LEXINGTON, Massachusetts (March 8, 2018) – WinterGreen Research announces that it has published a new study *New Industrial Revolution: Gap Between Value of Capital and Value of Jobs Widens*. The 2018 study has 47 pages, 10 tables and figures.

The net displacement of workers by machines exacerbates the gap between returns to capital and returns to labor. The upper one percent get increasingly richer and the rest of the people have fewer jobs open to them. That is the reality of the new industrial revolution.

The simultaneous rise of many new trillion-dollar markets is unique in the history of capital experience. Economic activity in the world economies is traditionally burdened with a low growth rate, with a very few technology sectors breaking the trend and growing above 3% per year. Now, with the new industrial revolution, some even very large sectors will grow as fast as 100% per year. The world economy is forecast to accelerate in 2018, with global growth projected. The new industrial revolution is far different from the earlier industrial growth trajectories. Sectors impacted by the new industrial revolution grow rapidly and they grow big.

WinterGreen Research is an independent research organization funded by the sale of market research studies all over the world and by the implementation of ROI models that are used to calculate the total cost of ownership of equipment, services, and software. The company has 35 distributors worldwide, including Global Information Info Shop, Market Research.com, Research and Markets, electronics.ca, Research and

Markets, and Report Linker.

WinterGreen Research is positioned to help customers facing challenges that define the modern enterprises. The increasingly global nature of science, technology and engineering is a reflection of the implementation of the globally integrated enterprise. Customers trust wintergreen research to work alongside them to ensure the success of the participation in a particular market segment.

WinterGreen Research supports various market segment programs; provides trusted technical services to the marketing departments. It carries out accurate market share and forecast analysis services for a range of commercial and government customers globally. These are all vital market research support solutions requiring trust and integrity.
