MID IR SENSOR TECHNOLOGY

- 4.1 Infrared Technology Overview
 - 4.1.1 Daylight Solutions Core Technology
- 4.2 Mid-infrared (mid-IR) Laser Spectroscopy
 - 4.2.1 Application of Infrared Lasers to Nanosecond Time-Resolved Condensed-Phase Samples
- 4.3 Remote Detection Of Mines
- 4.4 Thermopiles
 - 4.4.1 JonDeTech: Vertical VS. Horizontal Thermopile Lead Configuration
- 4.5 Nanoparticle Dispersions
 - 4.5.1 Aqueous Dispersions
 - 4.5.2 JonDeTechs Thermopiles Based On Nanotechnology
 - 4.5.3 Nanotechnology Particle Size In The Range Of 1-100 Nanometers
 - 4.5.4 Nanoparticles
 - 4.5.5 Silicon In A Battery Swells As It Absorbs Lithium Atoms
 - 4.5.6 Different Shapes Of The Same Material Create Different Characteristics
 - 4.5.7 Optical Properties Integrated Into New Mid IR Sensor Technology
- 4.6 Mid IR Laser Laser Emits A Narrow Range Of Wavelengths
 - 4.6.1 Interband Cascade Laser (ICL) Based Spectroscopic Trace-Gas Sensor Provides For Simultaneous Detection Of Two Atmospheric Trace Gases
 - 4.6.2 Narrow Band Gap Semiconductor Laser Diodes
- 4.7 IBM Microscope 100 Million Times Finer Resolution Than Current MRI
 - 4.7.1 IBM Research
 - 4.7.2 Technological Trends in Microscopy
- 4.8 Battery Technology for Mid IR Sensors
 - 4.8.1 Battery Chemistries Technology
- 4.9 Breath Analyzers Detect Disease
- 4.10 Improving Biomaterials For Medical Implant Applications
 - 4.10.1 Bioactive Materials
 - 4.10.2 Forming A Chemical Bond With Bone

- 4.10.3 Bioactivity Increased Through Surface Modification
- 4.10.4 Biofilms Multilayered Colonies Of Bacteria
- 4.10.5 Biofilm Formation
- 4.10.6 Biofilms As A Major Contributor To Chronic Wounds
- 4.10.7 Acute or Chronic Infection in Some Biomaterial Applications
- 4.10.8 Biomaterials Research
- 4.11 QC Technology
 - 4.11.1 Components of an ECqCL
- 4.12 Schematic of Mid-Infrared Trace Gas Sensor
- 4.13 Mid-IR Sensors Standards
- 4.14 Driving Forces For Building Automation
- 4.15 Near IR Night Vision Sensors
 - 4.15.1 Sensor Based Threat Detection
- 4.16 Mid-IR Non-Invasive Medical Systems
- 4.17 University of Oklahoma High-Tech Breath Test
 - 4.17.1 Nanotechnology Improves Laser Performance
 - 4.17.2 Nanotechnology Breath Analyzer For Kidney Failure
- 4.18 Physical Vapor Nanoparticle Synthesis
 - 4.18.1 Nanophase Vapor Development Process
 - 4.18.2 Nanoparticle Coatings - Discrete Particle Encapsulation
 - 4.18.3 Nanoparticle Vapor Organic Dispersions
- 4.19 MIRTHERoadmap
 - 4.19.1 Near IR Laser Sensors:

5. MID INFRARED (IR) SENSORS COMPANY PROFILES

- 5.1 AdTechoptics
- 5.2 Aerocrine
- 5.3 Alpes Lasers/ALTechnologies
 - 5.3.1 Laser diodes
- 5.4 Block Engineering
 - 5.4.1 Block Positioned To Expand Its Commercial Markets
 - 5.4.2 Block Engineering Contracts
 - 5.4.3 Block Engineering LaserScan Analyzer
 - 5.4.4 Block Engineering: Developer Of High Performance QCL and FT-IR Spectrometers
 - 5.4.5 Block MEMS Receives \$4.5 Million Development Contract for MEMS Gas Sensor
- 5.5 Bosch

- 5.5.1 Bosch Building Automation
- 5.5.2 Bosch Carbon Dioxide Ventilation IR Sensors
- 5.5.3 Bosch Motion Detectors
- 5.5.4 Bosch Smart Sensors Simplify
- 5.6 Cymbet
 - 5.6.1 Cymbet Team:
 - 5.6.2 Cymbet Investors:
 - 5.6.3 Cymbet Partners, Sales and Distribution:
 - 5.6.4 Cymbet Manufacturing:
 - 5.6.5 Cymbet to Open World's Highest Volume Solid-State Battery Manufacturing Facility
 - 5.6.6 Cymbet Partnering with X-FAB
 - 5.6.7 Cymbet/X-FAB, Inc.
 - 5.6.8 Cymbet Expanding in Minnesota
 - 5.6.9 Cymbet/LEDA 5.6.10 Distribution Agreement EnerChip Eco-friendly Solid State Batteries
 - 5.6.11 Cymbet EVAL-09 Utilizes Harnessing Ambient Energy
 - 5.6.12 Cymbet Secures \$31 Million in Private Financing
- 5.7 Daylight Solutions
 - 5.7.1 \$15Million Equity for Daylight Includes Northrop Grumman Funds
 - 5.7.2 Daylight Solutions Manufacturing Expansion
 - 5.7.3 Daylight Solutions Collaborations
- 5.8 Digi International
 - 5.8.1 Digi International Revenue
 - 5.8.2 Digi International Business Highlights:
- 5.9 Directed Vapor Technology
 - 5.9.1 Directed Vapor Deposition Next Generation Coating Technology
- 5.10 Dust Networks
 - 5.10.1 Dust Networks Self-Powered IPV6 Wireless Sensor Network
- 5.11 EnOcean GmbH
 - 5.11.1 EnOcean Technology
- 5.12 Ekips Technologies
- 5.13 Elliot Scientific
- 5.14 Finmeccanica
 - 5.14.1 Finmeccanica/SELEX Galileo
 - 5.14.2 SELEX Galileo Inc.
 - 5.14.3 SELEX Galileo Technologies
- 5.15 Ferro Solutions
 - 5.15.1 Ferro Solutions

5.16 Flexible Electronics Concepts

5.17 FLIR

5.17.1 FLIR Training

5.17.2 FLIR Sales and Distribution

5.17.3 FLIR Sensor Systems

5.17.4 FLIR Systems Thermography Products

5.17.5 FLIR Systems Infrared Technology

5.17.6 FLIR Systems

5.17.7 FLIR Systems

5.17.8 FLIR Systems Third Quarter 2011 Financial Results

5.17.9 FLIR Systems

5.17.10 FLIR Systems, INC. Revenue

5.17.11 FLIR Systems Segment Operating Results

5.17.12 FLIR Systems Thermal Vision and Measurement

5.17.13 FLIR Systems Raymarine

5.17.14 FLIR Systems Surveillance

5.17.15 FLIR Systems Detection Revenue

5.17.16 FLIR Systems Integrated Systems Revenue

5.17.17 FLIR Systems Competitive Strengths

5.17.18 FLIR Systems Commercial Operating Model

5.17.19 FLIR Systems Vertically Integrated Manufacturing

5.17.20 FLIR Systems Industry-Leading Market Position

5.17.21 FLIR Systems Broad Product Line

5.17.22 FLIR Systems Internally-Funded Innovation

5.17.23 FLIR Systems Diverse Customer Base

5.17.24 FLIR Systems Global Distribution Capabilities

5.17.25 FLIR Systems Growth Strategies

5.17.26 FLIR Systems Continually Reduces Costs

5.17.27 FLIR Systems Expands Global Reach

5.17.28 FLIR Systems Builds Application Awareness and Brand 5.17.29 FLIR Systems

Complement Core Competencies with Strategic Acquisitions

5.17.30 FLIR Acquires Aerius Photonics, LLC

5.17.31 FLIR Radiometry

5.17.32 FLIR Predictive Maintenance

5.17.33 FLIR Research & Development Applications

5.17.34 FLIR Manufacturing Process Control

5.17.35 FLIR Mechanical Engineering

5.17.36 FLIR Infrared Detector Design Manufacturing

5.17.37 FLIR Integrated Circuits and Electronic Design

- 5.17.38 FLIR Software Development
- 5.17.39 FLIR Motion Control Systems
- 5.17.40 FLIR Optical Design, Fabrication and Coating
- 5.17.41 FLIR Micro-Coolers
- 5.18 GE Sensors
 - 5.18.1 GE Wireless Sensor Networks
 - 5.18.2 GE Applications for Wireless Sensor Networks
- 5.19 Hamamatsu
 - 5.19.1 Hamamatsu Electron Tube Division
 - 5.19.2 Hamamatsu Solid State Division
 - 5.19.3 Hamamatsu Systems Division
 - 5.19.4 Hamamatsu Laser Group
 - 5.19.5 Hamamatsu Optical Communication Group
 - 5.19.6 Hamamatsu Central Research Laboratory
 - 5.19.7 Hamamatsu Tsukuba Research Laboratory
 - 5.19.8 Hamamatsu Sports Photonics Laboratory
 - 5.19.9 Hamamatsu PET Center
 - 5.19.10 Hamamatsu Revenue
- 5.20 II-VI incorporated/Marlow Industries
 - 5.20.1 II-VI Incorporated (NASDAQ: IIVI)
 - 5.20.2 II-VI Revenue
 - 5.20.3 II-VI/Aegis Lightwave
 - 5.20.4 II-VI Incorporated/Marlow Infrared And Near-Infrared Laser Optical Elements
 - 5.20.5 II-VI incorporated/Marlow Production Operations
 - 5.20.6 II-VI incorporated/Marlow Primary Products
 - 5.20.7 II-VI incorporated/Marlow Markets
 - 5.20.8 II-VI Infrared Optics Market
 - 5.20.9 II-VI One-Micron Laser Market.
 - 5.20.10 II-VI Near-Infrared Optics Market.
 - 5.20.11 II-VI Thermoelectric Market
- 5.21 ILX Lightwave
 - 5.21.1 ILX Lightwave Product Innovation
- 5.22 IPG Photonics
 - 5.22.1 IPG Photonics Revenue
- 5.23 Johnson Controls Sensor Products
 - 5.23.1 Johnson Controls Valve Products
- 5.24 JonDeTech
- 5.25 Kidde Products Limited/Airsense Technology
- 5.26 Lockheed-Martin

- 5.26.1 Lockheed Martin Corp
- 5.26.2 Lockheed Martin Customer Base:
- 5.26.3 Lockheed Martin Organization:
- 5.26.4 Lockheed Martin Financial Performance
- 5.26.5 Lockheed Martin Receives \$260 Million M-TADS/PNVS Production Contract
- 5.26.6 Lockheed Martin F-35 Electro-Optical Targeting System
- 5.26.7 Lockheed Martin
- 5.26.8 Lockheed Martin Defense Department Positioning
- 5.26.9 US Navy awards Lockheed Martin contract to Pioneer Technology To Efficiently Manage Groups Of Unmanned Vehicles
- 5.27 M Squared
 - 5.27.1 M Squared Next-Generation Bio-Medical Lasers
 - 5.27.2 M Squared Lasers Firefly-IR
 - 5.27.3 M Squared Lasers Firefly-THz
 - 5.27.4 M Squared Firefly-THz: Compact, Widely Tunable, Pulsed Terahertz Laser Source
 - 5.27.5 M Squared Lasers Product Families
 - 5.27.6 M Squared ICE-BLOC Photonic Controllers
 - 5.27.7 M Squared Laser Systems
 - 5.27.8 M Squared Dependable Innovation
 - 5.27.9 M Squared SolsTiS: Ultracompact, Widely Tunable, Narrow Linewidth CW Ti:Sapphire Laser
- 5.28 MIRTHE (Mid-Infrared Technologies for Health and the Environment) National Science Foundation Engineering Research Center
- 5.29 Mirthe Mid IR Sensor Breath Analyzers
 - 5.29.1 Mirthe Engineered Systems for Mid-IR Laser Absorption Spectroscopy

I would like to order

Product name: Energy Harvesting Market Shares, Strategies, and Forecasts, Worldwide, Nanotechnology, 2012 to 2018

Product link: <https://marketpublishers.com/r/E5D9B29F01CEN.html>

Price: US\$ 3,600.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:

info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page <https://marketpublishers.com/r/E5D9B29F01CEN.html>

To pay by Wire Transfer, please, fill in your contact details in the form below:
