## Abstracts

LEXINGTON, Massachusetts (October 29, 2013) – WinterGreen Research announces that it has published a new study Small Cells and Femtocells: Market Shares, Strategy, and Forecasts, Worldwide, 2013 to 2019. The 2013 study has 413 pages, 162 tables and figures. Worldwide markets are poised to achieve significant growth as small cell and femtocells and trucks permit users to implement automated driving.

Small cells are better than base stations for expanding wireless infrastructure coverage in the ear of smart phones. Wireless signals have incremental strength added locally in home, airport, or enterprise.

Small cells are able to offload traffic from the macro network to an underlay network at a street and indoor level. Small cells work for individual subscribers, public places, and enterprises. Small cells create a wireless signal transmission zone. A cluster of low-power access points are connected to a local controller. The quality of voice calls and data transmission is improved in a cost effective manner

Small cells are units that address wireless services operator needs to continue to support of mix of 3G and 4G subscriber device generations and a mix of 3G and 4G technology within the same device. LTE standards for data are well established but wireless devices, smart phones still use 3G for voice services, creating a need for 3G and 4G transmission capability.

Delivery of voice services over LTE networks has not been standardized yet. Operators continue to deliver voice via their 3G networks even as they move data to LTE. As a result, subscriber devices are a mix of 3G-only and 4G plus 3G, with very few 4G-only devices. To support these subscribers comprehensively across all types of mobile services, operators must deploy a multi-mode radio access infrastructure including multimode femtocells.

Multimode femtocells provide a cost effective solution to effectively support all user services. There are 3G microcells, picocells, femtocells, a mix of devices known as small cells.

The number of mobile internet users has surpassed desktop users as tablets erode the PC markets rapidly. Video streaming and VoIP inflate traffic volumes by a factor of 1,000-fold by 2020. Adding conventional base stations is an unaffordable way to handle this situation. Operators are looking for cost-effective solutions to ease the pressure on their existing infrastructure.

The small cell and femtocell designs amalgamate a group of features generally found on macro base station installations to represent a local solution that is cheaper, faster, and better. These include the transmitters, the receivers, software middleware needed for a very local integrated approach to improving signal transmission for smart phones and tablets. Significant investments in research and development are necessary as the emerging small cell and femtocells industry builds on incremental technology roll outs.

Small cell and femtocell market shipments forecast analysis indicates that markets at \$420 million in 2012 are forecast to reach \$5.98 billion by 2019. Market growth comes because there is no other way to build out wireless data infrastructure in an economical manner. The delivery of apps is anticipated to grow to a \$236 trillion, yes trillion dollar, market by 2019. This means a lot of data streaming around.

According to Susan Eustis, principal author of the report, "Small cell market growth is a result of various moves toward autonomous miniature base stations that are used as boxes to improve cell phone transmission, particularly smart phone signal transmission from everywhere."

Market driving forces relate primarily to the need for increased local signal strength. . Services providers are positioning with various small cell and femtocell models to meet huge demand as the world moves to 8.5 billion smart phones in use by 2019 and trillions of interconnected sensors on the Internet of Things. Many small cell vendors are making inexpensive smart phone local transmission a reality.

WinterGreen Research is an independent research organization funded by the sale of market research studies all over the world and by the implementation of ROI models that are used to calculate the total cost of ownership of equipment, services, and software. The company has 35 distributors worldwide, including Global Information Info

Shop, Market Research.com, Research and Markets, electronics.ca, Bloomberg, and Thompson Financial.

WinterGreen Research is positioned to help customers face challenges that define the modern enterprises. The increasingly global nature of science, technology and engineering is a reflection of the implementation of the globally integrated enterprise. Customers trust WinterGreen Research to work alongside them to ensure the success of the participation in a particular market segment.

WinterGreen Research supports various market segment programs; provides trusted technical services to the marketing departments. It carries out accurate market share and forecast analysis services for a range of commercial and government customers globally. These are all vital market research support solutions requiring trust and integrity.

This small cells and femtocells shipment analysis is based on consideration of the metrics for the number of smart phones shipped, percent of public places outfitted with small cells and femtocells, and probable market penetrations of macro base station numbers. Experience using the small cells and femtocells is another factor that contributes to development of triangulation regarding market forecasts for the sector.

## Contents

### **SMALL CELLS / FEMTOCELLS EXECUTIVE SUMMARY**

Small Cells Market Driving Forces

Number Of Mobile Internet Users

Small Cells Market Driving Forces

Core Small Cell Networks

Small Cells Industry Challenges

Small Cell Response to Market Challenges

Small Cells Call to Action

Small Cells Industry Addresses Fast-Paced Change

Small Cell Device Market Shares

Small Cells Market Forecasts

### **1. SMALL CELLS / FEMTOCELLS MARKET DEFINITION AND MARKET DYNAMICS**

1.1 Small Cell and Femtocells

1.1.1 LTE Operator Challenges

1.1.2 Femtocells Small 3G Base Stations

1.1.3 Traditional FMC Model Support VoIP Calls Over The IP Network

1.1.4 Femtocells Support VoIP Calls Over The IP Network

1.1.5 Session Border Controller (SBC)

1.1.6 SPIT Attack Simulation Project

1.2 T-Mobile Strategic Ubiquisys 3G Femtocell Positioning

1.3 Femtocells Small Consumer Devices

1.4 Femtocells Improve Cellular Coverage

1.4.1 Units The Size Of A Paperback Book

1.5 Increased Exposure To Radiation Is A Concern

1.6 SIP- Deployment

1.6.1 Telephone First Point Of Contact

1.6.2 SIP Application Server

1.6.3 SIP Applications

### **2. SMALL CELLS / FEMTOCELLS MARKET SHARES AND MARKET FORECASTS**

2.1 Small Cells Market Driving Forces

2.1.1 Number Of Mobile Internet Users

2.1.2 Small Cells Market Driving Forces

- 2.1.3 Core Small Cell Networks
- 2.1.4 Small Cells Industry Challenges
- 2.1.5 Small Cell Response to Market Challenges
- 2.1.6 Small Cells Call to Action
- 2.1.7 Small Cells Industry Addresses Fast-Paced Change
- 2.2 Small Cell Device Market Shares
  - 2.2.1 Airvana LP
  - 2.2.2 Airvana LP
  - 2.2.3 Cisco / Ubiquisys
  - 2.2.4 ip.access
  - 2.2.5 ip.access Consumer Access Point
  - 2.2.6 UbeeAirWalk
  - 2.2.7 NEC
  - 2.2.8 Wireless Infrastructure Market Shares, Dollars, Worldwide,
  - 2.2.9 Ericsson Core Network Infrastructure
  - 2.2.10 Ericsson Leading Supplier of CDMA Solutions For Network Operators
  - 2.2.11 Ericsson Evolved Packet Core (EPC)
  - 2.2.12 Huawei
  - 2.2.13 Revenues in Alcatel-Lucent Wireless Division
  - 2.2.14 Alcatel-Lucent Networks Segment is Number in IP/MPLS Service Provider Edge Routers with 25% Market Share
  - 2.2.15 Femtocell and Small Cell Market Participants
  - 2.2.16 Small Cell Wireless Infrastructure Market Shares,
- 2.3 Small Cells Market Forecasts
  - 2.3.1 Femtocell and Small Cell Broadband Cellular Networks
  - 2.3.2 Femtocell and Small Cell Forecasts
  - 2.3.3 Femtocell and Small Cell Implementations
  - 2.3.4 FCC "an Industry-Consensus Definition For Visually Unobtrusive Wireless Small Cells
- 2.4 Small Cell IC Markets
  - 2.4.1 Wireless Apps
- 2.5 Software Defined Networking (SDN) and Network Function Virtualization (NFV)
  - 2.5.1 Software Defined Networking (SDN) and Network Function Virtualization (NFV)
- Reordering Of Market Share
  - 2.5.2 Mobile Packet Core
  - 2.5.3 Mobile Broadband1
  - 2.5.4 Small Cells Are Disruptive Technology In Networks
- 2.6 Wireless Infrastructure Return on Investment
- 2.7 Wireless Infrastructure Regional Market Analysis

- 2.7.1 Ericsson Aiming To Have 50% of LTE Market in Latin America
- 2.7.2 Ericsson Sells Wireless Infrastructure in Latin America Market
- 2.7.3 Latin America
- 2.7.4 Ericsson LTE
- 2.7.5 Ericson Regional Wireless Subscriber Analysis
- 2.7.6 Global Mobile Traffic for Data
- 2.7.7 Huawei Regional Participation in India
- 2.7.8 CDMA in India, North America and China

### **3. SMALL CELLS / FEMTOCELLS PRODUCT DESCRIPTION**

#### **3.1 Ericsson**

- 3.1.1 Ericsson Home 3G Access Point
- 3.1.2 Ericsson / Airvana

#### **3.2 Airvana Femtocell Network Integration**

- 3.2.1 Airvana HubBub in a Legacy Core Network
- 3.2.2 Airvana HubBub in a VoIP/IMS Core Network
- 3.2.3 Airvana Femtocell Service Manager
- 3.2.4 Airvana Femtocell Service Manager Functions and Interfaces
- 3.3.1 Airvana Femtocell Solutions Based on CDMA and UMTS
- 3.3.2 Airvana CDMA2000 HubBub

#### **3.3 ip.access**

- 3.3.3 ip.access Consumer Access Point
- 3.3.4 ip.access The C-class Consumer Small Cell
- 3.3.5 ip.access SoHo SME Access Points -Targeted Coverage For Smaller

#### **Enterprises**

- 3.3.6 ip.access S16 model
- 3.3.7 ip.access S8 model
- 3.3.8 ip.access Enterprise and Public Access- Small Cells For Complex Coverage
- 3.3.9 ip.access nano3G E16/24
- 3.3.10 ip.access nanoBTS
- 3.3.11 ip.access nanoLTE
- 3.3.12 ip.access E-40 Model Small Cell
- 3.3.13 ip.access E-100 Model
- 3.3.14 ip.access Oyster 3G
- 3.2.1 Architecture of Oyster 3G

#### **3.4 Fujitsu Ultra-Compact Femtocell**

- 3.4.1 Fujitsu LTE Femtocell Systems
- 3.4.2 Fujitsu BroadOne LTE Femtocell

- 3.4.3 Fujitsu LTE Femtocell Target Areas
- 3.4.4 Fujitsu LTE Femtocell Solutions
- 3.4.5 Fujitsu LTE Femtocell Access Point
- 3.4.6 Fujitsu Femtocell Resolution of Interference Problems
- 3.5 Samsung Small Cells
  - 3.5.1 Samsung LTE Small Cells
  - 3.5.2 Samsung Small Cell LTE High Capacity And Coverage
  - 3.5.3 Samsung Small Cell LTE High Capacity And Coverage Flexibility and High Performance
  - 3.5.4 Samsung Small Cell LTE High Capacity And Coverage Reduced Time to Market
  - 3.5.5 Samsung Small Cell LTE High Capacity And Coverage Indoors
  - 3.5.6 Samsung Small Cell LTE High Capacity And Coverage Outdoors
  - 3.5.7 Samsung CDMA UbiCell
  - 3.5.8 Samsung HSPA UbiCell
- 3.6 Cisco Small Cell Solutions
  - 3.6.1 Cisco ASR 5000 Series
  - 3.6.2 Cisco StarOS Software
  - 3.6.3 Cisco ASR 5000 Series Small Cell Gateway
  - 3.6.4 Cisco Wi-Fi Applications
  - 3.6.5 Cisco Femtocell Solutions
  - 3.6.6 Cisco / Ubiquisys
- 3.7 Ubiquisys In-Building Public Access Small Cells
  - 3.7.1 Ubiquisys Enterprise Small Cells
  - 3.7.2 Ubiquisys Residential Femtocells
  - 3.7.3 Ubiquisys Outdoor Rural Small Cells
  - 3.7.4 Ubiquisys ActiveRadio™ Radio Resource Management
  - 3.7.5 Ubiquisys Small Cells Capabilities for the End-User
  - 3.7.6 Ubiquisys Macro Network Interworking
  - 3.7.7 Ubiquisys Statistics and Diagnostics
  - 3.7.8 Ubiquisys Core Network Interfacing
  - 3.7.9 Ubiquisys Lifecycle Management
  - 3.7.10 Ubiquisys ActiveSON™ Grid
  - 3.7.11 Ubiquisys ZoneGate Femtocell Solution
  - 3.7.12 Ubiquisys ZoneGate Services Platform
  - 3.7.13 Ubiquisys ZoneGate for Operators
  - 3.7.14 Ubiquisys ZoneGate for Consumers
- 3.8 NEC
  - 3.8.1 NEC Small Cell Solutions for Residences
  - 3.8.2 NEC FP813

- 3.8.3 NEC Small Cell Solutions for Enterprise
- 3.8.4 NEC Small Cells for SOHO/SME
- 3.8.5 NEC FP1624
- 3.8.6 NEC FMA1630
- 3.8.7 NEC FP1624
- 3.8.8 NEC Small Cells on LTE
- 3.8.9 NEC Mobile Backhaul for Small Cells
- 3.9 Radisys
  - 3.9.1 Radisys Trillium
  - 3.9.2 Radisys Turnkey LTE Small Cell Solution
  - 3.9.3 Radisys Turnkey 3G Small Cell Solution
  - 3.9.4 CCPU's Trillium Femtocell Software
  - 3.9.5 Example of Trillium Femtocell Solutions
  - 3.9.6 Femtocell Protocols Supported by CCPU
- 3.10 UbeeAirWalk
  - 3.10.1 UbeeAirWalk LTE for Small Cells
  - 3.10.2 UbeeAirWalk Small Cells Technology
  - 3.10.3 UbeeAirWalk Residential Femtocells
  - 3.10.4 UbeeAirWalk Enterprise Femtocells
  - 3.10.5 UbeeAirwalk EdgePoint
- 3.11 Aricent
  - 3.11.1 Aricent Femtocell Software Framework
  - 3.11.2 Aricent Femtocell Software Framework and Protocol Stack
  - 3.11.3 Aricent Provides Femtocell Software Development
- 3.12 Microsoft / Nokia
  - 3.12.1 Nokia Small Cells
  - 3.12.2 Microsoft / Nokia Flexi Zone
  - 3.12.3 Microsoft / Nokia Flexi Lite Base Station
  - 3.12.4 Nokia Femtocell Solution
  - 3.12.5 Nokia In-Building Solutions
  - 3.12.6 Microsoft / Nokia Services for Heterogeneous Networks (HetNets)
- 3.13 Huawei
  - 3.13.1 Huawei AtomCell
- 3.14 Kineto Wireless
- 3.15 Juniper Networks
- 3.16 Sonus Networks
- 3.17 NextPoint
- 3.18 Rakon
- 3.19 Mindspeed / picoChip Small Cell ICs

- 3.19.1 picoChip PC82x8 series
- 3.19.2 picoChip PC8209 series
- 3.20 Freescale

## **4 SMALL CELLS AND FEMTOCELLS TECHNOLOGY**

- 4.1 Technology Trends in Small Cells
- 4.2 nano3G®
  - 4.2.1 nano3G components
- 4.3 Femtocell Handles 3g Cellular Technologies
- 4.4 Collapsed Stack
- 4.5 Standards
  - 4.5.1 Qualcomm
  - 4.5.2 UMTS Forum
- 4.6 Ericsson Technology Perspective
  - 4.6.1 Limited Bandwidth Giving Way to Expanded bandwidth
  - 4.6.2 Infrastructure At A Cell Site
- 4.7 Backhaul Network Architecture
  - 4.7.1 Ericsson Standardization Work In The 3rd Generation Partnership Project (3GPP),
  - 4.7.2 Session Initiation Protocol (SIP)
  - 4.7.3 Applications Of The Internet Requiring SIP
- 4.8 Huawei Pipe Strategy
- 4.9 Small-Cell Architectures
  - 4.9.1 Small Cells and LTE
  - 4.9.2 Smart Antenna Systems

## **5. SMALL CELLS AND FEMTOCELLS COMPANY DESCRIPTION**

- 5.1 Airvana LP
  - 5.1.1 Airvana Solutions For Transparent Offload And Ubiquitous Coverage
  - 5.1.2 Airvana / Ericsson
- 5.2 Alcatel-Lucent
  - 5.2.1 Alcatel-Lucent Revenue
  - 5.2.2 Alcatel-Lucent Operating Model Focused On Core Products
  - 5.2.3 Alcatel-Lucent Organization
  - 5.2.4 Alcatel-Lucent Operating Segments:
  - 5.2.5 Alcatel-Lucent LTE
  - 5.2.6 Alcatel-Lucent Strategic Focus

- 5.2.7 Alcatel-Lucent Revenue
- 5.2.8 Alcatel-Lucent Customers
- 5.3 Antenova
- 5.4 Aricent
  - 5.4.1 Aricent Customers
  - 5.4.2 Aricent Strategy
  - 5.4.3 Aricent Investors
  - 5.4.4 Aricent Company Highlights
- 5.5 Berkeley-Varitronics Systems
- 5.6 CDG
  - 5.6.1 CDMA2000 Evolution
  - 5.6.2 CDG Global Industry Organization
- 5.7 Cisco
  - 5.7.1 Cisco Revenue
  - 5.7.2 Cisco Information Technology
  - 5.7.3 Cisco Virtualization
  - 5.7.4 Cisco / Ubiquisys
  - 5.7.5 Cisco / Ubiquisys In-Building Public Access Small Cells
  - 5.7.6 Cisco Competitive Landscape In The Enterprise Data Center
  - 5.7.7 Cisco Architectural Approach
  - 5.7.8 Cisco Switching
  - 5.7.9 Cisco NGN Routing
  - 5.7.10 Cisco Collaboration
  - 5.7.11 Cisco Service Provider Video
  - 5.7.12 Cisco Wireless
  - 5.7.13 Cisco Security
  - 5.7.14 Cisco Data Center Products
  - 5.7.15 Cisco Other Products
  - 5.7.16 Cisco Systems Net Sales
  - 5.7.17 Cisco Systems Revenue by Segment
  - 5.7.18 Cisco Tops 10,000 Unified Computing System Customers
- 5.8 Ericsson
  - 5.8.1 Ericsson Wireless Infrastructure Portfolio
  - 5.8.2 Ericsson Network Evolution
  - 5.8.3 Ericsson Mobility Segment Information
  - 5.8.4 Ericsson Regions
  - 5.8.5 Ericsson Revenue Ericsson Revenue
  - 5.8.6 Ericsson Airvana
- 5.9 Fujitsu

- 5.9.1 Fujitsu Revenue
- 5.9.2 Fujitsu Technology Solutions Services
- 5.9.3 Fujitsu Personal Computers
- 5.9.4 Fujitsu Development and Production Facilities
- 5.9.5 Fujitsu Corporate Strategy
- 5.9.6 Fujitsu Revenue
- 5.9.7 Fujitsu Interstage
- 5.9.8 Fujitsu Acquires RunMyProcess Cloud Service Provider
- 5.9.9 Fujitsu and Radisys Partnership ATCA Platform Support
- 5.10 Global Mobile Suppliers Association
- 5.11 Huawei
  - 5.11.1 Huawei Invests In The Pipe
  - 5.11.2 Huawei's Internet Protocol (IP) Pipe Strategy
  - 5.11.3 Huawei Focus On Customers
  - 5.11.4 Huawei Revenue
- 5.12 ip.access Small Cell Systems
  - 5.12.1 ip.access Solutions
  - 5.12.2 Ip.access Investors
  - 5.12.3 Partners
- 5.13 Juniper
  - 5.13.1 Juniper Networks Strategy
  - 5.13.2 Juniper Networks Enterprise
  - 5.13.3 Juniper Networks Platform Strategy
  - 5.13.4 Juniper Revenue
- 5.14 Kinetio Wireless
  - 5.14.1 Customers
  - 5.14.2 Partners
- 5.15 LG
  - 5.15.1 LG Home Entertainment Company
  - 5.15.2 LG Mobile Communications Company
  - 5.15.3 LG Home Appliance Company
  - 5.15.4 LG Air Conditioning and Energy Solution Company
  - 5.15.5 LG Technology Strategy
  - 5.15.6 LG Revenue
- 5.16 Micro Mobio
- 5.17 Microsoft / Nokia
  - 5.17.1 Nokia-Microsoft
  - 5.17.2 Nokia Revenue
  - 5.17.3 Microsoft

- 5.17.4 Microsoft Key Opportunities and Investments
- 5.17.5 Microsoft Smart Connected Devices
- 5.17.6 Microsoft: Cloud Computing Transforming The Data Center And Information Technology
- 5.17.7 Microsoft Revenue
- 5.17.8 Microsoft Customers
- 5.17.9 Microsoft .NET Framework
- 5.17.10 Microsoft / Nokia
- 5.17.11 Microsoft Nokia Acquires Siemens' Entire 50% Stake in The Joint Venture
- 5.17.12 Nokia Telco Cloud Technology
- 5.17.13 Nokia Siemens Acquired Motorola Network Infrastructure Division
- 5.17.14 Nokia Siemens Networks Revenue
- 5.18 Mindspeed / picoChip
- 5.19 MTI Mobile
- 5.20 NEC
  - 5.20.1 NEC Business Outline
  - 5.20.2 NEC Revenue
- 5.21 NextPoint
  - 5.21.1 NextPoint Networks Global, Fixed-Mobile Convergence
  - 5.21.2 NextPoint Networks / Reefpoint Systems
  - 5.21.3 Customers
- 5.22 QRC Technologies
- 5.23 Qualcomm
  - 5.23.1 Qualcomm Mobile & Computing
  - 5.23.2 QMC Offers Comprehensive Chipset Solutions
  - 5.23.3 Qualcomm Government Technologies
  - 5.23.4 Qualcomm Internet Services
  - 5.23.5 Qualcomm Ventures
  - 5.23.6 Qualcomm Revenue
  - 5.23.7 Qualcomm Up to 4x Increase Over CDMA2000's Capacity
- 5.24 Radisys
  - 5.24.1 Radisys Acquisition of Continuous Computing
  - 5.24.2 Radisys Business
  - 5.24.3 Radisys Revenue
  - 5.24.4 Radisys ATCA
- 5.25 Rakon
  - 5.25.1 Rakon Partners
- 5.26 Repeaters Australia
  - 5.26.1 Repeater Improved Cellular Signal Coverage Area

- 5.27 Reactel
- 5.28 RF Hitec
- 5.29 Samsung
  - 5.29.1 Samsung Finds Talent And Adapts Technology To Create Products
  - 5.29.2 Samsung Adapts to Change, Samsung Embraces Integrity
  - 5.29.3 Samsung Telecom Equipment Group
  - 5.29.4 Samsung Electronics Q2 2013 Revenue
  - 5.29.5 Samsung Memory Over Logic
- 5.30 Small Cell Forum
- 5.31 Sonus Networks
  - 5.31.1 Sonus Customers
  - 5.31.2 Sonus Partners
- 5.32 Spirent Communications
  - 5.32.1 Spirent Key Financials
  - 5.32.2 Spirent Business
  - 5.32.3 Spirent Service Assurance
  - 5.32.4 Spirent Strategy
  - 5.32.5 Spirent Monitors Change, Identifies Trends
  - 5.32.6 Spirent Acquisitions
  - 5.32.7 Spirent Products
- 5.33 UbeeAirWalk
  - 5.33.1 Small Cells | Femtocells, Enterprise Femtocells and Picocells
  - 5.33.2 Wireless Mobile Broadband Devices | 4G USB Dongles and Hotspots
  - 5.33.3 Ubee Interactive
  - 5.33.4 Ubee Acquires AirWalk Communications
- 5.34 Cisco / Ubiquisys
- 5.35 ZTE
  - 5.35.1 ZTE Globally-Leading Provider Of Telecommunications Equipment
  - 5.35.2 ZTE Technology Innovation
  - 5.35.3 ZTE Revenue

## I would like to order

Product name: Small Cells and Femtocells Market

Product link: <https://marketpublishers.com/r/S4D3A52000CEN.html>

Price: US\$ 3,800.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:

[info@marketpublishers.com](mailto:info@marketpublishers.com)

## Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page <https://marketpublishers.com/r/S4D3A52000CEN.html>

To pay by Wire Transfer, please, fill in your contact details in the form below:

First name:  
Last name:  
Email:  
Company:  
Address:  
City:  
Zip code:  
Country:  
Tel:  
Fax:  
Your message:
