

Semiconductor Wireless Sensor Internet of Things (IoT): Market Shares, Strategies, and Forecasts, Worldwide, 2014 to 2020

https://marketpublishers.com/r/SE90A3694F7EN.html

Date: February 2014 Pages: 492 Price: US\$ 3,900.00 (Single User License) ID: SE90A3694F7EN

Abstracts

This is the 586th report in a series of primary market research reports that provide forecasts in communications, telecommunications, the Internet, computer, software, telephone equipment, health equipment, and energy. Automated process and significant growth potential are priorities in topic selection. The project leaders take direct responsibility for writing and preparing each report. They have significant experience preparing industry studies. Forecasts are based on primary research and proprietary data bases.

The primary research is conducted by talking to customers, distributors and companies. The survey data is not enough to make accurate assessment of market size, so WinterGreen Research looks at the value of shipments and the average price to achieve market assessments. Our track record in achieving accuracy is unsurpassed in the industry. We are known for being able to develop accurate market shares and projections. This is our specialty.

The analyst process is concentrated on getting good market numbers. This process involves looking at the markets from several different perspectives, including vendor shipments. The interview process is an essential aspect as well. We do have a lot of granular analysis of the different shipments by vendor in the study and addenda prepared after the study was published if that is appropriate.

Forecasts reflect analysis of the market trends in the segment and related segments. Unit and dollar shipments are analyzed through consideration of dollar volume of each market participant in the segment. Installed base analysis and unit analysis is based on interviews and an information search. Market share analysis includes conversations

with key customers of products, industry segment leaders, marketing directors, distributors, leading market participants, opinion leaders, and companies seeking to develop measurable market share.

Over 200 in depth interviews are conducted for each report with a broad range of key participants and industry leaders in the market segment. We establish accurate market forecasts based on economic and market conditions as a base. Use input/output ratios, flow charts, and other economic methods to quantify data. Use in-house analysts who meet stringent quality standards.

Interviewing key industry participants, experts and end-users is a central part of the study. Our research includes access to large proprietary databases. Literature search includes analysis of trade publications, government reports, and corporate literature.

Findings and conclusions of this report are based on information gathered from industry sources, including manufacturers, distributors, partners, opinion leaders, and users. Interview data was combined with information gathered through an extensive review of internet and printed sources such as trade publications, trade associations, company literature, and online databases. The projections contained in this report are checked from top down and bottom up analysis to be sure there is congruence from that perspective.

The base year for analysis and projection is 2010. With 2010 and several years prior to that as a baseline, market projections were developed for 2014 through 2020. These projections are based on a combination of a consensus among the opinion leader contacts interviewed combined with understanding of the key market drivers and their impact from a historical and analytical perspective. The analytical methodologies used to generate the market estimates are based on penetration analyses, similar market analyses, and delta calculations to supplement independent and dependent variable analysis. All analyses are displaying selected descriptions of products and services.

This research includes reference to an ROI model that is part of a series that provides IT systems financial planners access to information that supports analysis of all the numbers that impact management of a product launch or large and complex data center. The methodology used in the models relates to having a sophisticated analytical technique for understanding the impact of workload on processor consumption and cost.

WinterGreen Research has looked at the metrics and independent research to develop.

assumptions that reflect the actual anticipated usage and cost of systems. Comparative analyses reflect the input of these values into models.

The variables and assumptions provided in the market research study and the ROI models are based on extensive experience in providing research to large enterprise organizations and data centers. The ROI models have lists of servers from different manufacturers, Systems z models from IBM, and labor costs by category around the world. This information has been developed from WinterGreen research proprietary data bases constructed as a result of preparing market research studies that address the software, energy, healthcare, telecommunications, and hardware businesses.

Contents

SEMICONDUCTOR WIRELESS SENSOR NETWORK MARKET EXECUTIVE SUMMARY

Semiconductor Wireless Sensor Networks Market Driving Forces Semiconductor Wireless Sensor Networking Market Wireless Sensor Network Energy Harvesting And Storage Applications Semiconductor Wireless Sensor Network Market Shares Semiconductor Wireless Sensor Networks Market Forecast

1. SEMICONDUCTOR WIRELESS SENSOR NETWORK

- 1.1 Wireless Sensor Network Market Segments
- 1.1.1 Global Spectrum Allocation
- 1.2 Semiconductor Wireless Sensor Network Applications
 - 1.2.1 Dust Networks Applications
 - 1.2.2 Vigilent and Dust Networks Reduce Data Center Energy Consumption
 - 1.2.3 Dust Networks Transportation Examples
 - 1.2.4 Data Center Wireless Sensor Networks
 - 1.2.5 Wireless Sensor Network Applications and Benefits

2. SEMICONDUCTOR WIRELESS SENSOR NETWORK MARKET SHARES AND MARKET FORECASTS

- 2.1 Semiconductor Wireless Sensor Networks Market Driving Forces
 - 2.1.1 Semiconductor Wireless Sensor Networking Market
- 2.1.2 Wireless Sensor Network Energy Harvesting And Storage Applications
- 2.2 Semiconductor Wireless Sensor Network Market Shares
- 2.2.1 Renesas Electronics Wireless Sensor Networks: Semiconductor Technology
- 2.2.2 Linear Technology / Dust Networks Applications
- 2.2.3 Linear Technology / Dust Networks Data Center Wireless Sensor Networks
- 2.2.4 Microsemi Airplane Wireless Sensor Networks
- 2.2.5 IBM Mote Runner Software Development Kit
- 2.3 Semiconductor Wireless Sensor Networks Market Forecast
- 2.3.1 Semiconductor Wireless Sensor Network Applications Forecasts
- 2.3.2 Semiconductor Wireless Sensor Networking Bridges / Process Shipments Market Forecasts
 - 2.3.3 Smart Commercial Building Semiconductor Wireless Sensor Networks

Shipments Market Forecasts

2.3.4 Semiconductor Wireless Sensor Networks Security Shipments Market Forecasts

2.3.5 Aircraft and Tank Level Monitoring Wireless Sensor Networks Shipments, Market Forecasts

2.3.6 Homes / Physical Presence Semiconductor Wireless Sensor Networks Shipments Market Forecasts

2.3.7 Data Center, Smart Substation, and Smart Grid Meter Wireless Sensor Networks Market Forecasts

- 2.4 Semiconductor Wireless Sensor Network OEM Markets
- 2.5 Internet Grows
- 2.5.1 Sensors Plus The Cloud
- 2.6 Internet of Things (IoT) Growth
- 2.7 Semiconductor Wireless Sensor Networks Market Prices
- 2.8 Semiconductor Wireless Sensor Networks Regional Market Analysis

3. WIRELESS SENSOR NETWORK PRODUCT DESCRIPTION

- 3.1 Renesas Electronics Wireless Sensor Network Semiconductors
 - 3.1.1 Renesas Expertise Create And Promote New Markets
- 3.1.2 Renesas Electronics Manages Rapid Pace Of Change For Wireless Sensor Networks

3.1.3 Renesas Electronics Wireless Sensor Networks: Semiconductor Technology Markets

- 3.1.4 Renesas Addresses Semiconductor Rapid Pace Of Change
- 3.1.5 Renesas Sees Demise of Wired Networks
- 3.1.6 Renesas Analog Front End Brings The Sensor and Microcontroller Together
- 3.1.7 Renesas Smart Analog Technology
- 3.1.8 Renesas Reduces Development Time
- 3.1.9 Renesas Low-Power, Small Footprint Hardware Platform
- 3.1.10 Renesas Providing Intelligence To Every Sensor
- 3.1.11 Renesas Proposing New Communication Technologies: BAN and VLC
- 3.1.12 Renesas Applications for Body Area Networks
- 3.1.13 Renesas Visible Light Communication Techniques
- 3.1.14 Renesas Expanding the Operational Capability Of Sensor Modules
- 3.1.15 Renesas Smart Car
- 3.2 Linear Technology / Dust Networks
 - 3.2.1 Linear Technology Wireless Sensor Networks for Green Data Centers
 - 3.2.2 Dust Networks Self-Powered IPV6 Wireless Sensor Network
 - 3.2.3 Linear Technology / Dust Networks Embedded Wireless Systems

- 3.2.4 Linear Technology / Dust Networks / Cymbet
- 3.2.5 Dust Networks Connects Smart Devices
- 3.2.6 Dust Networks Eterna IEEE 802.15.4e System-on-Chip Platform
- 3.2.7 Dust Networks Dynamic Network Optimization
- 3.2.8 SmartMesh IP Embedded Products
- 3.3 Libelium Video Wireless Sensor Networks
- 3.3.1 Libelium Waspmote Uses ZigBee, Bluetooth and Wi-Fi Protocols
- 3.3.2 Libelium Waspmote and Meshlium
- 3.3.3 Libelium Meshlium

3.3.4 Libelium Capturing and Storing Sensor Data in Meshlium from a Waspmote Sensor Network

- 3.4 Microsemi Airplane Wireless Sensor Networks
- 3.4.1 Microsemi FPGAs
- 3.4.2 Microsemi TVS devices
- 3.4.3 Microsemi Integrated Circuits
- 3.4.4 Microsemi Wireless Sensor Networks
- 3.4.5 Microsemi Wireless Sensors
- 3.5 Silicon Labs
 - 3.5.1 Silicon Labs Network Protocols
- 3.5.2 Silicon Labs EZMacPRO and EZHop Software Modules Position in the OSI

Model

- 3.5.3 Silicon Laboratories Wireless Sensor Networks
- 3.5.4 Silicon Laboratories
- 3.5.5 Silicon Laboratories Energy Harvesting Applications
- 3.5.6 Energy Harvesting Reference Design
- 3.6 LORD MicroStrain
 - 3.6.1 Lord Smart Network Coordination
 - 3.6.2 Lord Small Sensors. Big Data.
- 3.6.3 LORD MicroStrain wireless sensor networks (WSN)
- 3.6.4 LORD MicroStrain
- 3.6.5 Lord Oil and Gas Wireless Sensor Networks
- 3.7 MEMSIC's wireless Motes and sensors
- 3.8 IBM Smarter Planet

3.8.1 IBM Smarter Planet Systems Approach To Product And Systems Development ROI

- 3.8.2 IBM Mote Runner
- 3.8.3 IBM Mote Runner Software Development Kit
- 3.8.4 IBM Mote Runner High-Performance, Lowfoot Print Run-Time Platform
- 3.8.5 Semtech and IBM

3.8.6 IBM and Libelium Launch 6LoWPAN Development Platform for the Internet of Things

3.8.7 IBM / Libelium Smart World Infographic – Sensors for Smart Cities, Internet of Things

- 3.8.8 IBM and Libelium, A Wireless Sensor Network Hardware
- 3.8.9 IBM / MEMSIC
- 3.8.10 IBM SOAP M2M
- 3.8.11 IBM M2M Message Flows
- 3.8.12 IBM Integration Bus
- 3.8.13 IBM Operational Decision Manager Automate And Govern Repeatable

Decisions

3.9 Cisco Wireless Sensor Networks

3.9.1 Cisco Secure Wireless Plant: Security and Quality of Service for Industrial Environments

- 3.9.2 Cisco and Dust Networks
- 3.9.3 Cisco Using Sensor Networking Standards
- 3.10 Siemens Smart Meters

3.10.1 Siemens Smart Grid Priming Services Customized for Smart Grid Utility Solutions

- 3.10.2 Siemens Program Management
- 3.10.3 Siemens Smart Metering Solutions
- 3.10.4 Siemens Enhanced Distribution Management System
- 3.10.5 Siemens Information Model Manager (IMM)
- 3.11 Boeing
 - 3.11.1 Boeing / Fujitsu RFID Tracking
 - 3.11.2 Boeing and Fujitsu Use Radio Frequency ID Tags
 - 3.11.3 Boeing Wireless Sensor Applications
 - 3.11.4 Boeing Wireless Sensor Network Applications
 - 3.11.5 Boeing / MicroStrain Synchronized Wireless Sensor Network for Landing Gear
 - 3.11.6 Boeing 767 Aircraft Wireless Sensor Network Cabin Environment Sensor

System

- 3.12 Rockwell Automation
 - 3.12.1 Rockwell Supply Chain Automation
 - 3.12.2 Rockwell Automation Wireless Sensors
- 3.13 Honeywell
 - 3.13.1 Honeywell OneWireless Network Open System
 - 3.13.2 Honeywell's Multinodes and Cisco's 1552S Aironet Access Points ENOCEAN

EnOcean Link

EnOcean Faster development

- EnOcean Link Fully Prepared Data
- EnOcean Encrypted Decoding Gateway
- EnOcean ECO 200 Motion Energy Harvesting
- EnOcean ECT 310 Thermo Energy Harvesting
- EnOcean Energy Harvesting Wireless Sensor Solutions
- EnOcean Energy Harvesting Wireless Sensor Solutions
- EnOcean Alliance Energy Harvesting Solutions
- EnOcean-Enabled Wireless Networks
- **EnOcean Alliance**
- 3.14 Freescale Semiconductor Inc.,
- 3.15 Schneider Electric Lighting Control Solutions for Comprehensive Facility Energy Management
 - 3.15.1 Schneider Electric Lighting Control Systems
- 3.15.2 Schneider Electric / Invensys PLC.
- 3.16 Mitsubishi Electric
- 3.17 Conexant Systems, Inc.
- 3.18 Teledyne / Rockwell Scientific ...
- 3.19 Texas Instruments / National Semiconductor Corporation, LMX3162 Single Chip Radio
- 3.20 Analog Devices Wireless Vibration Sensing Network System
- 3.21 Silicon Labs Solutions For Energy Harvesting Systems
 - 3.21.1 Silicon Labs Energy Harvesting Tipping Point for Wireless Sensor Applications
 - 3.21.2 Silicon Laboratories Low-Power Optimization
 - 3.21.3 Silicon Labs Solutions For Energy Harvesting Systems
 - 3.21.4 Silicon Labs Minimizing The Amount Of Time The Radio Is On
 - 3.21.5 Silicon Laboratories Managing Harvested Energy
 - 3.21.6 Silicon Labs Ability To Power Wireless Sensor Nodes
- 3.21.7 Silicon Labs Powers Wireless Node with Energy Harvesting
- 3.22 Sensata Technologies

4. WIRELESS SENSOR NETWORK TECHNOLOGY

- 4.1 Libelium Video Camera Sensors
 - 4.1.1 Libelium Technology
- 4.2 Millennial Net MeshScape™ Wireless Sensor Networking Software Platform
- 4.3 Wireless Sensor Network Architecture
- 4.4 Healthcare Wireless Cardiac Networking
- 4.4.1 Flexible Circuit Board

- 4.4.2 Wireless Heart-Monitoring Devices
- 4.4.3 Zigbee Retail
- 4.4.4 Zigbee Smart Energy
- 4.4.5 Zigbee Smart Apps: ZigBee Building Automation
- 4.5 E-Enabled Airplanes
- 4.5.1 Security Of Wireless Sensor Network Enabled Airplane Health
- 4.6 Wireless Network Standards
- 4.6.1 Zigbee Alliance
- 4.6.2 M2M
- 4.6.3 LXRS PROTOCOL
- 4.6.4 WirelessHART (IEC62591)
- 4.7 Components of a WSN Node
- 4.7.1 Small Cells and LTE
- 4.7.2 Smart Antenna Systems

5. WIRELESS SENSOR NETWORK COMPANY DESCRIPTION

- 5.1 Akamai
- 5.1.1 Akamai Balances Web Site Traffic
- 5.1.2 Akamai Revenue
- 5.2 Analog Devices
 - 5.2.1 Analog Devices Revenue
- 5.2.2 Analog Devices MEMS Wireless Vibration Sensors
- 5.3 Conexant Systems
- 5.4 Dialog
- 5.4.1 Dialog Typical Cordless Telephony Applications
- 5.5 Freescale Semiconductor
 - 5.5.1 Freescale Semiconductor Revenue
- 5.6 Fujitsu
 - 5.6.1 Fujitsu Revenue
 - 5.1.1 Fujitsu Technology Solutions Services
- 5.1.2 Fujitsu Corporate Strategy
- 5.1.3 Fujitsu Revenue
- 5.1.4 Fujitsu Interstage
- 5.1.5 Fujitsu Acquires RunMyProcess Cloud Service Provider
- 5.7 Gemalto
 - 5.7.1 Gemalto Q3 2014 Results
- 5.8 Honeywell
 - 5.8.1 Honeywell Revenue

- 5.8.2 Honeywell Aerospace
- 5.8.3 Honeywell Automation and Control Solutions
- 5.8.4 Honeywell Performance Materials and Technologies
- 5.8.5 Honeywell Transportation Systems
- 5.8.6 Honeywell
- 5.8.7 Honeywell Energy-Harvesting Sensing and Control
- 5.9 IBM
 - 5.9.1 IBM Industry Analyst Perspective
 - 5.9.2 IBM Strategy
 - 5.9.3 IBM Revenue
 - 5.9.4 IBM Q4 2013 Software
 - 5.9.5 IBM Q4 2013 Services
 - 5.9.6 IBM Q4 2013 Financing
 - 5.9.7 IBM Q4 2013 Hardware
 - 5.9.8 IBM Q4 Geographic Regions
 - 5.9.9 IBM Q4 Growth Markets
 - 5.9.10 IBM Full-Year 2013 Results
 - 5.9.11 IBM Full-Year Geographic Regions
 - 5.9.12 IBM Growth Markets
 - 5.9.13 IBM Business Partners
 - 5.9.14 IBM Messaging Extension for Web Application Pattern
 - 5.9.15 IBM MobileFirst
 - 5.9.16 IBM Analytics and Optimization Strategy
 - 5.9.17 IBM Smarter Planet
 - 5.9.18 IBM Cloud Computing
 - 5.9.19 IBM Business Model
 - 5.9.20 IBM Business Revenue Segments And Capabilities
- 5.10 Integrated Device Technology (IDT)
- 5.10.1 Integrated Device Technology, Inc. (IDT) Revenue
- 5.10.2 Integrated Device Technology, Inc. (IDT) Products
- 5.11 Invensys
 - 5.11.1 Invensys Revenue
 - 5.11.2 Invensys Offer From Schneider Electric S.A
- 5.12 Libelium
 - 5.12.1 Libelium Wireless Sensor Network Platform
 - 5.12.2 Libelium as Internet of Things Platform Provider
 - 5.12.3 Libelium Vehicle Traffic Monitoring Platform
- 5.12.4 Libelium Waspmote Modular Platform
- 5.13 Linear Technology / Dust Networks

- 5.13.1 Dust Networks
- 5.13.2 Dust Networks Self-Powered IPV6 Wireless Sensor Network
- 5.13.3 Dust Networks Applications
- 5.13.4 Linear Technology Revenue
- 5.13.5 Linear Technology Acquisitions
- 5.13.6 Linear Technology Products
- 5.13.7 Linear Technology
- 5.14 Lord
 - 5.14.1 Lord Combining Multiple Sensors
 - 5.14.2 Lord MicroStrain Sensing Systems Quality & Innovation
- 5.14.3 Lord Revenue
- 5.15 Microsemi Corporation
- 5.15.1 Microsemi Customers
- 5.15.2 Microsemi Revenue
- 5.15.3 Microsemi / Zarlink Semiconductor
- 5.16 Millennial Net
- 5.17 Mitsubishi Electric
- 5.18 Northrop Grumman
- 5.18.1 Northrop Grumman Smart Grid
- 5.18.2 Northrop Grumman
- 5.18.3 Northrop Grumman Corp (NOC.N) Spinning Off Or Selling Its Shipbuilding Business
- 5.18.4 Northrop Grumman Remotec Robots

5.18.5 Northrop Grumman Opens New Facilities for Design and Manufacture of Unmanned Ground Vehicles in Coventry

- 5.18.6 Northrop Grumman Business Sectors:
- 5.18.7 Northrop Grumman Aerospace Systems
- 5.19 OMRON
 - 5.19.1 Omron Revenue
- 5.20 Renesas
- 5.20.1 Renesas Electronics Partners and Customers
- 5.21 Rockwell Automation
 - 5.21.1 Rockwell Automation Acquires vMonitor
 - 5.21.2 Rockwell Automation / VMonitor Wireless Sensors
- 5.22 Schneider Electric
 - 5.22.1 Schneider Electric
 - 5.22.2 Schneider Electric Vision Smart Grid:
 - 5.22.3 Schneider Electric Triggers of the Smart Grid
 - 5.22.4 Schneider Electric Revenue

- 5.22.5 Smart Grid: Schneider Electric Vision
- 5.22.6 Schneider Electric Triggers of the Smart Grid
- 5.22.7 Schneider Electric / Invensys
- 5.22.8 Schneider Electric / Invensys Revenue
- 5.22.9 Schneider Electric / Invensys Offer From Schneider Electric S.A

5.23 Semtech

- 5.23.1 Semtech / Gennum
- 5.23.2 Semtech / Cycleo SAS
- 5.23.3 Semtech Revenue
- 5.24 Sensata Technologies
 - 5.24.1 Sensata Technologies Acquires Wabash Technologies
- 5.24.2 Sensata Technologies Revenue
- 5.25 Silicon Labs
 - 5.25.1 Silicon Laboratories Energy Harvesting Applications
- 5.25.2 Silicon Laboratories Products
- 5.26 Texas Instruments
- 5.26.1 Texas Instruments Revenue
- 5.27 Zigbee Standard
- 5.27.1 ZigBee Gateway
- 5.28 Z-wave
- 5.29 Wireless Sensor Network WSN Selected Company List

About

WinterGreen Research announces that it has published a new study Wireless Sensor Network Market Shares, Strategy, and Forecasts, Worldwide, 2014 to 2020. The 2014 study has 640 pages, 266 tables and figures. Worldwide markets are poised to achieve significant growth as the Semiconductor Wireless Sensor Network is used to implement the Internet of things and to monitor pipelines, oil wells, and healthcare patients to illustrate the variety of projects supported by these networks.

Semiconductor wireless sensor networks are used for bridge monitoring, implementing the smart grid, implementing the Internet of things, and monitoring for security implementation. The systems are used to implement energy savings in homes and commercial buildings, almost anything can be monitored with sensors and tracked on a smart phone. Projects are ongoing.

With 9 billion devices connected to the Internet in 2014, phenomenal growth is likely to occur when that number rises to 100 billion by 2020. Businesses control devices with sensors and wireless sensor networks (WSNs).

The sensors connected to the Internet promise to bring a big data explosion. Much of the data will be discarded, as users get simply overwhelmed by vast volumes. Analytics will become popular inside the wireless sensor networks so that alerts are generated at the point of collection of data.

The issue is how to embed analytics into the wireless sensor network control units so that only the alert data needed is transmitted. Users of information need to be able to find, control, manage, and secure the information coming from sensors onto the network. Users need to analyze and exploit the information coming from sensors.

Advanced technologies for wireless sensor networks are associated with emerging ways of interconnecting devices that have never been connected before. Networking is based on leveraging the feasibility of making sensors work independently in groups to accomplish insight not otherwise available.

Advanced storage devices are emerging simultaneously with the energy harvesting devices that are economical, making sensor networks feasible. Storage devices can leverage the power captured by energy harvesting when sensors and devices are interconnected as a network.

Data storage technologies connected to the sensors are permitting far better control of the world around us, implementing vastly improved energy efficiency as lights and hearting are turned on and off just as needed. Wireless sensor networks implement cost-effective systems.

Wireless sensor networks are developing a market presence. They are set to power wireless sensor network proliferation. Independent sensor devices located almost anywhere have attained workable levels of efficiency.

The proliferation of apps on smart phones will drive growth of semiconductor wireless sensor networks markets because the sensors work directly as they are installed without excess labor and wiring that has been necessary previously, making the systems more convenient to install and run.

Healthy lifestyle choices can increase the length of DNA sequences found at the end of a person's chromosomes and reverse aging. This discovery is likely to increase interest in monitoring and testing DNA sequences and looking at the ends of the chromosomes. This discovery is likely to increase a shift toward wellness initiatives. It has stimulated the need for better communication between clinicians and patients. New sensor technology creates the opportunity for monitoring and testing. Wireless sensor network devices can be used to send alerts to at risk people who are exercising.

Wireless sensor networking is set to grow as sensors are freed from the grid and networks implement connectivity that is mesh architecture based. Converting ambient energy to useable electrical energy harvesting (EH) systems creates the opportunity to implement wireless sensor networks. These networks interconnect an inexpensive and compact group of devices and sensors. The networks use wireless capability to power portable electrical devices.

According to Susan Eustis, lead author of the WinterGreen Research team that prepared the semiconductor wireless sensor network market research study, "Semiconductor wireless sensor network markets are evolving as smart phone devices and technology find more uses throughout the landscape of the Internet of Things. Sensors can provide monitoring that has not previously been available.

Differential diagnostic tools support provide differential information that helps manage our daily lives from traffic patterns to crime detections, to medical treatment."

"The decision process take into account clinical findings from the home monitoring

devices and from symptoms verbally communicated in a clinical services setting. Improved economics of healthcare delivery implementation is facilitated by wireless sensor networks. This is true across the spectrum of things that can be monitored by sensors".

Semiconductor Wireless Sensor Networks Markets at \$2.7 billion in 2013 are forecast to reach \$12 billion Worldwide by 2020. Wild growth, frequently measured as penetration rates is a result of the change out of wired sensor networks for wireless ones. In addition, the wireless networks have a broader reach than the wired ones did, spurring market extensions in a variety of applications, some not even thought of so far.

Market growth is dependent on emerging technology. As the wireless technology, the solid state battery, the sensor technology, smart phone technology and the energy harvesting technology all become commercialized, these devices will be used to implement wireless sensor networks. The semiconductor wireless sensor networks markets will be driven by the adoption of 9 billion smart phones by 2020, creating demand for apps that depend on sensor networks.

WinterGreen Research is an independent research organization funded by the sale of market research studies all over the world and by the implementation of ROI models that are used to calculate the total cost of ownership of equipment, services, and software. The company has 35 distributors worldwide, including Global Information Info Shop, Market Research.com, Research and Markets, Electronics.CA, Bloomberg, and Thompson Financial.

WinterGreen Research is positioned to help customers face challenges that define the modern enterprises. The increasingly global nature of science, technology and engineering is a reflection of the implementation of the globally integrated enterprise. Customers trust WinterGreen Research to work alongside them to ensure the success of the participation in a particular market segment.

I would like to order

Product name: Semiconductor Wireless Sensor Internet of Things (IoT): Market Shares, Strategies, and Forecasts, Worldwide, 2014 to 2020

Product link: https://marketpublishers.com/r/SE90A3694F7EN.html

Price: US\$ 3,900.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:

info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page https://marketpublishers.com/r/SE90A3694F7EN.html

To pay by Wire Transfer, please, fill in your contact details in the form below:

First name: Last name: Email: Company: Address: City: Zip code: Country: Tel: Fax: Your message:

**All fields are required

Custumer signature _

Please, note that by ordering from marketpublishers.com you are agreeing to our Terms & Conditions at https://marketpublishers.com/docs/terms.html

To place an order via fax simply print this form, fill in the information below and fax the completed form to +44 20 7900 3970
