Abstracts

Homecare Medical Equipment Markets are poised to achieve continuing growth as the aging population needs homecare treatment. The homecare equipment market consists primarily of wheelchairs, scooters, oxygen treatment equipment, accessibility beds, lifts, and toilets. Homecare medical equipment has until recently been sold primarily through distributors. The impact of direct sales through the Internet has brought about some distribution market consolidation, leading to a decrease of in the number of distributors for homecare equipment. As the population ages, people are more frail and need assistance for mobility. Wheelchair technology is evolving to give people with disabilities more mobility. Mobility depends on a wheelchair that is fit to purpose. Power and manual wheelchairs are bought depending on the needs of the customers. Medical scooters are a growing segment of mobility for the aging population, as they perform better in an outdoor environment. Many issues impact the choice of a wheelchair, including cost and reimbursement availability.

WinterGreen Research is an independent research organization funded by the sale of market research studies all over the world and by the implementation of ROI models that are used to calculate the total cost of ownership of equipment, services, and software. The company has 35 distributors worldwide, including Global Information Info Shop, Market Research.com, Research and Markets, electronics.ca, and Thompson Financial. WinterGreen Research is positioned to help customers facing challenges that define the modern enterprises.
